

CONTENTS

Author Biographies.....	vii
Preface.....	ix
Chapter 1 Introduction	1
1.1 Generalities.....	1
1.2 Renewable Energy	1
1.3 Geothermal Energy	3
1.4 Operation Principle of a HP	4
References.....	5
Chapter 2 Vapour Compression-Based Heat Pump Systems	7
2.1 Generalities.....	7
2.2 Thermodynamic Cycle.....	7
2.3 Operation Regimes of a HP.....	10
2.4 Performances and CO ₂ Emission of HP	11
2.5 Environmental Impact.....	21
References.....	25
Chapter 3 Substitution Strategy of Non-Ecological Refrigerants.....	27
3.1 Generalities.....	27
3.2 Environmental Impact of Refrigerants	28
3.3 Influence of Refrigerants on Process Efficiency	33
3.4 Strategy Concerning Non-Ecological Refrigerants	36
3.5 Conclusions	43
References.....	44
Chapter 4 Types of Compressors and Heat Pumps	47
4.1 Refrigeration Compressors	47
4.2 Description of Heat Pump Types	54
4.3 Selection of Heat Source and Heat Pump System	60
4.4 DHW Production for Nearly Zero-Energy Buildings	62
4.5 Installation Instructions for Heat Pumps.....	63
4.6 Examples of Heat Pump Utilisation	63

4.7	Renewable Energy Source Contribution from HP Sales in EU.....	69
4.8	Conclusions	70
	References.....	70
Chapter 5 Ground-Source Heat Pump Systems.....		71
5.1	Generalities.....	71
5.2	Description of SWHP Systems	72
5.3	Description of GWHP Systems	73
5.4	Description of GCHP Systems	76
5.5	Environmental Performances.....	123
5.6	Better Energy Efficiency with Combined Heating and Cooling by Heat Pumps.....	124
5.7	Conclusions	125
	References.....	126
Chapter 6 Heat Pump Heating and Cooling Systems.....		129
6.1	Generalities.....	129
6.2	Radiator Heating System	131
6.3	Radiant Heating and Cooling Systems.....	133
6.4	Terminal Unit Supply Temperature.....	139
6.5	Heating System Selection.....	140
6.6	Energy-Economic Analysis of Different Systems.....	140
6.7	Performance Analysis of Radiator and Radiant Floor Heating Systems Connected to a GCHP	151
6.8	Control of Heat Pump Heating and Cooling Systems.....	161
	References.....	164
Chapter 7 Experimental Ground-Coupled Heat Pump Systems.....		167
7.1	Generalities.....	167
7.2	Performance of a Vertical GCHP System for Heating, Cooling and DHW Operation.....	168
7.3	Numerical and Experimental Analysis of a Horizontal GCHP System	185
	References.....	195
Index.....		197
