

## The list of publications:

- Conductive nanostructured surface 6
- Epoxy/glass fibres laminates with integrated layer of carbon tubes decorated by Ag clusters for deformation detection 10
- Nanographene catalytic electrode for fuel cell electrode synthesized by in-liquid plasma 17
- Effects of fluorine termination of carbon nanowalls (CNWs) on their electrical properties by Ar/F<sub>2</sub> and Ar/NO/F<sub>2</sub> mixture gas treatments 22
- Hydrogen peroxide sensor based on carbon nanowalls grown by plasma enhanced chemical vapor deposition 28
- Organic vapour sensing and thermoelectric properties of carbon nanotubes/ethylene-octene copolymer composites combined in a thermopile 34
- Flexible microstrip antenna based on graphene/styrene-isoprene-styrene copolymer composite thin layer deposited on PET substrate for VOC detection 42
- Permeation of VOC vapours through carbon nanotube network membranes controlled electrically 48
- Morphological analysis of supported lipid bilayers modified by plasma-activated medium and hydrogen peroxide using high-speed atomic force microscopy 55
- Molecular vibrational imaging of biological cells modified by atmospheric pressure plasma activated species 60
- Surface modifications of PET fibers 67
- Plasma deposited carbon nanowalls for detection of organic vapours 68
- Antibacterial surface on polyurethane sheets by Ag/ZnO nanoparticles 69
