List of Greek Symbols vii

Preface to the Second Edition viii

Acknowledgments xi

About the Authors xii

1. **The "Rules of the Game"** 1
   - 1.1 Exploratory Studies 1
   - 1.2 Hypothesis Formulation 5
   - 1.3 The Null Hypothesis 6
   - 1.4 Design 6
   - 1.5 The Statistical Test 7
   - 1.6 Effect Sizes: Critical, True, and Estimated 9
   - 1.7 Power 12
   - References 20

2. **General Concepts** 22
   - 2.1 Introduction to the Power Table 25
   - 2.2 Statistical Considerations 28
   - References 29

3. **The Pivotal Case: Intraclass Correlation** 30
   - 3.1 An Intraclass Correlation Test 30
   - 3.2 The ANOVA Approach to Intraclass Correlation Test 32
   - 3.3 Normal Approximation to the Intraclass Theory 32
   - 3.4 Noncentral t 33
   - 3.5 Variance Ratios 33
   - 3.6 Discussion 34
   - References 34

4. **Equality of Means: z- and t-tests, Balanced ANOVA** 35
   - 4.1 Single-Sample Test, Variance Known: z-test 35
   - 4.2 Single-Sample t-test 40
   - 4.3 Two-Sample t-test 41
   - 4.4 An Exercise in Planning 43

4.5 Controversial Issues 54
4.6 Balanced Analysis of Variance (ANOVA) 59
4.7 Discussion 60
References 61

5. Correlation Coefficients 62
5.1 Intraclass Correlation Coefficient 62
5.2 Product-Moment Correlation Coefficient 65
5.3 Rank Correlation Coefficients 67
5.4 You Study What You Measure! 69
References 72

6. Linear Regression Analysis 73
6.1 Simple Linear Regression 74
6.2 Experimental Design: Choosing the X-values 76
6.3 A Simple Linear Moderation Example 78
6.4 Problems: Collinearity and Interactions 81
6.5 Multiple Linear Regression 83
References 85

7. Homogeneity of Variance Tests 86
7.1 Two Independent Samples 86
7.2 Matched Samples 88
References 90

8. Binomial Tests 91
8.1 Single-Sample Binomial Tests 91
8.2 Two-Sample Binomial Tests 94
References 97

9. Contingency Table Analysis 98
9.1 The I by J χ^2-test 99
9.2 An Example of a 3 by 2 Contingency Table Analysis 101
References 103

10. Wrap-Up **104**
Step 1: Exploration, Hypothesis Generation 105
Step 2: Design of a Hypothesis-Testing Study 107
Step 3: A Pilot Study? 108
Step 4: Doing the Proposed Hypothesis-Testing Study With Fidelity 109
Step 5: Independent Confirmation/Replication (Meta-Analysis) 110
References 111

Summary Table **112**

Master Table **116**

References **129**

Index **132**
