

TABLE OF CONTENTS

Preface

About the Czech Republic and Institute of Physics ASCR	p. 04
---	-------

Oral presentations

Diamond thin films and silicon nanocomposites for optical and electronical applications Katerina Dohnalova et al., <i>Institute of Physics, Academy of Sciences of the Czech Republic, Cukrovarnicka 10, Prague 6, Czech Republic</i>	p. 06
Theoretical simulations of nanoscale Pavel Jelinek et al., <i>Institute of Physics, Academy of Sciences of the Czech Republic, Cukrovarnicka 10, Prague 6, Czech Republic</i>	p. 13
CEA-LIST diamond sensors lab activities: focus on bioelectronics applications Philippe Bergonzo et al., <i>CEA-LIST (Recherche Technologique), CEA-Saclay, 91191 Gif sur Yvette, France</i>	p. 20
Diamond nucleation and growth Alexander Kromka et al., <i>Institute of Physics, Academy of Sciences of the Czech Republic, Cukrovarnicka 10, Prague 6, Czech Republic</i>	p. 29
Polypyrrole-diamond nanosystem synthesis and properties Jan Cermak et al., <i>Institute of Physics, Academy of Sciences of the Czech Republic, Cukrovarnicka 10, Prague 6, Czech Republic</i>	p. 33
Controlled arrangement of cells and proteins on diamond Bohuslav Rezek et al., <i>Institute of Physics, Academy of Sciences of the Czech Republic, Cukrovarnicka 10, Prague 6, Czech Republic</i>	p. 37
Diamond nanoparticles: surface functionalisation and nanoseeding Alain Girard et al., <i>CEA-LIST (Recherche Technologique), CEA-Saclay, 91191 Gif sur Yvette, France</i>	p. 42
Optical char. and amine functionalization of diamond Zdenek Remes et al., <i>Institute of Physics, Academy of Sciences of the Czech Republic, Cukrovarnicka 10, Prague 6, Czech Republic</i>	p. 46
Ultrafast optical spectroscopy of diamond Petr Maly et al., <i>Faculty of Mathematics and Physics, Charles University, Prague, Ke Karlovu 3, 121 16 Prague 2, Czech Republic</i>	p. 48
Selective growth of metallic structures on surfaces pre-patterned by AFM and FIB Tomas Sikola et al., <i>Faculty of Mechanical Engineering, Brno University of Technology, Technická 2, 616 96 Brno, Czech Republic</i>	p. 53
Diamond based SAW sensor devices for gas sensing Emmanuel Scorsonne et al., <i>CEA-LIST (Recherche Technologique), CEA-Saclay, 91191 Gif sur Yvette, France</i>	p. 58
Realisation of diamond MEMS for bio-chemical sensing Alexandre Bongrain et al., <i>CEA-LIST (Recherche Technologique), CEA-Saclay, 91191 Gif sur Yvette, France</i>	p. 62
Metal-insulator transition and weak localization in nanocrystalline diamond Jiri Mares et al., <i>Institute of Physics, Academy of Sciences of the Czech Republic, Cukrovarnicka 10, Prague 6, Czech Republic</i>	p. 62
Effect of N on the diamond (100) growth mechanism Karin Larsson, <i>Department of Materials Chemistry, Ångström Laboratory, Uppsala University, Lägerhyddsvägen 1, 75121 Uppsala, Sweden</i>	p. 69

Poster presentations

- Special optical methods for investigation of CVD diamond thin films and micro-structures** p. 72
 Zdeněk Remeš et al., *Institute of Physics, Academy of Sciences of the Czech Republic, Cukrovarnicka 10, Prague 6, Czech Republic*
- Directly grown nanocrystalline diamond field-effect transistor microstructures** p. 73
 Halyna Kozak et al., *Institute of Physics, Academy of Sciences of the Czech Republic, Cukrovarnicka 10, Prague 6, Czech Republic*
- Gas sensing properties of nanocrystalline diamond films** p. 74
 Marina Davydova et al., *Institute of Physics, Academy of Sciences of the Czech Republic, Cukrovarnicka 10, Prague 6, Czech Republic*
- Reactive ion etching of diamond thin films and realization of nanostructures** p. 75
 Oleg Babchenko et al., *Institute of Physics, Academy of Sciences of the Czech Republic, Cukrovarnicka 10, Prague 6, Czech Republic*
- Novel plasma treatment of diamond surfaces** p. 76
 Neda Neykova et al., *Institute of Physics, Academy of Sciences of the Czech Republic, Cukrovarnicka 10, Prague 6, Czech Republic*
- Nanocrystalline Diamond Thin Films - Step Ahead in Material Science** p. 77
 Alexander Kromka et al., *Institute of Physics, Academy of Sciences of the Czech Republic, Cukrovarnicka 10, Prague 6, Czech Republic*
- Novel use of silicon nanocrystals and nanodiamond in cell biology** p. 78
 Anna Fučíková et al., *Faculty of Mathematics and Physics, Ke Karlovu 3, 121 16 Prague 2, Czech Republic*
- Selective osteoblastic cell micro-arrays on diamond films** p. 79
 Bohuslav Rezek et al., *Institute of Physics, Academy of Sciences of the Czech Republic, Cukrovarnicka 10, Prague 6, Czech Republic*
- Optoelectronic properties of polypyrrole-diamond nanostructures** p. 80
 Jan Čermák et al., *Institute of Physics, Academy of Sciences of the Czech Republic, Cukrovarnicka 10, Prague 6, Czech Republic*
- Different adhesion of osteoblast-like cells to hydrophilic and hydrophobic nanocrystalline diamond** p. 81
 Egor Ukraintsev et al., *Institute of Physics, Academy of Sciences of the Czech Republic, Cukrovarnicka 10, Prague 6, Czech Republic*
- Influence of adsorbed proteins and osteoblastic cells on diamond solution-gated field-effect transistor characteristics** p. 82
 Bohuslav Rezek et al., *Institute of Physics, Academy of Sciences of the Czech Republic, Cukrovarnicka 10, Prague 6, Czech Republic*
- AFM induced electrostatic charging of nanocrystalline diamond on silicon** p. 83
 Elisseos Verveniotis et al., *Institute of Physics, Academy of Sciences of the Czech Republic, Cukrovarnicka 10, Prague 6, Czech Republic*
