1 Introduction to the chemistry, synthesis, manufacture and characterization of epoxy resins	1
B. ELLIS	
1.1 Epoxy resins	1
1.2 The chemistry of the epoxy group	7
1.3 The synthesis and manufacture of epoxy resins	14
1.3.1 Synthesis of epoxy compounds	14
1.3.2 Epoxy resins manufactured from epichlorohydrin	16
1.3.3 Oxidation of unsaturated compounds	26
1.4 Characterization of uncured epoxy resins	29
1.4.1 Chemical analysis	29
1.4.2 Quantitative analysis	30
1.4.3 Molecular structure	32
1.4.4 Physical properties	33
References	35
2 Curing agents for epoxy resins	37
W.R. ASHCROFT	
2.1 Introduction	37
2.2 Nitrogen-containing curing agents	38
2.2.1 Aliphatic amines and derivatives	38
2.2.2 Cycloaliphatic polyamines and derivatives	51
2.2.3 Aromatic polyamines and derivatives	54
2.2.4 Catalysts and co-curing agents	56
2.2.5 Hydrazine and hydrazides	60
2.3 Oxygen-containing curing agents	60
2.3.1 Carboxylic acids and anhydrides	60
2.3.2 Phenol formaldehyde resins	65
2.3.3 Amino formaldehyde resins	66
2.4 Sulphur-containing curing agents	67
2.4.1 Polysulphides	68
2.4.2 Polymercaptans	68
2.5 Miscellaneous curing agent types	68
2.5.1 Amine-boron trihalide complexes	68
2.5.2 Quaternary phosphonium salts	69
2.5.3 Cationic salts	69
2.6 Summary	70
References	70
3 The kinetics of cure and network formation	72
B. ELLIS	
3.1 Cure of epoxy resins	72
3.2 Gelation, network structure and glass transition temperature	74

3.2.1	Branching theory	75
3.2.2	The glass transition	81
3.3	Techniques for monitoring cure	83
3.3.1	Monitoring cure	83
3.3.2	Direct assay of the concentration of reactive groups	84
3.3.3	Thermal analysis	86
3.3.4	Rheological changes during cure	87
3.4	Kinetics of cure	89
3.4.1	Introduction	89
3.4.2	Amine-curing agents	90
3.4.3	Carboxylic acid anhydrides	98
3.4.4	Diffusion control	99
3.5	Effect of cure on mechanical and related properties	102
3.5.1	Introduction	102
3.5.2	Glassy moduli	104
3.5.3	Stress-strain curves and visco-elastic behaviour	106
3.5.4	Visco-elastic properties	109
3.5.5	Physical ageing	110
	References	113
4	Additives and modifiers for epoxy resins	117
	S.J. SHAW	
4.1	Introduction	117
4.2	Diluents	117
4.2.1	Non-reactive diluents	118
4.2.2	Reactive diluents	118
4.3	Fillers	120
4.3.1	Physical/mechanical properties	121
4.3.2	Thermal characteristics	122
4.3.3	Shrinkage	124
4.3.4	Electrical conductivity	124
4.3.5	Viscosity	124
4.3.6	Toughness	125
4.4	Resinous modifiers	126
4.5	Flexibilisers/plasticising additives	128
4.5.1	Plasticisers	128
4.5.2	Reactive flexibilising additives	128
4.6	Elastomeric modification	131
4.6.1	Types of elastomeric modifiers	131
4.6.2	Compatibility and morphology	132
4.6.3	Toughening mechanisms	137
4.6.4	The hybrid modification approach	138
4.7	Thermoplastic modification	138
4.8	Miscellaneous additives	140
	References	142
5	Fracture behaviour of epoxy resins	144
