

Brief Contents

A Note to the Student: Why I Wrote This Book	xxiii
Acknowledgments	xxv
And Now, About the Sixth Edition	xxvii
About the Author	xxix

PART I

Yippee! I'm in Statistics	1
1. Statistics or Sadistics? It's Up to You	5

PART II

Sigma Freud and Descriptive Statistics	19
2. Means to an End: Computing and Understanding Averages	21
3. Vive la Différence: Understanding Variability	43
4. A Picture Really Is Worth a Thousand Words	59
5. Ice Cream and Crime: Computing Correlation Coefficients	81
6. Just the Truth: An Introduction to Understanding Reliability and Validity	109

PART III

Taking Chances for Fun and Profit	131
7. Hypotheticals and You: Testing Your Questions	133
8. Are Your Curves Normal? Probability and Why It Counts	149

PART IV

Significantly Different: Using Inferential Statistics	175
9. Significantly Significant: What It Means for You and Me	177
10. Only the Lonely: The One-Sample Z-Test	197

11. t (ea) for Two: Tests Between the Means of Different Groups	211
12. t (ea) for Two (Again): Tests Between the Means of Related Groups	229
13. Two Groups Too Many? Try Analysis of Variance	243
14. Two Too Many Factors: Factorial Analysis of Variance—A Brief Introduction	261
15. Cousins or Just Good Friends? Testing Relationships Using the Correlation Coefficient	277
16. Predicting Who'll Win the Super Bowl: Using Linear Regression	291

PART V

More Statistics! More Tools! More Fun! 313

17. What to Do When You're Not Normal: Chi-Square and Some Other Nonparametric Tests	315
18. Some Other (Important) Statistical Procedures You Should Know About	333
19. Data Mining: An Introduction to Getting the Most Out of Your BIG Data	341
20. A Statistical Software Sampler	355

PART VI

Ten Things (Times Two) You'll Want to Know and Remember 365

21. The 10 (or More) Best (and Most Fun) Internet Sites for Statistics Stuff	367
22. The Ten Commandments of Data Collection	373

Appendix A: SPSS in Less Than 30 Minutes 377

Appendix B: Tables 399

Appendix C: Data Sets 413

Appendix D: Answers to Practice Questions 455

Appendix E: Math: Just the Basics 495

Appendix F: The Reward: The Brownie Recipe 501

Glossary 503

Index 511

Detailed Contents

A Note to the Student: Why I Wrote This Book	xxiii
Acknowledgments	xxv
And Now, About the Sixth Edition	xxvii
About the Author	xxix

PART I

Yippee! I'm in Statistics	1
1. Statistics or Sadistics? It's Up to You	5
What You Will Learn in This Chapter	5
Why Statistics?	5
And Why SPSS?	6
A 5-Minute History of Statistics	6
Statistics: What It Is (and Isn't)	8
What Are Descriptive Statistics?	8
What Are Inferential Statistics?	9
In Other Words . . .	10
What Am I Doing in a Statistics Class?	10
Ten Ways to Use This Book (and Learn Statistics at the Same Time!)	12
About Those Icons	14
Key to Difficulty Icons	15
Glossary	15
Real-World Stats	16
Summary	16
Time to Practice	16

PART II

Sigma Freud and Descriptive Statistics	19
2. Means to an End: Computing and Understanding Averages	21
What You Will Learn in This Chapter	21
Computing the Mean	22
Computing a Weighted Mean	24

Computing the Median	26
Computing the Mode	29
Apple Pie à la Bimodal	30
When to Use What Measure of Central Tendency (and All You Need to Know About Scales of Measurement for Now)	31
A Rose by Any Other Name: The Nominal Level of Measurement	32
Any Order Is Fine With Me: The Ordinal Level of Measurement	32
1 + 1 = 2: The Interval Level of Measurement	32
Can Anyone Have Nothing of Anything? The Ratio Level of Measurement	33
In Sum . . .	33
Using the Computer to Compute Descriptive Statistics	34
The SPSS Output	36
Real-World Stats	37
Summary	38
Time to Practice	38
 3. Vive la Différence: Understanding Variability	43
What You Will Learn in This Chapter	43
Why Understanding Variability Is Important	43
Computing the Range	45
Computing the Standard Deviation	46
Why $n - 1$? What's Wrong With Just n ?	48
What's the Big Deal?	50
Computing the Variance	50
The Standard Deviation Versus the Variance	51
Using the Computer to Compute Measures of Variability	52
The SPSS Output	52
More SPSS Output	53
Real-World Stats	54
Summary	55
Time to Practice	55
 4. A Picture Really Is Worth a Thousand Words	59
What You Will Learn in This Chapter	59
Why Illustrate Data?	59
Ten Ways to a Great Figure (Eat Less and Exercise More?)	60
First Things First: Creating a Frequency Distribution	60
The Classiest of Intervals	61
The Plot Thickens: Creating a Histogram	63
The Tallyho Method	64
The Next Step: A Frequency Polygon	66
Cumulating Frequencies	67

Other Cool Ways to Chart Data	68
Bar Charts	69
Column Charts	70
Line Charts	70
Pie Charts	70
Using the Computer (SPSS, That Is) to Illustrate Data	71
Creating a Histogram	72
Creating a Bar Graph	73
Creating a Line Graph	75
Creating a Pie Chart	76
Real-World Stats	76
Summary	77
Time to Practice	77
5. Ice Cream and Crime: Computing Correlation Coefficients	81
What You Will Learn in This Chapter	81
What Are Correlations All About?	81
Types of Correlation Coefficients:	
Flavor 1 and Flavor 2	82
Computing a Simple Correlation Coefficient	84
A Visual Picture of a Correlation:	
The Scatterplot	87
Bunches of Correlations: The Correlation Matrix	91
Understanding What the Correlation	
Coefficient Means	92
Using-Your-Thumb (or Eyeball) Method	92
A Determined Effort: Squaring the Correlation Coefficient	92
As More Ice Cream Is Eaten . . . the Crime	
Rate Goes Up (or Association vs. Causality)	94
Using SPSS to Compute a Correlation Coefficient	95
Creating a Scatterplot (or Scattergram or Whatever)	97
Other Cool Correlations	98
Parting Ways: A Bit About Partial Correlation	98
Using SPSS to Compute Partial Correlations	101
Real-World Stats	102
Summary	103
Time to Practice	103
6. Just the Truth: An Introduction to Understanding Reliability and Validity	109
What You Will Learn in This Chapter	109
An Introduction to Reliability and Validity	109
What's Up With This Measurement Stuff?	110

Reliability: Doing It Again Until You Get It Right	111
Test Scores: Truth or Dare?	112
Observed Score = True Score + Error Score	112
Different Types of Reliability	113
Test-Retest Reliability	114
Parallel Forms Reliability	115
Internal Consistency Reliability	116
Interrater Reliability	120
How Big Is Big? Finally: Interpreting Reliability	
Coefficients	121
And If You Can't Establish Reliability . . .	
Then What?	122
Just One More Thing	122
Validity: Whoa! What Is the Truth?	123
Different Types of Validity	123
Content Validity	123
Criterion Validity	124
Construct Validity	125
And If You Can't Establish Validity . . .	
Then What?	126
A Last Friendly Word	126
Validity and Reliability: Really Close Cousins	127
Real-World Stats	128
Summary	129
Time to Practice	129

PART III

Taking Chances for Fun and Profit	131
7. Hypotheticals and You: Testing Your Questions	133
What You Will Learn in This Chapter	133
So You Want to Be a Scientist . . .	133
Samples and Populations	134
The Null Hypothesis	135
The Purposes of the Null Hypothesis	136
The Research Hypothesis	137
The Nondirectional Research Hypothesis	138
The Directional Research Hypothesis	139
Some Differences Between the Null	
Hypothesis and the Research	
Hypothesis	141
What Makes a Good Hypothesis?	142
Real-World Stats	144
Summary	145
Time to Practice	146

8. Are Your Curves Normal? Probability and Why It Counts	149
What You Will Learn in This Chapter	149
Why Probability?	149
The Normal Curve (a.k.a. the Bell-Shaped Curve)	150
Hey, That's Not Normal!	151
More Normal Curve 101	152
Our Favorite Standard Score: The z Score	156
What z Scores Represent	159
What z Scores Really Represent	163
Hypothesis Testing and z Scores:	
The First Step	164
Using SPSS to Compute z Scores	165
Fat and Skinny Frequency Distributions	166
Average Value	166
Variability	167
Skewness	167
Kurtosis	168
Real-World Stats	170
Summary	171
Time to Practice	171

PART IV

Significantly Different: Using Inferential Statistics **175**

9. Significantly Significant: What It Means for You and Me	177
What You Will Learn in This Chapter	177
The Concept of Significance	177
If Only We Were Perfect	178
The World's Most Important Table	
(for This Semester Only)	180
More About Table 9.1	181
Back to Type I Errors	182
Significance Versus Meaningfulness	184
An Introduction to Inferential Statistics	186
How Inference Works	187
How to Select What Test to Use	187
Here's How to Use the Chart	188
An Introduction to Tests of Significance	188
How a Test of Significance Works: The Plan	190
Here's the Picture That's Worth a	
Thousand Words	191
Be Even More Confident	192
Real-World Stats	194

Summary	195
Time to Practice	195
10. Only the Lonely: The One-Sample Z-Test	197
What You Will Learn in This Chapter	197
Introduction to the One-Sample Z-Test	197
The Path to Wisdom and Knowledge	198
Computing the Z-Test Statistic	198
So How Do I Interpret $z = 2.38, p < .05$?	203
Using SPSS to Perform a Z-Test	203
Special Effects: Are Those Differences for Real?	205
Understanding Effect Size	206
Real-World Stats	207
Summary	207
Time to Practice	208
11. $t(ea)$ for Two: Tests Between the Means of Different Groups	211
What You Will Learn in This Chapter	211
Introduction to the t -Test for Independent Samples	211
The Path to Wisdom and Knowledge	212
Computing the t -Test Statistic	214
Time for an Example	214
So How Do I Interpret $t_{(58)} = -0.14, p > .05$?	218
The Effect Size and $t(ea)$ for Two	218
Computing and Understanding the Effect Size	219
Two Very Cool Effect Size Calculators	220
Using SPSS to Perform a t -Test	221
Real-World Stats	223
Summary	224
Time to Practice	224
12. $t(ea)$ for Two (Again): Tests Between the Means of Related Groups	229
What You Will Learn in This Chapter	229
Introduction to the t -Test for Dependent Samples	229
The Path to Wisdom and Knowledge	230
Computing the t -Test Statistic	232
So How Do I Interpret $t_{(24)} = 2.45, p < .05$?	235
Using SPSS to Perform a t -Test	235
The Effect Size for $t(ea)$ for Two (Again)	239
Real-World Stats	239
Summary	240
Time to Practice	240
13. Two Groups Too Many? Try Analysis of Variance	243
What You Will Learn in This Chapter	243
Introduction to Analysis of Variance	243
The Path to Wisdom and Knowledge	244

Different Flavors of ANOVA	244
Computing the F -Test Statistic	247
So How Do I Interpret $F_{(2, 27)} = 8.80, p < .05$?	253
Using SPSS to Compute the F Ratio	254
The Effect Size for One-Way ANOVA	257
Real-World Stats	258
Summary	259
Time to Practice	259
14. Two Too Many Factors: Factorial Analysis of Variance—A Brief Introduction	261
What You Will Learn in This Chapter	261
Introduction to Factorial Analysis of Variance	261
The Path to Wisdom and Knowledge	262
A New Flavor of ANOVA	264
The Main Event: Main Effects in Factorial ANOVA	265
Even More Interesting: Interaction Effects	266
Using SPSS to Compute the F Ratio	268
Computing the Effect Size for Factorial ANOVA	273
Real-World Stats	274
Summary	274
Time to Practice	274
15. Cousins or Just Good Friends? Testing Relationships Using the Correlation Coefficient	277
What You Will Learn in This Chapter	277
Introduction to Testing the Correlation Coefficient	277
The Path to Wisdom and Knowledge	278
Computing the Test Statistic	278
So How Do I Interpret $r_{(28)} = .437, p < .05$?	283
Causes and Associations (Again!)	283
Significance Versus Meaningfulness (Again, Again!)	284
Using SPSS to Compute a Correlation Coefficient (Again)	284
Real-World Stats	286
Summary	287
Time to Practice	287
16. Predicting Who'll Win the Super Bowl: Using Linear Regression	291
What You Will Learn in This Chapter	291
Introduction to Linear Regression	291
What Is Prediction All About?	292
The Logic of Prediction	293
Drawing the World's Best Line (for Your Data)	297
How Good Is Your Prediction?	300
Using SPSS to Compute the Regression Line	301

The More Predictors the Better? Maybe	305
The Big Rule(s) When It Comes to Using Multiple Predictor Variables	306
Real-World Stats	307
Summary	308
Time to Practice	308

PART V

More Statistics! More Tools! More Fun!	313
---	------------

17. What to Do When You're Not Normal: Chi-Square and Some Other Nonparametric Tests	315
What You Will Learn in This Chapter	315
Introduction to Nonparametric Statistics	315
Introduction to the Goodness of Fit (One-Sample) Chi-Square	316
Computing the Goodness of Fit Chi-Square Test Statistic	317
So How Do I Interpret $\chi^2_{(2)} = 20.6, p < .05$?	320
Introduction to the Test of Independence Chi-Square	321
Computing the Test of Independence Chi-Square Test Statistic	321
Using SPSS to Perform Chi-Square Tests	323
Goodness of Fit and SPSS	323
Test of Independence and SPSS	325
Other Nonparametric Tests You Should Know About	327
Real-World Stats	329
Summary	329
Time to Practice	330
18. Some Other (Important) Statistical Procedures You Should Know About	333
What You Will Learn in This Chapter	333
Multivariate Analysis of Variance	333
Repeated Measures Analysis of Variance	334
Analysis of Covariance	335
Multiple Regression	335
Meta-analysis	336
Discriminant Analysis	336
Factor Analysis	337
Path Analysis	338
Structural Equation Modeling	338
Summary	339
19. Data Mining: An Introduction to Getting the Most Out of Your BIG Data	341
What You Will Learn in This Chapter	341
Our Sample Data Set—Who Doesn't Love Babies?	343

Counting Outcomes	345
Counting With Frequencies	345
Pivot Tables and Cross-Tabulation: Finding Hidden Patterns	349
Creating a Pivot Table	349
Modifying a Pivot Table	351
Summary	354
Time to Practice	354
20. A Statistical Software Sampler	355
What You Will Learn in This Chapter	355
Selecting the Perfect Statistics Software	355
What's Out There	358
First, the Free Stuff	358
Time to Pay	360
Summary	363

PART VI

Ten Things (Times Two) You'll Want to Know and Remember	365
21. The Ten (or More) Best (and Most Fun) Internet Sites for Statistics Stuff	367
What You Will Learn in This Chapter	367
How About Studying Statistics in Stockholm?	367
Who's Who and What's Happened?	368
It's All Here	368
HyperStat	368
Data? You Want Data?	370
More and More Resources	370
Online Statistical Teaching Materials	371
And, of Course, YouTube . . .	371
And, Finally . . .	371
22. The Ten Commandments of Data Collection	373
Appendix A: SPSS Statistics in Less Than 30 Minutes	377
Appendix B: Tables	399
Appendix C: Data Sets	413
Appendix D: Answers to Practice Questions	455
Appendix E: Math: Just the Basics	495
Appendix F: The Reward: The Brownie Recipe	501
Glossary	503
Index	511

Archeologists dig up the first edition of *Statistics for People Who (Think They) Hate Statistics*.
