

## Lecture Notes in Mathematics

This series reports on new developments in mathematical research and teaching - quickly, informally and at a high level. The type of material considered for publication includes

1. Research monographs
2. Lectures on a new field or presentations of a new angle in a classical field
3. Summer schools and intensive courses on topics of current research.

Texts that are out of print but still in demand may also be considered.

The timeliness of a manuscript is sometimes more important than its form, which may in such cases be preliminary or tentative.

Details of the editorial policy and how to submit can be found at [www.springer.com/series/304](http://www.springer.com/series/304). We recommend contacting the publisher or the series editors at an early stage of your project.

Manuscripts should be prepared according to Springer-Verlag's standard specifications. LaTeX style files may be found at [www.springer.com](http://www.springer.com) > Authors > Author Guidelines.

# CONTENTS

H.L. Bentley	
A note on the homology of regular nearness spaces	1
R. Betti and R.F.C. Walters	
The symmetry of the Cauchy-completion of a category	8
F. Borceux	
On algebraic localizations	13
D. Bourn	
A canonical action on indexed limits. An application to coherent homotopy	23
H. Brandenburg and M. Hušek	
A remark on cartesian closedness	33
R. Brown and P.J. Higgins	
Crossed complexes and non-abelian extensions	39
Y. Diers	
Un critère de représentabilité par sections continues de faisceaux	51
A. Frei	
Kan extensions and systems of imprimitivity	62
A. Frölicher	
Smooth structures	69
J.W. Gray	
Enriched algebras, spectra and homotopy limits	82
G. Greve	
General construction of monoidal closed structures in topological, uniform and nearness spaces	100

P.J. Higgins and J. Taylor	
The fundamental groupoid and the homotopy crossed complex of an orbit space	115
R.-E. Hoffmann	
Minimal topological completion of $\mathbb{K}^{Ban_1} \longrightarrow \mathbb{K}^{Vec}$	123
M. Höppner	
On the freeness of Whitehead-diagrams	133
M. Hušek	
Applications of category theory to uniform structures	138
S. Kaijser and W. Pelletier	
A categorical framework for interpolation theory	145
J. Lambek	
Toposes are monadic over categories	153
J. MacDonald and A. Stone	
Essentially monadic adjunctions	167
J. MacDonald and W. Tholen	
Decomposition of morphisms into infinitely many factors	175
L. Márki and R. Wiegandt	
Remarks on radicals in categories	190
A. Melton and G.E. Strecker	
On the structure of factorization structures	197
A. Mysior	
A remark on scattered spaces	209
L.D. Nel	
Bornological $L_1$ -functors as Kan extensions and Riesz-like representations	213

S.B. Niefield	
Exactness and projectivity	221
M. Pfender, R. Reiter, and M. Sartorius	
Constructive arithmetics	228
H.-E. Porst	
Adjoint diagonals for topological completions	237
T. Porter	
Internal categories and crossed modules	249
A. Pultr	
Subdirect irreducibility and congruences	256
G. Richter	
Algebraic categories of topological spaces	263
T. Spircu	
Extensions of a theorem of P. Gabriel	272
R. Street	
Characterization of bicategories of stacks	282
W. Sydow	
On hom-functors and tensor products of topological vector spaces	292
V. Trnková	
Unnatural isomorphisms of products in a category	302
A. Wiweger	
Categories of kits, coloured graphs, and games	312
