Woodhead Publishing Series in Textiles	xv
1 Introduction	1
<i>M. Afshari</i>	
1.1 Part I: The electrospinning process	2
1.2 Part II: Structure and property characterization, testing, and modeling of electrospun nanofibers	3
1.3 Part III: Electrospinning for particular fiber types and applications	5
1.4 Conclusion	8
References	8
Section One The electrospinning process	9
2 Melt-electrospinning of nanofibers	11
<i>R. Nayak, R. Padhye, L. Arnold</i>	
2.1 Introduction	11
2.2 Melt-electrospinning process	12
2.3 Characterization of melt-electrospun nanofibers	28
2.4 Applications of melt-electrospun nanofibers	32
2.5 Conclusion and future trends	36
References	36
3 Coaxial electrospinning of nanofibers	41
<i>X. Qin</i>	
3.1 Introduction of coaxial electrospinning	41
3.2 Nature of the coaxial electrospinning process—experimental observations and theoretical analysis	42
3.3 Effects of operating parameters on coaxial electrospinning	50
3.4 Applications of electrospun nanofibers	53
3.5 Conclusion	63
References	63
4 Solution electrospinning of nanofibers	73
<i>C. Salas</i>	
4.1 Introduction	73
4.2 Solution electrospinning versus other electrospinning techniques	73

4.3	Parameters that affect solution electrospinning	75
4.4	Equipment for solution electrospinning	86
4.5	Solution electrospinning of synthetic soluble polymers	97
4.6	Solution electrospinning of natural polymers	102
4.7	Highlights and concluding remarks	104
	References	104
5	Controlling nanofiber morphology by the electrospinning process	109
	<i>R. Khajavi, M. Abbasipour</i>	
5.1	Introduction	109
5.2	Solution parameters	110
5.3	Processing parameters	116
5.4	Ambient conditions	118
5.5	Conclusion	120
	References	120
6	Improving fiber alignment during electrospinning	125
	<i>H. Yuan, Q. Zhou, Y. Zhang</i>	
6.1	Introduction	125
6.2	Aligned fiber fabrication based on the unstable/whipping jet	126
6.3	Aligned fiber fabrication based on the stable jet	135
6.4	Conclusions and challenges	141
	References	143
	Section Two Structure and property characterization testing and modeling of electrospun nanofibers	149
7	Geometrical characterization of electrospun nanofibers	151
	<i>D. Semnani</i>	
7.1	Introduction	151
7.2	Geometrical parameters in electrospun nanofibers	152
7.3	Physical and experimental methods in geometrical characterization for electrospun nanofibers	159
7.4	Imaging systems and applications in geometrical characterization	164
7.5	Image processing methods in nanofiber characterization	169
7.6	Serious problems in geometrical characterization of nanofibrous materials	176
7.7	Future trends	178
	References	179
8	Chemical characterization of electrospun nanofibers	181
	<i>J. Zhu, S. Jasper, X. Zhang</i>	
8.1	A brief introduction of material types	181
8.2	Chemical characterization of electrospun polymer nanofibers	181
8.3	Chemical characterization of electrospun metal (oxide) nanofibers	185

8.4	Chemical characterization of electrospun carbon nanofibers	192
8.5	Chemical characterization of electrospun composite nanofibers	196
8.6	Conclusions	202
	References	203
9	Physical characterization of electrospun nanofibers	207
	<i>J. Zhu, Y. Ge, S. Jasper, X. Zhang</i>	
9.1	A brief introduction of electrospun nanofibers	207
9.2	Physical characterization of electrospun polymer nanofibers	208
9.3	Physical characterization of electrospun metal (oxide) nanofibers	212
9.4	Physical characterization of electrospun CNFs	219
9.5	Physical characterization of electrospun composite nanofibers	228
9.6	Conclusions	236
	Reference	236
10	Structure–property relationship of electrospun fibers	239
	<i>S. Ojha</i>	
10.1	Introduction	239
10.2	Ordered structure in nanofibers	239
10.3	Morphology of electrospun fibers	240
10.4	Tensile properties of nanofibers	242
10.5	Effect of fiber diameter	243
10.6	Collection of nanofibers	245
10.7	Filled nanofiber systems	247
10.8	Summary	249
	References	249
11	Molecular modeling and simulations	255
	<i>I. Nezbeda, J. Jirsák, F. Moučka</i>	
11.1	Introductory remarks	255
11.2	Molecular simulations	257
11.3	Selected applications	266
11.4	Conclusions	272
	Acknowledgments	273
	References	273
12	Modeling and simulation of the electrospinning process	277
	<i>M. Yousefzadeh</i>	
12.1	Introduction	277
12.2	Polymer solution properties and external forces in the electrospinning process	277
12.3	Nanofiber formation stages in the electrospinning process	286
12.4	Conclusion/future trends	298
	References	298

13 Modeling performance of electrospun nanofibers and nanofibrous assemblies	303
<i>M. Yousefzadeh, S. Ramakrishna</i>	
13.1 Introduction	303
13.2 Control of nanofiber deposition through electric field modification	304
13.3 Control of nanofiber-ordered deposition through mechanical design	321
References	334
 Section Three Electrospinning for particular fiber types and applications	 339
14 Electrospun TiC/C composite nanofibrous felt and its energy-related applications	341
<i>Y. Zhao, X. Ma, Z. Wang, T. Xu, W. Wu, H. Fong</i>	
14.1 Introduction	341
14.2 Preparation and characterization	343
14.3 Energy-related applications	345
14.4 Concluding remarks	363
Acknowledgments	364
References	364
 15 Electrospun chitosan fibers	371
<i>C. Salas, Z. Thompson, N. Bhattarai</i>	
15.1 Introduction	371
15.2 Solution properties for electrospinning of chitosan	371
15.3 Electrospun chitosan fibers	375
15.4 Electrospun hybrid chitosan fibers	385
15.5 Thermal and mechanical properties of electrospun chitosan fibers	387
15.6 Applications of electrospun chitosan fibers	389
15.7 Outlook and concluding remarks	393
References	394
 16 Electrospinning of patterned and 3D nanofibers	399
<i>R.K. Srivastava</i>	
16.1 Techniques to fabricate nanofibers	401
16.2 Electrospinning for fabrication of nanofibrous morphologies	406
16.3 Variety of patterned and 3D nanofibers obtained via electrospinning	408
16.4 Applications of patterned and 3D nanofibers and future growth	438
References	439
 17 Electrospun nanofibers for filtration applications	449
<i>X. Qin, S. Subianto</i>	
17.1 Introduction	449
17.2 Properties and advantages of nanofibrous filtration media	450

17.3	Applications of electrospun nanofibrous filtration media	452
17.4	Perspectives and development	460
	References	462
18	Electrospun conductive nanofibers for electronics	467
	<i>R. Bagherzadeh, M. Gorji, M.S. Sorayani Bafgi, N. Saveh-Shemshaki</i>	
18.1	Introduction	467
18.2	Conducting polymer nanofibers	467
18.3	Carbon structures as conductive nanofiber	481
18.4	Metal nanofiber	482
18.5	Nanoparticle used in conductive nanofiber	483
18.6	Characterization	485
18.7	Application of conductive nanofiber	502
	References	509
19	Electrospun nanofibrous tissue scaffolds	521
	<i>T. Chae, F. Ko</i>	
19.1	Introduction	521
19.2	Electrospun nanofibers for tissue regeneration	523
19.3	Tissue regeneration applications	531
19.4	Summary and future prospects	542
	References	542
20	Electrospun nanofibers with antimicrobial properties	551
	<i>K. Song, Q. Wu, Y. Qi, T. Kärki</i>	
20.1	Introduction	551
20.2	Metallic nanoparticle-based antimicrobial electrospun nanofibers	552
20.3	Carbon nanomaterials-based antimicrobial electrospun nanofibers	559
20.4	Antibiotics-derived antimicrobial electrospun nanofibers	560
20.5	Biopolymers-derived antimicrobial electrospun nanofibers	561
20.6	Conclusions	564
	Acknowledgment	565
	References	565
21	Electrospun nanofibers in protective clothing	571
	<i>M. Gorji, R. Bagherzadeh, H. Fashandi</i>	
21.1	Introduction	571
21.2	Protective clothing: Background and terminology	572
21.3	Methods for nanofiber-based PC evaluation	575
21.4	Electrospun membranes in PC and sportswear applications	578
21.5	Chemical/biological PC applications	581
21.6	Face mask application	584

21.7	Ballistic protection applications	586
21.8	Smart textiles applications	588
21.9	Conclusion	591
	References	592
22	Electrospun polyvinyl alcohol/pectin composite nanofibers	599
	<i>N. Patra, M. Salerno, M. Cernik</i>	
22.1	Introduction	599
22.2	Experimental	600
22.3	Results and discussion	601
22.4	Conclusions	607
	Acknowledgments	607
