How to cite this publication (Example)	ii
Overview of Czech Ecological Research in Antarctica with a special Respect to the James Ross Island (Prošek P., Barták M.)	1
Meteorological measurement and observation at the J. G. Mendel Station, James Ross Island, Antarctica (Láska K., Prošek P.)	5
Glacio-meteorological measurements on two glaciers at the northern part of James Ross Island, Antarctica (Nývlt D., Láska K., Kopačková V., Engel Z.)	7
Pedobiology studies in Hasswell Archipelago, East Antarctica (Negoita T. Gh., Cotta M., Stefanic Gh.)	9
Diversity of microfungi from James Ross Island, Antarctica (Laichmanová M., Selbmann L., Barták M.)	10
Two freshwater filamentous, branched green algae, newly discovered in Antarctica (Caisová L., Komárek J., Elster J., Nedbalová L.)	14
Specificity of cyanobacterial microflora in Antarctica (Komárek J., Komárek O.)	23
Evaluation of nutrient limitation and heavy metal inhibition in Antarctic streams by a miniaturized algal bioassay (Kvíděrová J., Elster J.)	29
Physiological study of Antarctic green algal lichen photobionts: An optimized method of isolation and culturing technique (Váczi P., Barták M.)	30
Lake ecosystems of James Ross Island: short characteristics (Nedbalová L., Elster J., Komárek J., Nývlt D.)	33
Variability of oxygen content in different lakes of the James Ross Island as dependent on actual weather conditions (Váczi P., Barták M.)	35
Biogenic calcite structures in Green Lake, James Ross Island, Antarctica (Elster J., Nedbalová L., Komárek J., Vodrážka R.)	38
Overview of studies on utilization of vascular plants by Antarctic birds at nesting sites (Parnikoza I., Trokhymets V., Smykla J., Kunakh V., Kozeretska I.)	41
Comparative study on utilization of vascular plants by Antarctic birds (Parnikoza I., Trokhymets V., Smykla J., Kunakh V., Kozeretska I.)	43

Long-term study on vegetation responses to manipulated warming using open top chambers installed in three contrasting Antarctic habitats (Barták M., Láska K., Prošek P., Hájek J., Váczi P.)	48
<i>Usnea</i> species biomass evaluation on volcanic mesas at James Ross Island, Antarctica (Bohuslavová O., Elster J., Šmilauer P.)	52
Glycolipid and pigment transformations of <i>Deschampsia antarctica</i> to UV-B irradiation (Taran N., Okanenko A., Svietlova N., Storozhenko V.)	54
Comparative study of dehydration-response curves of photosynthesis in Antarctic lichen and <i>Nostoc commune</i> (Moudrá A., Barták M.)	59
Isolation and characterization of novel cold-active hydrolases from Antarctic streptomycetes (Cotârlet M., Negoită T., Bahrim G., Stougaard P.)	62
Cryoprotective effects of ribitol on lichen photosynthetic processes (Hájek J., Barták M., Smejkal L., Váczi P.)	67
Reflectometric study of structural and functional characteristics of Antarctic lichens (Gloser J.)	69
Author index	71
