

*"This is a nuanced, original framework for thinking about the state as a highly variable phenomenon of emergent world orders. With its expert selection of readings and comprehensive analysis, this volume is bound to become a standard reference and popular teaching tool."*

**George Marcus,**  
University of California, Irvine

*"The Anthropology of the State will be an important resource for teaching and for introducing students to new questions in anthropology. This collection offers a nice balance of historical and contemporary writings and a lucid introduction that advances theoretical claims about the state with the help of ethnographic examples. Contemporary globalization and transnational systems that are redefining the functions of the state make this an opportune moment for a serious reexamination of the processes of governance."*

**Veena Das,**  
Johns Hopkins University

*The Anthropology of the State* introduces some of the most exciting approaches to the study of the state in a transnational world. This volume is unique in that it stresses the interplay between theory, ethnography, history, and critique. It brings together classic and contemporary theoretical examinations of the state along with cutting-edge ethnographic analyses of specific state practices, institutions, and ideas in diverse geographical locations and historical periods. The articles in this volume are presented for students and scholars in a range of disciplines such as anthropology, sociology, political economy, and postcolonial studies.

**Aradhana Sharma** is Assistant Professor of Anthropology and Feminist, Gender, and Sexuality Studies at Wesleyan University.

**Akhil Gupta** is Associate Professor of Cultural and Social Anthropology at Stanford University.
