

CONTENTS

Introduction	1 The chemical industry	1
Processes	2 Catalysis in industry	11
	3 Chemical reactors	20
	4 Cracking, isomerisation and reforming	26
	5 Distillation	30
	6 Green chemistry	34
	7 Recycling in the chemical industry	41
Materials and Applications	8 Biofuels	44
	9 Biorefineries	50
	10 Biotechnology in the chemical industry	52
	11 Colorants	56
	12 Composites	65
	13 Crop protection chemicals	69
	14 Edible fats and oils	79
	15 Fertilizers	81
	16 Nanomaterials	83
	17 Paints	89
	18 Soaps	94
	19 Surfactants	95
Chemicals	20 Ammonia	102
	21 Benzene	106
	22 Bromine	108
	23 Buta-1,3-diene	109
	24 Calcium carbonate	110
	25 Chlorine	114
	26 Epoxyethane	118
	27 Ethane-1,2-diol	120
	28 Ethanoic acid	121
	29 Ethanol	122
	30 Ethene	124
	31 Fluorine	125
	32 Hydrogen	126
	33 Hydrogen chloride	128
	34 Hydrogen fluoride	129
	35 Hydrogen peroxide	131
	36 Iodine	133
	37 Methanal	135
	38 Methanol	136
	39 Methyl tertiary-butyl ether	138

CONTENTS

Chemicals *continued...*

40 Nitric acid	140
41 Oxygen, nitrogen and the rare gases	142
42 Phenol	147
43 Phosphoric acid	149
44 Phosphorus	151
45 Propanone	154
46 Propene	155
47 Sodium carbonate	156
48 Sodium hydroxide	158
49 Sulfur	160
50 Sulfuric acid	161
51 Titanium dioxide	163
52 Urea	165

Polymers

53 Polymers: an overview	166
54 Degradable plastics	172
55 Methanal plastics	175
56 Polyamides	177
57 Polycarbonates	180
58 Poly(chloroethene)	182
59 Polyesters	184
60 Poly(ethene)	187
61 Poly(methyl 2-methylpropenoate)	191
62 Poly(phenylethene)	193
63 Poly(propene)	195
64 Poly(propenoic acid)	198
65 Poly(propenenitrile)	200
66 Poly(tetrafluoroethene)	202
67 Polyurethanes	204
68 Silicones	209

Metals

69 Aluminium	213
70 Copper	216
71 Iron	221
72 Lead	224
73 Magnesium	227
74 Steel	229
75 Titanium	233
76 Zinc	237

Index

Index	241
