|  |            |
|--|------------|
| <b>Used symbols and nomenclature.....</b>  | <b>5</b>   |
| <b>Introduction.....</b>   | <b>11</b>  |
| <b>1 Metal spinning processes.....</b>   | <b>13</b>  |
| 1.1 Analysis of the metal spinning process.....  | 14         |
| 1.2 Classification of metal spinning methods.....  | 16         |
| 1.2.1 <i>Conventional spinning</i> .....   | 20         |
| 1.2.2 <i>Shear spinning</i> .....  | 22         |
| 1.2.3 <i>Tube spinning</i> .....   | 24         |
| 1.2.4 <i>Special metal spinning methods</i> .....  | 26         |
| <b>2 Mechanism of plastic deformation in the metal spinning.....</b>   | <b>34</b>  |
| 2.1 Strain in the metal spinning process .....   | 35         |
| 2.2 Experimental analysis of strains in conventional spinning.....   | 39         |
| <b>3 Stress generation in the metal spinning process .....</b>   | <b>48</b>  |
| 3.1 Instability in the metal spinning process .....  | 55         |
| 3.2 Tool forces in the metal spinning process .....  | 59         |
| <b>4 Spun part shape and dimensional accuracy.....</b>   | <b>63</b>  |
| 4.1 Analysis of workpiece wall thickness.....  | 63         |
| 4.2 Springback angle evaluation .....  | 66         |
| 4.3 Influence of technological parameters of metal spinning<br>and planar anisotropy of the material on workpiece<br>shape accuracy..... | 70         |
| <b>5 Surface layer integrity of spun parts .....</b>   | <b>76</b>  |
| 5.1 Workpiece surface micro geometry .....   | 76         |
| 5.2 State and degree of residual stress in workpiece.....  | 81         |
| 5.3 Surface layers hardening.....  | 84         |
| <b>6 Research findings .....</b>   | <b>91</b>  |
| <b>Conclusion.....</b>   | <b>92</b>  |
| <b>Summary .....</b>   | <b>93</b>  |
| <b>Literature .....</b>  | <b>94</b>  |
| <b>About the author .....</b>  | <b>104</b> |
| <b>Subject Index .....</b>   | <b>105</b> |
