

Contents

1. Introduction	4
2. Overview of literature	6
3. The decomposition of free energy function	6
4. Experiments and material parameter identification	7
4.1. <i>Isotropic composite materials</i>	7
4.2. <i>Fiber-reinforced composite materials</i>	10
5. Numerical simulations of viscoelastic composites	12
5.1. <i>Isotropic (hyperelastic) rubber-like materials</i>	12
5.2. <i>Fiber-reinforced composites</i>	14
5.3. <i>Viscous responses of internal stress-like and strain-like variables</i>	16
6. Magneto-sensitive elastomer materials	17
6.1. <i>FEM solutions of MS isotropic materials</i>	17
6.2. <i>FEM solutions of MS anisotropic materials</i>	19
7. Conclusions, discussions and future perspectives	22
8. Literatures	23
9. Publications of Author	24
