

CONTENTS

INVITED LECTURES

The Substrate requirements for the next generation power electronics	7
<i>Shin-Ichi Nishizawa</i>	
Reverse Recovery of Diamond p ⁺ in ⁺ diodes	11
<i>Aboulye Traore, Akira Nakajima, Satoshi Yamasaki et al</i>	
Overcoming Switching Limits in Silicon Power MOSFETs with Silicon-Based Solutions	19
<i>Jaume Roig, Frederick Declercq and Filip Bauwens</i>	
Monolithically-Integrated Power Circuits in High-Voltage GaN-on-Si Heterojunction Technology	29
<i>Richard Reiner, Patrick Waltereit, Beatrix Weiss, Stefan Moench, Matthias Wespel, Stefan Müller, Rüdiger Quay and Oliver Ambacher</i>	
IGBT-based Device and Packaging Technologies for Future High Power Applications	39
<i>Arnost Kopta, Munaf Rahimo, Chiara Corvasce, Franc Dugal, Fabian Fischer and Samuel Hartmann</i>	
IGBTs: Recent Developments and Future Perspectives	40
<i>Franz-Josef Niedernostheide, Hans-Joachim Schulze and Thomas Laska</i>	

ORAL PRESENTATIONS

Fast Diode Anode Design Concepts for IGBT Applications	51
<i>Charalampos Papadopoulos, Munaf Rahimo, Chiara Corvasce, Jan Vobecky, Sven Matthias and Arnost Kopta</i>	
Novel Cathode Design to Improve the ESD Capability of 600V Fast Recovery Epitaxial Diodes	57
<i>Luca Maresca, G. De Caro, G. Romano, Michele Riccio, Giovanni Breglio, Andrea Irace, Laura Bellemo, Rossano Carta and Nabil El Baradai</i>	
The HGTD: A SOI Power Diode for Timing Detection Applications	65
<i>Mar Carulla, David Flores, Salvador Hidalgo, David Quirion and Giulio Pellegrini</i>	
Simulation Study on Collector Side Filament Formation at Short-Circuit in IGBTs	70
<i>Riteshkumar Bhojani, Shanmuganathan Palanisamy, Roman Baburske, Hans-Joachim Schulze, Franz-Josef Niedernostheide and Josef Lutz</i>	
Cosmic Ray Withstand Capability of RB-IGBT	77
<i>Daniel Hofmann, K. Mitsuzuka, S. Masuda, S. Yoshiwatari and Masahito Otsuki</i>	
A Snap-Back Free Shorted Anode Super-Junction CIGBT	82
<i>Peng Luo, Mark Sweet and E.M.S. Narayanan</i>	
Modelling of Press-Pack High Power IGBT Modules	87
<i>Hong Yao Long, Mark Sweet, Ekkanath Madathil Sankara Narayanan and Gangru Li</i>	
Impact of Different Packages on Fast Switching Silicon Carbide Bipolar Junction Transistors	92
<i>Christian Bödeker, Melanie Adelmund, Ranbir Singh and Nando Kaminski</i>	
Influence of Temperature on the Pressure Distribution within Press-Pack IGBTs	100
<i>Deng Erping, Zhao Zhibin, Zhang Peng, Huang Yongzhan, Han Ronggang and Lin Zhongkang</i>	
Design Considerations for Charge-Compensated Power MOSFET in the Medium-Voltage Range	107
<i>Ralf Siemienieć, Oliver Blank and Cesar Braz</i>	

A New Vertical JFET Technology for Harsh Radiation Applications	115
<i>Pablo Fernandez-Martinez, David Flores, Salvador Hidalgo, David Quirion, Miguel Ullan and R. Durà</i>	
Analysis of Drain Current Saturation Behaviour in GaN Polarisation Super Junction HFETs	121
<i>Vineet Unni and E.M. Sankara Narayanan</i>	
Monolithic Integration of GaN-based Normally-off P- and N-channel MOSFETs	127
<i>Akira Nakajima, Shunsuke Kubota, Kazuo Tsutsui, Kuniyuki Kakushima, Hitoshi Wakabayashi, Hiroshi Iwai, Sin-Ichi Nishizawa and Hiromichi Ohashi</i>	

VISUAL PRESENTATIONS

Accuracy Improvement of a SiC MPS Diode Electro-Thermal Model	137
<i>Andrii Stefanskyi, Lukasz Starzak and Andrzej Napieralski</i>	
Equivalent Circuit for IGBT Short Circuit During On-State	143
<i>Jan Fuhrmann and Hans-Guenter Eckel</i>	
SiC and Si Diodes in Fast Switching High Voltage Cascades - an Experimental Study	149
<i>Daniel Müller, Lutz Göhler and Henry Güldner</i>	
Engineering Threshold Voltage in p-channel GaN HFETs	155
<i>Ashwani Kumar and Maria Merlyne De Souza</i>	
Parasitic Effects During Turn-on and Turn-off of Silicon Carbon Diodes	160
<i>Christian Bödeker and Nando Kaminski</i>	
Optimised Chip Design for Free Carrier Absorption Experiments Based on the Numerical Analysis of Carrier Profiles	165
<i>Andreas Korzenietz, Frank Hille, Christian Sandow, Franz-Josef Niedernostheide and Gerhard Wachutka</i>	
Alternative Level Shifting Devices for 900V Gate Drivers	171
<i>Ralf Lerner, Andreas Käberlein, Marco Ramsbeck, Daniel Beyer, Heiko Berger, Rocco Holzhey, Ulrich Büttner, Andreas Schrön, Johannes Zimmet and Michael Volk</i>	
High-Speed Switch Based on MOSFETs	177
<i>Václav Papež, Martin Horák and Jiří Hájek</i>	

TUTORIALS

Dynamic Effects and Reliability of Depletion and Enhancement GaN HEMTs for Power Switching Applications	185
<i>Carlo De Santi, Matteo Meneghini, Gaudenzio Meneghesso and Enrico Zanoni</i>	
Silicon Carbide Power Device Technology; Fabrication Issues and State of the Art Devices	192
<i>Mikael Östling</i>	

AUTHOR INDEX	194
