

<i>Foreword by Richard Heinberg</i>	8
<i>Introduction</i>	12
TANTALISING GLIMPSES OF RESILIENCE	

Part One:

THE HEAD

WHY PEAK OIL AND CLIMATE CHANGE MEAN THAT SMALL IS INEVITABLE

<i>Chapter 1</i>	18
------------------	----

PEAK OIL AND CLIMATE CHANGE

The two great oversights of our times

What is Peak Oil? Some key indications that we are nearing the peak. Peak when? Climate change. The greenhouse effect. Is there such a thing as a safe limit? The intertwining of peak oil and climate change. Can peak oil engage people more effectively than climate change?

The contradictions of the Hirsch Report.

<i>Chapter 2</i>	44
------------------	----

THE VIEW FROM THE MOUNTAIN-TOP

Evaluating possible ways forward. Why a future with less energy ends up looking somewhat inevitable. Why 'Energy Descent'?

<i>Chapter 3</i>	54
------------------	----

WHY REBUILDING RESILIENCE IS AS IMPORTANT AS CUTTING CARBON EMISSIONS

What is resilience? The three ingredients of a resilient system. Life before oil wasn't

all bad. The cake analogy. Echoes of a resilient past. Can we learn anything useful from Britain's last 'wartime mobilisation'?

<i>Chapter 4</i>	68
------------------	----

WHY SMALL IS INEVITABLE

Relocalisation. The dangers of clinging to the illusion of large scale. Top-down or bottom-up? Where does government fit in?

SUMMING UP PART ONE	77
----------------------------	----

Part Two:

THE HEART

WHY HAVING A POSITIVE VISION IS CRUCIAL

<i>Chapter 5</i>	80
------------------	----

HOW PEAK OIL AND CLIMATE CHANGE AFFECT US: 'POST-PETROLEUM STRESS DISORDER'

<i>Chapter 6</i>	84
------------------	----

UNDERSTANDING THE PSYCHOLOGY OF CHANGE

An interview with Dr Chris Johnstone. The FRAMES model.

<i>Chapter 7</i>	94
------------------	----

HARNESSING THE POWER OF A POSITIVE VISION

Why visions work. Captain Future – the wizard of science. Visions of abundance.

<i>Chapter 8</i>	104
------------------	-----

A VISION FOR 2030: LOOKING BACK OVER THE TRANSITION

Food and farming. Medicine and health.

Education. Economy. Transport. Energy. Housing.

<i>Chapter 9</i>	122
------------------	-----

KINSALE – A FIRST ATTEMPT AT COMMUNITY VISIONING

The Kinsale Energy Descent Action and how it came about. Four lessons from the Kinsale Project. Reflections on the Kinsale process. What's happening now in Kinsale?

SUMMING UP PART TWO	131
----------------------------	-----

Part Three:

THE HANDS

EXPLORING THE TRANSITION MODEL FOR INSPIRING LOCAL RESILIENCE-BUILDING

<i>Chapter 10</i>	134
-------------------	-----

THE TRANSITION CONCEPT

The philosophical underpinnings. Six principles that underpin the Transition model. The Project Support Project concept. Issues of scale. The interface between Transition Initiatives and local politics.

<i>Chapter 11</i>	146
-------------------	-----

HOW TO START A TRANSITION INITIATIVE

The seven 'Buts'. The Twelve Steps of Transition.

<i>Chapter 12</i>	176
-------------------	-----

THE FIRST YEAR OF TRANSITION TOWN TOTNES

Background and history. Oil vulnerability auditing. Skilling Up for Powerdown.

Contents

Totnes, the nut tree capital of Britain. The Totnes Local Food Directory. The Totnes Pound. Transition Tales. TTT Home Groups.

Chapter 13 202

THE VIRAL SPREAD OF THE TRANSITION CONCEPT

Transition Penwith. Transition Falmouth. Transition Town Lewes. Transition Ottery St Mary. Transition Bristol. Transition Town Brixton. Transition Forest of Dean.

SOME CLOSING THOUGHTS 212

APPENDICES

Appendix 1: The Oil Depletion Questionnaire 214

Appendix 2: John Croft's 'Four stages that any project will go through' 215

Appendix 3: Assignment Sheet – Energy Descent Action Plan 217

Appendix 4: The Energy Descent Action Plan Process 219

Appendix 5: How to become a Transition Initiative 220

Appendix 6: A sample press release 223

Appendix 7: Transition Training 224
