

Contents

<i>Preface</i>	v
<i>Contributors</i>	ix
1 Chemical and Instrumental Approaches for Capillary Electrophoresis (CE)–Fluorescence Analysis of Proteins	1
<i>Isabelle Le Potier, Audrey Boutonnet, Vincent Ecochard, and François Couderc</i>	
2 Discrimination of Glycoproteins from Unglycosylated Proteins in Capillary Electrophoresis: Two-Color LIF Detection Coupled with Post-column Derivatization	11
<i>Takashi Kaneta</i>	
3 Capillary Zone Electrophoresis-Mass Spectrometry of Intact Proteins	25
<i>Elena Domínguez-Vega, Rob Haselberg, and Govert W. Somsen</i>	
4 Screening of Small Intact Proteins by Capillary Electrophoresis Electrospray Ionization-Mass Spectrometry (CE-ESI-MS).....	43
<i>Sabine Neuberger, Angelina Rafai, and Christian Neusiß</i>	
5 Online Capillary IsoElectric Focusing-ElectroSpray Ionization Mass Spectrometry (CIEF-ESI MS) in Glycerol–Water Media for the Separation and Characterization of Hydrophilic and Hydrophobic Proteins	57
<i>Meriem Mokaddem, Fanny d’Orlyé, and Anne Varenne</i>	
6 On-Line Solid-Phase Extraction Capillary Electrophoresis Mass Spectrometry for Preconcentration and Clean-Up of Peptides and Proteins	67
<i>Fernando Benavente, Silvia Medina-Casanellas, Estela Giménez, and Victoria Sanz-Nebot</i>	
7 Affinity Monolith-Integrated Microchips for Protein Purification and Concentration	85
<i>Changlu Gao, Xiuhua Sun, Huaixin Wang, Wei Qiao, and Bo Hu</i>	
8 Analysis of Somatropin by Double-Injection Capillary-Zone Electrophoresis in Polybrene/Chondroitin Sulfate A Double-Coated Capillaries	93
<i>Ahmad Amini</i>	
9 Poly(<i>N,N</i> -Dimethylacrylamide)-Based Coatings to Modulate Electroosmotic Flow and Capillary Surface Properties for Protein Analysis. . . .	107
<i>Laura Sola, Marina Cretich, and Marcella Chiari</i>	
10 Measurement of Inflammatory Chemokines in Micro-dissected Tissue Biopsy Samples by Chip-Based Immunoaffinity Capillary Electrophoresis	121
<i>Terry M. Phillips, Edward Wellner, Shane McMohan, and Heather Kalish</i>	

11	Separation of Recombinant Therapeutic Proteins Using Capillary Gel Electrophoresis and Capillary Isoelectric Focusing	137
	<i>Caitlyn A.G. De Jong, Jessica Risley, Alexis K. Lee, Shuai Sherry Zhao, and David D.Y. Chen</i>	
12	Characterization of Chemical and Physical Modifications of Human Serum Albumin by Capillary Zone Electrophoresis	151
	<i>Anne-Lise Marie, Nguyet Thuy Tran, and Myriam Taverna</i>	
13	Capillary Electrophoresis Method for the Assessment of Erythropoiesis-Stimulating Agents in Final Formulations.	165
	<i>Michel Girard, Anita Kane, and Sylvie Boucher</i>	
14	Quality Control of Therapeutic Monoclonal Antibodies at the Hospital After Their Compounding and Before Their Administration to Patients	179
	<i>Emmanuel Jaccoulet, Claire Smadja, and Myriam Taverna</i>	
15	Capillary Electrophoresis-Ultraviolet-Mass Spectrometry (CE-UV-MS) for the Simultaneous Determination and Quantification of Insulin Formulations.	185
	<i>Julie Schappler and Serge Rudaz</i>	
16	Applications of an Automated and Quantitative CE-Based Size and Charge Western Blot for Therapeutic Proteins and Vaccines	197
	<i>Richard R. Rustandi, Melissa Hamm, Catherine Lancaster, and John W. Loughney</i>	
17	Affinity Capillary Electrophoresis Applied to Investigation of Valinomycin Complexes with Ammonium and Alkali Metal Ions	219
	<i>Sille Štěpánová and Václav Kašíčka</i>	
	<i>Index</i>	233
