

## TABLE OF CONTENTS

ORALLY PRESENTATIONS.....	1
<u>Elodie Anxolabéhère-Mallart</u> , A. Aukauloo, C. Costentin, M. Fournier, M. Robert a and J.-M. Savéant <i>Cobalt Clathrochelate Complexes as Hydrogen-Producing Catalysts</i> .....	2
Francesco Sannicolò, Giovanni Rampinini, Letizia Colella, Tiziana Benincori, Simona Rizzo, Włodzimierz Kutner, Krzysztof Noworyta, <u>Valentina Bonometti</u> , Patrizia Mussini <i>Electrochemistry of 3-D, Inherently Chiral Thiophene-Based Monomers</i> .....	3
<u>Olivier Buriez</u> , Eric Labbé, Elisabeth Hillard, Anne Vessières, Gérard Jaouen, Christian Amatore, Claire Madelaine, Yvan Six <i>Molecular Electrochemistry: A Powerful Tool for Mechanistic Investigations and Selective Preparation of Therapeutic Molecules</i> .....	4
<u>Marie-Noëlle Collomb</u> , Sophie Romain, Carmen E. Castillo Gonzales, Jean-Claude Leprêtre, Jérôme Chauvin and Alain Deronzier <i>Electron Transfer Processes in Heterobimetallic Ruthenium-Manganese Terpyridyl Complexes for Modeling Photosystem II</i> .....	5
<u>Jorge P. Correia</u> , Ana Tenreiro, Reinhart Keese, Luisa M. Abrantes <i>Modified Electrodes Incorporating Vitamin B12 – Preparation and Electrocatalytic Activity</i> .....	6
<u>Alain Deronzier</u> and S.Chardon-Noblat <i>The Electrocatalytic Reduction: A Convenient Process to Use CO<sub>2</sub> as Renewable Carbon Source</i> .....	7
<u>Elisabet Dunach</u> , Christine Pintaric and Sandra Olivero <i>Electrochemical Boration of Organic Halides</i> .....	8
<u>Lothar Dunsch</u> , Peter Raptá, Alexey A. Popov and Shangfeng Yang <i>In-situ ESR/UV-Vis-NIR Spectroelectrochemistry of Endohedral Fullerenes: The Story of Sc<sub>3</sub>N@C<sub>68</sub></i> .....	9
<u>Jan Fábry</u> <i>Elements of the Quasiperiodic Symmetry Found in the Baroque Pilgrimage Church of St. John Nepomucen and the Surrounding Cloister close to Žďár nad Sázavou, Czech Republic</i> .....	10
<u>Jan Fiedler</u> , Wolfgang Kaim, Monika Sieger, Stefan Greulich, Biprajit Sarkar, Stanislav Zális <i>Electrochemical and Spectroelectrochemical Investigation of Iridium-(1,4-diazabutadiene) Redox System: Two-electron Reduction of [IrCl(Cp*)(DAB)]<sup>+</sup> versus Two Successive one-Electron Oxidations of [IrCp*(DAB)]</i> .....	11
<u>Carlos Frontana</u> <i>Using Molecular Electrochemistry Approaches to Evaluate Properties of Reactive Radical Anions: Towards a Molecular Level Understanding of pharmacological and biological effects</i> .....	12
<u>Vitali A. Grinberg</u> , Sergey R. Sterlin, Natalia A. Mayorova <i>The Electrochemically Generated Radicals and Ion-Radicals in the Synthesis of Organofluorine Compounds</i> .....	14

<u>Kinga Haubner</u> , Sabrina Klod, Evelin Jaehne, Jan Tarabek and Lothar Dunsch <i>In situ Spectroelectrochemistry of <math>\alpha,\omega</math>-Endcapped Oligothiophenes</i> .....	15
<u>Luděk Havran</u> , Petra Horáková, Hana Pivoňková, Milan Vrábek, Michal Hocek, Miroslav Fojta <i>Application of Organometallic Compounds in Electrochemical Analysis of DNA</i> .....	16
<u>Michael Heyrovský</u> <i>Wide Prospects for Electrochemical Studies of Organic Molecules and Coordination Compounds (Review)</i> .....	17
Abdel Aziz Jbarah, Isabelle Roth, Stefan Spange and <u>Rudolf Holze</u> <i>A Comparative Spectroelectrochemical Study of the Redox Electrochemistry of N-(polyvinylamine)-Substituted-o-Nitroaniline</i> .....	19
<u>Irena Hoskovicová</u> <i>Variable <math>\pi</math>-acidity of <math>\eta^2</math>-bonded Allyl and of Carbene Ligands with Respect to the Central Metal Atom</i> .....	20
<u>Anny Jutand</u> <i>Electrochemistry: A Way to Solve Mechanistic Problems in Organometallic Catalysis</i> .....	21
<u>Wolfgang Kaim</u> , Ralph Hübner, Biprajit Sarkar, Sabine Strobel, Jan Fiedler and Stanislav Zálaiš <i>Reversible Intramolecular One-Electron Oxidative Addition: Structure, Spectroelectrochemistry and Theory</i> .....	22
<u>Jiri Klima</u> <i>Sonoelectrochemistry – Desired Effects, Possible Mechanisms and Design of Experimental Arrangement</i> .....	23
<u>Vladimír A. Kurmaz</u> , Alexandr G. Krivenko, Alexandr S. Kotkin <i>Metastable Complex of a Radical with a Proton Donor/Acceptor as a New Key Intermediate in Organic Electrochemistry</i> .....	24
Agnieszka Pietrzyk, <u>Włodzimierz Kutner</u> , Subramanian Suriyanarayanan, Raghu Chitta, Eranda Maligaspe, Melvin E. Zandler, Francis D'Souza, Francesco Sannicolò and Patrizia R. Mussini <i>Supramolecular Complexation of Biogenic Amines by Functional Electroactive Monomers of Thiophene Derivatives for Formation of Molecularly Imprinted Polymer (MIP) Films for Biosensor Development</i> .....	25
<u>Alan Liška</u> , Albert J. Fry and Jiří Ludvík <i>Electrochemical reduction of molecules with more redox centers: Mono-, Di-, Tri and Tetranitrocatalix-[4]-arenes and Their Models</i> .....	26
<u>Tomáš Mikysek</u> and Jiří Ludvík <i>Electrochemistry of the "Push-Pull" Type Molecules with a Systematically Extended <math>\pi</math>-Conjugated System calculations</i> .....	27
Giuseppe D'Alfonso, Monica Panigati, Pierluigi Mercandelli, Daniela Donghi, Elsa Quartapelle Procopio, Matteo Mauro, Alessio Raimondi, <u>Patrizia R. Mussini</u> <i>Electrochemistry of Dinuclear Re(I) Complexes with Bridging 1,2 Heteroaromatic Chromophore Ligands</i> .....	28
<u>Emil Paleček</u> , Mojmir Trefulka and Veronika Ostatná <i>Electrochemistry of Biomacromolecule Adducts with Osmium Complexes</i> .....	29

<u>Armando J. L. Pombeiro</u> <i>Electrochemical Characterization of Coordination Compounds and Selected ET-Induced Reactions</i> .....	31
<u>Hyacinthe Randriamahazaka</u> , Jalal Ghilane, Pascal Martin, Gaëlle Trippé-Allard and Jean-Christophe Lacroix <i>Electrochemical Properties of an Electroactive Ionic Liquid: From the Heterogeneous Electron Transfer to the Formation of Intermetallic Compounds</i> .....	32
<u>Jean-Michel Savéant</u> <i>Concerted Proton Electron Transfers. Electrochemical and Related Approaches</i> .....	34
<u>Romana Sokolová</u> , Magdaléna Hromadová, Lubomír Pospíšil, Jiří Ludvík, Stefania Giannarelli <i>The Importance of a Proton Donor in Reduction of Halogenated Benzonitriles</i> .....	36
<u>Güler Somer</u> <i>Intermetallic Compound Formation on Mercury Electrode during Polarographic Studies in the Presence of Selenite</i> .....	38
<u>Ivana Šestáková</u> <i>Electrochemical Methods in Research on Metallothioneins and Phytochelatins</i> .....	39
<u>Ludmila Šimková</u> and Jiří Ludvík <i>Decomposition Mechanism of 1,1-diamine-2,2-dinitroethene - a Spectrometric Study</i> .....	40
Cyrille Costentin, Marc Robert, Jean-Michel Savéant and <u>Cédric Tard</u> <i>Inserting a Hydrogen Bond Relay between Proton Exchanging Sites in Proton-Coupled Electron Transfers</i> .....	41
<u>Abdul Wahab</u> , Brian Stepp, Jiří Klíma, Josef Michl and Jiří Ludvík <i>Electrochemistry of 1-X-12-Y-CB<sub>11</sub>Me<sub>10</sub><sup>-</sup> Carborane Anions in Liquid SO<sub>2</sub></i> .....	42
<u>David Walton</u> <i>Recent Developments in Organic Sonoelectrochemistry and Other Multiperturbation Electrochemical Systems</i> .....	44
<u>Emil Wierzbinski</u> , Kathryn L. Davis, Silvia Bezer, Amit Paul, Catalina Achim and David H. Waldeck <i>Charge Transfer Through Peptide Nucleic Acid Oligonucleotides</i> .....	45
<u>Stanislav Zális</u> , Rainer Winter and Wolfgang Kaim <i>Quantum Chemical Interpretation of Spectroelectrochemical Properties of Ruthenium Complexes with Redox Active Ligands</i> .....	46
POSTER PRESENTATIONS .....	47
Francesco Sannicolò, Giovanni Rampinini, Angela Digennaro, Tiziana Benincori, Simona Rizzo, Monica Panigati, Cristina Cerqui, <u>Valentina Bonometti</u> , Patrizia Mussini <i>Towards a Rationalization of Electronic Properties of (Thiophene+Fluorene) Semiconductors: Modulating the HOMO-LUMO Gap by Modifying the Fluorene Core</i> .....	48
<u>Milan Bouša</u> , <u>Barbora Lásková</u> , Markéta Zukalová, Jan Procházka, Ladislav Kavan, Arnošt Zukal <i>Lithium Insertion Electrochemistry in Polycrystalline TiO<sub>2</sub> Anatase with a Large Percentage of (001) Faces</i> .....	49

<u>Joana Cabrita</u> , Ana Viana, Franz-Peter Montforts and Luisa Maria Abrantes <i>Mixed Self-assembled Monolayers of Co-Porphyrin and Alkane Phosphonates on Gold</i> .....	50
Habibe Tezcan, <u>Güler Ekmekci</u> and M. Levent Aksu <i>Electrochemical Properties of 1, 3-disubstituted (CH<sub>3</sub>, OCH<sub>3</sub>) Phenyl-5-phenylformazans and Comparison with Spectral Properties</i> .....	51
<u>Michal Horáček</u> and Jan Langmaier <i>The Electronic Effect of Substituents in Zirconocene Complexes</i> .....	52
<u>Věra Hudská</u> and Pavel Janda <i>Liquid Film Embedded Electrode for Electrochemical Investigation of Redox Systems Soluble in Nonaqueous Solvents</i> .....	53
<u>Hana Kvapilová</u> , Irena Hoskovcová, Jiří Ludvík and Stanislav Zálšíš <i>DFT Calculations of Electrochemical and Spectral Properties of Aminocarbene Complexes of Cr and Fe</i> .....	54
Petr Zuman and <u>Jiří Ludvík</u> <i>Phthalaldehyde and Other Two Isomeric Benzenedicarboxaldehydes</i> .....	55
<u>Radka Metelková</u> , Irena Hoskovcová, Tomáš Tobrman and Jiří Ludvík <i>Reduction of Chromium(0) and Iron(0) Aminocarbene Complexes with Heterocyclic Substituents on the Carbene Carbon</i> .....	56
<u>Pavčina Vydělková</u> , Petra Horáková, Hana Pivoňková, Luděk Havran and Miroslav Fojta <i>Electrochemical monitoring DNA modification by platinum complexes</i> .....	57
List of Participants .....	58
Author Index .....	62
