

1	Author Biography .....	4
2	Introduction .....	5
3	Inkjet Printing from the Viewpoint of Physical Chemistry.....	6
3.1	The Art of Ink Formulation – Getting Control over Dispersions.....	7
3.2	The Art of Printing – Quality and Functionality of Printed Particle Systems .....	9
4	General Goals of the Research Work Included in the Thesis .....	12
5	Selected Results and their Discussion.....	13
5.1	Outline of the Used Methodology.....	13
5.2	Conductive Species.....	14
5.3	Semiconducting Species.....	17
5.4	Insulating Species .....	25
6	Examples of a Complex Printed Functional Structures – Printed Electrochemical Cell.....	27
7	Conclusion.....	31
8	References .....	32
9	Abstract .....	40
