

ABSTRACTS - TABLE OF CONTENTS

ORAL PRESENTATIONS	2
S1-1_I Peroxynitric acid: a key chemical species in plasma-treated water with the reduced-pH method for effective and safety disinfection <i>Kitano K., Ikawa S., Nakashima Y., Yokoyama T., Kawashita N., Tani A.</i>	3
S1-2_O Plasma activated water for agro applications <i>Pemen A.J.M., Hoebe W.F.L.M., van Ooij P.P., Leenders P.H.M.</i>	4
S1-3_O Formation of reactive oxygen and nitrogen species including peroxynitrite in physiological buffer exposed to cold atmospheric plasmas <i>Girard F., Badets V., Blanc S., Sojic N., Clément F., Arbault S.</i>	5
S1-4_O Plasma activated water (PAW) for agricultural applications <i>Bertaccini A., Biondi E., Canel A., Colombo V., Contaldo N., Gherardi M., Laurita R., Perez S., Stancampiano A., Zambon Y.</i>	6
S2-1_I Nanoparticles synthesis using plasma-liquid interactions <i>Chen Q.</i>	7
S2-2_O Electrical discharge synthesis and modification of silicon and carbon nanoparticles in liquids <i>Tarasenko N.V., Nevar A.A., Kiris V.V., Tarasenko N.N., Krcma F.</i>	8
S2-3_O Ultra-low density metallic foams synthesized by contact glow discharge electrolysis for laser physic experiments <i>Botrel R., Rocher S., Durut F., Chicanne C., Theobald M., Vignal V.</i>	9
S2-4_O Formation of metallic nanoparticles in air plasma activated water <i>Machala Z., Tarabová B., Medvidov M., Kučerová K., Rak D., Sedlák M., Janda M., Hammer M., Hensel K.</i>	10
S3-1_I Plasmas in biology - beyond the long lived species <i>Wende K., Bekeschus S., Volzke J., Lackmann J., Jablonowski H., v. Woedtke Th., Lalk M., Weltmann K.-D.</i>	11
S3-2_O Atmospheric non-equilibrium plasma induces apoptosis and oxidative stress pathway regulation in T-lymphoblastoid leukemia cells <i>Turrini E., Laurita R., Stancampiano A., Catanzaro E., Gherardi M., Colombo V., Fimognari C.</i>	12
S3-3_O Application of atmospheric pressure plasmas in agriculture for wastewater cleaning <i>Škoro N., Puač N., Živković S., Mišić D., Cvelbar U., Malović G., Petrović Z.Lj.</i>	13
S3-4_O Boosting lenses growth velocity by plasma-activating tap water, demineralized water and liquid fertilizer <i>Dufour T., Zhang S., Rousseau A.</i>	14
S3-5_O Progress in the research of plasma-activated water for agricultural applications <i>Song Y., Liu D.</i>	15
S4-1_I Degradation of pharmaceutical pollutants in water by non-thermal plasma <i>Magureanu M.</i>	16
S4-2_O The use of cold atmospheric plasma (CAP) to stimulate biological wastewater treatment processes <i>Van de Moortel N., Van den Broeck R., Walsh J., Degève J., Dewil R.</i>	17

S4-3_O	On application of a continuous flow barrier discharge reactor in removal of pesticides <i>Wardenier N., Vanraes P., Van Hulle S.W.H., Leys Ch., <u>Nikiforov A.</u></i>	18
S4-4_O	Evidence of the aromatic cycle breaking of paracetamol by non-thermal plasma <i>Baloul Y., Colas C., Rabat H., Maunit B., Aubry O., Hong D.</i>	19
S5-1_I	Plasma electrochemistry: experiments and modelling of the plasma/liquid interface <i>Go D.B.</i>	20
S5-2_O	Plasma generated ozone: Detection from the gas phase to the liquid <i>Jablonowski H., Sousa J.S., Schmidt-Bleker A., Winter J., Wende K., von Woedtke Th., Weltmann K.-D., Reuter S.</i>	21
S5-3_O	High-resolution, high-sensitivity quantitative investigation of barrier discharge on triple junction at water interface <i>Synek P., Voráč J., Hoder T.</i>	22
S5-4_O	Optical diagnostics of surface dielectric barrier discharge with liquid electrodes in argon <i>Cvetanović N., Galmiz O., Hoder T., Brablec A.</i>	23
S6-1_I	The role of interfacial chemistry in the plasma reactor design for water treatment <i>Mededovic Thagard S., Stratton G.R., Bellona Ch.L., Holsen Th.M.</i>	24
S6-2_O	Cold atmospheric plasma (CAP) inactivation of liquid (food) model systems: effect of composition <i>Smet C., Baka M., Walsh J.L., Valdramidis V.P., Van Impe J.F.</i>	25
S6-3_O	Application of high voltage electrical discharge plasmas in processing of apple juice <i>Vukušić T., Jambrak A.R., Stulić V., Thagard S.M., Herceg Z.</i>	26
S6-4_O	Plasmas in agriculture - future COST action <i>Puač N.</i>	27
S6-5_O	Degradation of aniline in water by dielectric barrier discharge combined with microbubbles <i>Liu Y., Sun J., Zhang H., Shen X.</i>	28
S7-1_I	Plasma electrolytic oxidation: overview of the challenges in plasma diagnostics <i>Nominé A.</i>	29
S7-2_O	Hydrophobic coatings on cotton obtained by in situ plasma polymerization of a fluorinated monomer in ethanol <i>Molina R., Teixidó J.M., Kan Ch.-W., Jovančić P.</i>	30
S7-3_O	Chemical free dispersion of boron nitride nanosheets through atmospheric pressure plasma-water interaction <i>Sun Dan, Guo Z., Sun Daye, Luo Y., Macias-Montero M., McGlynn R., Falzon B., Mariotti D., Maguire P.</i>	31
S7-4_O	What discharges in liquids can bring to catalysis: from alloy to Janus nanoparticles <i>Belmonte Th., Kabbara H., Ghanbaja J., Noël C.</i>	32
S8-1_I	Nanosecond discharge in deionized water: morphology, propagation velocity and optical emission during initial phase <i>Šimek M., Pongráč B., Babický V., Člupek M., Lukeš P.</i>	33
S8-2_O	Mechanisms of high density plasmas in water <i>Schram D.C.</i>	34

S8-3_O	Microwave argon plasma for water treatment <i>Benova E., Marinova P., Zhekova M., Atanasova M., Bogdanov T., Topalova Y., Todorova Y., Yotinov I., Mazankova V., Krčma F.</i>	35
S8-4_O	Production of hydrogen-rich synthesis gas by pulsed atmospheric pressure plasma <i>Baránková H., Bardos L.</i>	36
S9-1_I	Interaction between atmospheric pressure plasmas and liquid micro-droplets <i>Kruszelnicki J., Lietz A.M., Kushner M.J.</i>	37
S9-2_O	Simulation of streamer interactions with water and oil bubbles <i>Babaeva N.Yu., Naidis G.V., Kushner M.J.</i>	38
S9-3_O	Cross sections and mobility of H₂O⁺ ions in H₂O <i>Stojanović V., Jovanović J., Marić D., Petrović Z Lj.</i>	39
S9-4_O	The degradation kinetics of organic compounds in aqueous solutions treated by plasma or gamma radiation <i>Pinhão N., Madureira J.</i>	40
S9-5_O	Gas temperature field of a pin-to-water air glow discharge <i>Xiong Q., Xu L., Xiong L., Wang X.</i>	41

POSTER PRESENTATIONS 42

Topic 1 - Physics and Chemistry of Plasmas inside Liquids

P01	Formation rate and energy yield of hydroxyl radicals in water at the action of discharge in gas-vapour bubbles <i>Titov V.A., Kuzmicheva L.A., Ganin A.N., Nikitin D., Choukourov A.</i>	43
P02	Water as a unique liquid object from the electro-physical standpoint <i>Kossyi I.A., Anpilov A.M., Barkhudarov E.M.</i>	44
P03	Hydrogen peroxide production by a novel plasma source for generation of DC non-pulsing discharge in liquids <i>Kozáková Z., Krčma F.</i>	45
P04	Time-resolved processes in a pulsed electrical discharge in plate-to-plate electrode configuration <i>Stelmashuk V.</i>	46
P05	Systemic characterisation of pulsed laser breakdown in water and its aftermath <i>Graham W.G., Hüwel L., Baumgart C., Young A., Morgan T.J., Murakami T.</i>	47
P06	Investigation of nanosecond pulsed corona-like discharge generated in deionized water <i>Pongráč B., Šimek M., Babický V., Člupek M., Lukeš P.</i>	48

Topic 2 - Physics and Chemistry of Plasma in Contact with Liquids

P07	Experimental study of a DBD APPJ on the chemistry of a liquid target <i>Invernizzi L., Muja C., Saint F.P., Guillot P.</i>	49
P08	The dependencies of the emission of metals atoms in the plasma on the composition of the liquid electrolyte cathode in the discharge at atmospheric pressure <i>Sirotkin N.A., Titov V.A.</i>	50
P09	Characterization of a hollow needle-to plate discharge dedicated to the drug residues treatment in water <i>Rabat H., Baloul Y., Hong D., Aubry O.</i>	51

P10	Effect of a liquid solution target on the behavior of an APPJ <i>Saint F.P., Invernizzi L., Chauvet L., Muja C., Guillot Ph.</i>	52
P11	Study of an APPJ interacting with a liquid surface by filtered imaging and mass spectrometry <i>Chauvet L., Invernizzi L., Saint F.P., Muja C., Guillot Ph.</i>	53
P12	Microbubble-enhanced plasma-driven reactor for wastewater treatment <i>Taglioli M., Ren J., Wright A., Shaw A., Borghi C.A., Bandulasena H., Iza F.</i>	54
P13	Physical properties of plasma discharges propagating along water surface <i>Hoffer P., Sugiyama Y., Hosseini S. H. R., Akiyama H., Akiyama M., Lukeš P.</i>	55

Topic 3 – Plasma Sources for Plasma-Liquid Systems

P14	Development of non-thermal atmospheric-pressure plasma source using a rectangular coaxial transmission line for liquid interaction <i>Ahn Ch., Lee J., Choi J.</i>	56
P15	Sparking regime of DC supplied discharge in water solutions <i>Krčma F., Dostál L.</i>	57

Topic 4 – Diagnostics of Plasma-Liquid Systems

P16	Optical emission spectroscopy investigation of a plasma over anode water resulting in organization patterns on the surface <i>Garcia M.C., Kovach Y., Foster J.E.</i>	58
P17	A review concerning the power of the electrical discharges and the performances of the non-thermal plasma reactors <i>Hnatiuc E., Felea C., Asatanei D., Mares M.</i>	59
P18	Diagnostics of a pulsed high voltage discharge in water <i>Rond C., Er M., Fagnoon N., Vega A., Duten X.</i>	60
P19	Fluorescent probe for quantification of ozone in liquids <i>Wright A., Shaw A., Buckley B., Bandulasena H., Iza F.</i>	61
P20	Investigations of pulsed plasma discharges in saline solution using simulations to interpret observations <i>Asimakoulas L., Graham W.G., Field T.A.</i>	62
P21	EHD-driven mass transport enhancement in surface dielectric barrier discharges <i>Shaw A., Taglioli M., Wright A., Neretti G., Seri P., Borghi C.A., Iza F.</i>	63
P22	Transient species in plasmas interacting with liquids <i>Reuter S., van Helden J.H., Schmidt-Bleker A., Gianella M., Jablonowski H., Santos Sousa J., Weltmann K.-D., Ritchie G.A.</i>	64
P23	Optical emission spectroscopy characterisation of plasma reactors for liquid food treatments <i>Bišćan M., Vukušić T., Stulić V., Popović D., Herzeg Z., Milošević S.</i>	65
P24	Analysis of TiO₂ NPs in liquid environment using LIBS <i>Demir A., Akman E., Öztoprak B.G.</i>	66
P25	Ion Mobility Spectrometry monitoring of phthalate degradation by atmospheric pressure discharges <i>Michalczyk B., Moravský L., Sabo M., Matejíček Š.</i>	67
P26	Characterisation of plasma source based on single electrode atmospheric pressure plasma jets operating in closed volume <i>Milošević S., Popović D., Bišćan M.</i>	68

P27	Quantification of ROS produced by three different plasma devices: methods and influence of plasma parameters <i>Duchesne C., Dufour T., Honnorat B., Liu B., Zhang S., Rousseau A.</i>	69
P28	Diagnostic of plasma-liquid mixing and methylene blue decomposition using a RF atmospheric jet <i>Carpen L.G., Teodorescu M., Ionita M.-D., Ionita E.-R., Dinescu G.</i>	70

Topic 5 – Modelling of Plasma-Liquid Systems

P29	Computational study on low-temperature atmospheric-pressure microplasmas operating at microwave frequency with hydrogen peroxide <i>Lee J., Ahn Ch., Choi J.</i>	71
P30	Evaluating the behaviour of plasma generated reactive species in contact with water both at macroscopic and molecular scale <i>Verlackt Ch.C., Neyts E.C., Bogaerts A.</i>	72
P31	Transit time of ions in low-current low pressure water vapour discharge <i>Marić D., Sivoš J., Škoro N., Malović G., Petrović Z.Lj.</i>	73

Topic 6 - Plasma Activated Liquids

P32	Immersion of single electrode atmospheric pressure plasma jet into deionized water <i>Popović D., Bišćan M., Milošević S.</i>	74
P33	Surface-wave-sustained plasma torch for biomedical applications <i>Marinova P., Benova E., Topalova Y., Todorova Y., Atanasova M., Yotinov I.</i>	75

Topic 7 – Plasma Liquid Advanced Oxidation Processes

P34	Multi electrode pulsed submerged arc water treatment <i>Parkansky N., Meirovich A., Boxman R.L.</i>	76
P35	The destruction kinetics of organic dyes in aqueous solutions under the treatment by low-temperature plasma jet <i>Pleskunov P., Nikitin D., Choukourov A., Shutov D., Bogdanov P., Rybkin V., Biederman H.</i>	77
P36	Removal of azithromycin and atrazine from modal water by plasma-based water treatments <i>Marković L., Vukusić T., Ćurko J., Matošić M., Herceg Z., Terzić S., Ahel M.</i>	78
P37	Overview of experimental studies of plasma in liquid water at the University of Michigan and progress towards a practical plasma water reactor <i>Foster J.E., Lai J., Mujovic S., Groele J., Kovach Y.</i>	79
P38	Synergetic behaviour of plasma treatment and ozonation for enhanced micropollutant decomposition in water <i>Wardenier N., Vanraes P., Van Hulle S.W.H., Leys Ch., Nikiforov A.</i>	80
P39	Dielectric barrier discharge ozone generation for water treatment applications <i>Panta G.P., Subedi D.P., Papadakis A.</i>	81
P40	Characterization and comparative evaluation of two atmospheric plasma sources for water treatment <i>Paradisi C., Bosi F.J., Tampieri F., Marotta E., Bertani R.</i>	82

P41	Plasma treatment of agrichemicals, metabolites and residues <i>Marotta E., Nani L., Carretta L., Tampieri F., Cardinali A., Paradisi C.</i>	83
P42	Preliminary study on immersed Plasma gun treated liquid solutions for pollutant abatement <i>Hamon A., Audy N., Douat C., Dozias S., Aubry O., Pouvesle J.-M., Robert E.</i>	84

Topic 8 – Synthesis of Nanoparticles in Plasma-Liquid Systems

P43	Synthesis of micron-size graphene-like films using a submerged pulsed arc in ethanol <i>Parkansky N., Barkay Z., Popov I., Burstein L., Boxman R.L.</i>	85
P44	In situ monitoring of the synthesis of ligand-free Ag nanoparticles during He/H₂/N₂ plasma treatment of AgNO₃ solution <i>Treshchalov A., Tsarenko S., Vanetsev A., Sildos I.</i>	86
P45	Development and optimization of electrode system for synthesis of spherical silver nanoparticles <i>Er M., Vega A., Rond C., Duten X.</i>	87
P46	Synthesis and modification of carbon and composite nanoparticles by laser assisted plasma in liquids <i>Tarascenko N.N., Nevar A.A., Butsen A.V., Tarascenko N.V., Mariotti D.</i>	88
P47	Ultrasmall nickel oxide nanoparticles for photovoltaic applications produced by atmospheric pressure plasma in liquid phase <i>Chakrabarti S., Velusamy T., Rocks C., McDonald C., Padmanaban D.B., Maguire P., Mariotti D.</i>	89

Topic 9 – Material Processing by Plasmas with Liquids

P48	Atmospheric pressure discharges for solution-based immobilization of chitosan on polymeric foils <i>Nikitin D., Pleskunov P., Choukourov A., Titov V., Kuzmicheva L., Lipatova I., Mezina E., Biederman H.</i>	90
P49	Effect of plasma-water interaction on the surface function of multi-wall carbon nanotubes <i>Sun Daye, Sun Dan, Falzon B., Guo Z., McGlynn R., Macias-Mntero M., Tweedie M., Mariotti D., Maguire P.</i>	91
P50	The influence of atmospheric pressure plasma on polymer wettability of colloidal gold synthesized by laser ablation in water <i>Krstulović N., Jurov A.</i>	92
P51	A microfluidic atmospheric-pressure plasma device for chemical synthesis applications <i>Shaban M., Randi A., Shaw A., Buckley B.R., Iza F.</i>	93
P52	The conversion of liquid and solid waste by water vapour plasma technology <i>Grigaitienė V., Tamošiūnas A., Gimžauskaitė D.</i>	94
P53	RF plasma jet for changing wettability of cellulose based paper platform for antibiotic sensitivity tests <i>Pawlat J., Terebun P., Kwiatkowski M.</i>	95
P54	Nitrogen incorporation in reduced graphene oxide suspension by submerged plasma jet <i>Vizireanu S., Ionita M.D., Stoica S.D., Carpen L., Teodorescu M., Ion I., Dinescu G.</i>	96

Topic 10 – Plasma-Liquid Systems for Agriculture

P55	Stress response of Escherichia coli K12 after the gas phase electrical discharge plasma treatment <i>Stulić V., Vukušić T., Herceg Z., Jambrak A.R.</i>	97
P56	Generation and quantification of nitrogen species in plasma activated water <i>Liu B., Honnorat B., Duchesne C., Dufour T., Rousseau A.</i>	98
P57	Cold pasteurization of fresh apple juice by the cold air plasma <i>Tarabová B., Žilková A., Krewing M., Badow J., Machala Z.</i>	99
P58	Stimulation of germination and growth of wheat by plasma activated water <i>Kučerová K., Henselová M., Hensel K.</i>	100
P59	Atmospheric pressure air plasma with particular reference to the elimination of food-related microorganisms <i>Modić M., Hojnik N., Yuan N., Walsh J.L., Cvelbar U.</i>	101

Topic 11 - Plasma-Liquids Systems for Medicine

P60	Assessing the antimicrobial mechanism of action of cold atmospheric plasma <i>Valdramidis V.P., Millan-Sango D., Han L., Van Impe J.F., Cullen P.J., Bourke P.</i>	102
P61	Decontamination efficacy - inactivation mechanisms of air plasma treated liquids <i>Dickenson A., Walsh J.L., Mcleod N., Sutton J.M.</i>	103
P62	Bactericidal effect of atmospheric pressure plasma treatment of synthetic sea water <i>Laurita R., Simoncelli E., Miserocchi A., Gherardi M., Colombo V.</i>	104
P63	The effect of air transient spark discharge on bovine serum albumin in liquid solution <i>Kučerová K., Pelach M., Jakubčín D., Machala Z., Hensel K.</i>	105
P64	Systemic toxicity and cytotoxicity assessment of non-thermal atmospheric DBD air plasma treated N-Acetylcysteine (NAC) solution <i>Ercan U.K., Yost A., Wasko K., Brooks A.D., Joshi S.G.</i>	106
P65	Safety aspects of atmospheric pressure helium plasma jet operation on mouse skin <i>Kos S., Cemazar M., Filipic G., Sersa G., Cvelbar U.</i>	107
P66	Therapeutic effect of cold atmospheric plasma on oral cavity squamous cell carcinomas <i>Honnorat B., Lescaille G., Guillot-Delost M., Bouras R., Griffon J., Kikayi C., Le Guillou D., Dufour T., Lemoine F.M., Bridal L., Rousseau A.</i>	108
P67	Influence of process parameters in the generation of reactive oxygen and nitrogen species in cell culture media by atmospheric pressure plasma jet <i>Canal C., Humbert M., Guillem-Marti J., Ginebra M.-P.</i>	109

Post Deadline Abstracts

P68	Estimation of the changes of characteristic concentrations of hydrogen peroxide in plasma treated liquid <i>Zhekova M., Marinova P., Benova E., Krčma F.</i>	110
-----	--	-----
