

# Contents

1. Introduction	1
1.1 Background to the Study Group's report	2
1.2 Structure of the report	5
2. The world situation with respect to ultrasonography	5
2.1 Assessment of current practice	5
2.1.1 Performance and interpretation	5
2.1.2 Delivery of services	6
2.1.3 Equipment and techniques	7
2.1.4 Recognized indications for ultrasonography	7
2.2 Trends in ultrasonography	8
2.3 Current ultrasonography training	8
2.4 Variations in training and practice	8
2.5 Sonographers	10
2.6 Trends in ultrasonography training	11
3. Ultrasonography curricula for medical students and physicians	11
3.1 Curriculum for medical students	11
3.2 Curriculum for general (level I) ultrasonography for physicians	12
3.2.1 General features of the curriculum	12
3.2.2 Specific content	13
3.2.3 Duration of training and required number of studies	16
3.2.4 Evaluation	16
3.2.5 Continuing medical education	17
3.3 Curriculum for advanced (level II and III) ultrasonography for physicians	17
3.3.1 Purpose	17
3.3.2 Prerequisites	17
3.3.3 Areas covered	17
3.3.4 Content and duration	17
3.3.5 Practical training	18
3.3.6 Evaluation	18
3.3.7 Continuing medical education	18
3.3.8 Ultrasound in various specialties	19
4. Ultrasonography training for sonographers and other allied health professionals	21
4.1 Introduction	21
4.2 A definition of a sonographer	21
4.3 Limitation of practice	21
4.4 Curriculum for general (level I) ultrasonography for sonographers and other allied health professionals	22
4.4.1 Purpose	22
4.4.2 Prerequisites	22
4.4.3 General and specialized training	22
4.4.4 Curriculum	22
4.4.5 Duration of training and required number of studies	23
4.4.6 Clinical and ancillary information	23

4.4.7 Principles of scanning	24
4.4.8 Requirements for teachers of sonographers	24
4.4.9 Evaluation	25
4.4.10 Continuing medical education	25
4.4.11 Specialized training	25
<b>5. Basic sciences and instrumentation curricula</b>	<b>26</b>
5.1 Introduction	26
5.2 Prerequisites	27
5.2.1 Mathematics	27
5.2.2 Physics	27
5.2.3 Biology	27
5.3 Basic sciences and instrumentation curriculum for general ultrasonography	28
5.3.1 Basic sciences	28
5.3.2 Equipment	29
5.3.3 Quality assurance	30
5.3.4 Equipment management	30
5.3.5 Artefacts	30
5.4 Basic sciences and instrumentation curriculum for advanced ultrasonography	31
5.4.1 Basic sciences	31
5.4.2 Equipment	33
5.4.3 Quality assurance	34
5.4.4 Artefacts	34
5.5 Course duration	35
5.6 Evaluation	35
<b>6. Training centres and resources</b>	<b>35</b>
6.1 Needs and priorities	35
6.2 Teacher training	36
6.3 Materials and techniques	37
6.4 Evaluation	37
6.5 Teacher-training programmes	37
6.6 Licensing and accreditation	38
6.7 Continuing education	38
6.8 Training centres	38
6.8.1 Regional (international) centres	38
6.8.2 National centres	39
6.9 Equipment	39
6.9.1 Ultrasound equipment	39
6.9.2 Training equipment	40
6.10 Access to patients	40
6.11 Space and equipment requirements	40
<b>7. Conclusions and recommendations</b>	<b>40</b>
<b>Acknowledgements</b>	<b>41</b>
<b>References</b>	<b>41</b>
<b>Selected further reading</b>	<b>43</b>
<b>Annex</b>	
<b>Applications of diagnostic ultrasound</b>	<b>45</b>
