

# Contents

1. Introduction	1
References	1
2. Epidemiology of group A streptococci, rheumatic fever and rheumatic heart disease	3
Group A streptococcal infections	3
Rheumatic fever and rheumatic heart disease	5
Determinants of the disease burden of rheumatic fever and rheumatic heart disease	7
References	8
3. Pathogenesis of rheumatic fever	13
Introduction	13
Streptococcal M-protein	14
Streptococcal superantigens	14
The role of the human host in the development of rheumatic fever and rheumatic heart disease	15
Host-pathogen interaction	16
The role of environmental factors in RF and RHD	16
Conclusions	16
References	18
4. Diagnosis of rheumatic fever	20
Jones criteria for the diagnosis of rheumatic fever	20
2002–2003 WHO criteria for the diagnosis of rheumatic fever and rheumatic heart disease (based on the revised Jones criteria)	22
Diagnosis of rheumatic carditis	24
<i>Valvulitis/endocarditis</i>	24
<i>Myocarditis</i>	25
<i>Pericarditis</i>	26
Diagnosis of extracarditic manifestations of RF	26
Major manifestations	26
<i>Arthritis</i>	26
<i>Sydenham's chorea</i>	31
<i>Subcutaneous nodules</i>	34
<i>Erythema marginatum</i>	35
Minor manifestations	36
New diagnostic techniques for rheumatic carditis	36
<i>Echocardiography</i>	36
<i>Endomyocardial biopsy</i>	36
<i>Radionuclide imaging</i>	37
References	37
5. Diagnosis of rheumatic fever and assessment of valvular disease using echocardiography	41
The advent of echocardiography	41
Echocardiography and physiological valvular regurgitation	41

The role of echocardiography in the diagnosis of acute rheumatic carditis and in assessing valvular regurgitation	42
<i>Clinical rheumatic carditis</i>	42
<i>Classification of the severity of valvular regurgitation using echocardiography</i>	42
<i>Diagnosis of rheumatic carditis of insidious onset</i>	43
<i>The use of echocardiography to assess chronic valvular heart disease</i>	43
Diagnosis of recurrent rheumatic carditis	43
Diagnosis of subclinical rheumatic carditis	44
Conclusions: the advantages and disadvantages of Doppler echocardiography	45
References	46
 6. <b>The role of the microbiology laboratory in the diagnosis of streptococcal infections and rheumatic fever</b>	50
Diagnosis of streptococcal infection	50
Laboratory tests that support a diagnosis of RF	51
The role of the microbiology laboratory in RF prevention programmes	53
References	54
Appendix. WHO collaborating centres for reference and research on streptococci	55
 7. <b>Chronic rheumatic heart disease</b>	56
Mitral stenosis	56
Mitral regurgitation	60
Mixed mitral stenosis/regurgitation	61
Aortic stenosis	61
Aortic regurgitation	62
Mixed aortic stenosis/regurgitation	64
Multivalvular heart disease	64
References	65
Pregnancy in patients with rheumatic heart disease	67
References	68
 8. <b>Medical management of rheumatic fever</b>	69
General measures	69
Antimicrobial therapy	69
Suppression of the inflammatory process	69
Management of heart failure	70
Management of chorea	71
References	71
 9. <b>Surgery for rheumatic heart disease</b>	73
Indications for surgery in chronic valve disease	73
<i>Mitral stenosis (MS)</i>	74
<i>Mitral regurgitation (MR)</i>	74
<i>Aortic stenosis (AS)</i>	74
<i>Aortic regurgitation (AR)</i>	74
Contra-indications to surgery	75

Treatment options	76
<i>Balloon valvotomy (commissurotomy)</i>	76
<i>Surgical treatment</i>	76
Long-term complications	77
Long-term postoperative management	77
The role of surgery in active rheumatic carditis	78
References	80
 10. <b>Primary prevention of rheumatic fever</b>	 82
Epidemiology of group A streptococcal upper respiratory tract infection	82
Diagnosis of group A streptococcal pharyngitis	82
Laboratory diagnosis	83
Antibiotic therapy of group A streptococcal pharyngitis	85
Special situations	87
Other primary prevention approaches	87
References	87
 11. <b>Secondary prevention of rheumatic fever</b>	 91
Definition of secondary prevention	91
Antibiotics used for secondary prophylaxis: general principles	91
<i>Benzathine benzylpenicillin</i>	91
<i>Oral penicillin</i>	92
<i>Oral sulfadiazine or sulfasoxazole</i>	93
Duration of secondary prophylaxis	93
Special situations	93
Penicillin allergy and penicillin skin testing	94
References	95
 12. <b>Infective endocarditis</b>	 97
Introduction	97
Pathogenesis of infective endocarditis	97
Microbial agents causing infective endocarditis <sup>1</sup>	98
Clinical and laboratory diagnosis of infective endocarditis	98
Medical and surgical management of infective endocarditis	100
Prophylaxis for the prevention of infective endocarditis in patients with rheumatic valvular heart disease	101
Summary	105
References	105
 13. <b>Prospects for a streptococcal vaccine</b>	 106
Early attempts at human immunization	106
M-protein vaccines in the era of molecular biology	106
Immunization approaches not based on streptococcal M-protein	107
Epidemiological considerations	107
Conclusion	108
References	108
 14. <b>The socioeconomic burden of rheumatic fever</b>	 111
The socioeconomic burden of rheumatic fever	111
Cost-effectiveness of control programmes	112
References	113
