Contents .....	i
Acknowledgments .....	ii
Abbreviations .....	iii
Introduction .....	1
1 Characteristics of emphasis .....	3
1.1 Characteristics of pharyngealized articulation in Arabic .....	4
1.2 Characteristics of glottalized articulation .....	6
1.3 Characteristics of individual emphatic consonants .....	7
1.3.1 Emphatic <i>t</i> .....	7
1.3.2 Uvular <i>q</i> .....	9
1.3.3 Emphatic <i>d</i> .....	11
1.3.4 Emphatic <i>s</i> .....	12
1.3.5 Emphatic <i>z</i> .....	13
1.3.6 Other emphatic phonemes .....	13
2 The relation between pharyngealization and glottalization .....	16
2.1 Analysis of the alternations .....	20
2.1.1 Emphatic <i>t</i> and its alternation with voiced <i>d</i> .....	20
2.1.2 Uvular <i>q</i> and its alternation with voiced <i>ḡ</i> .....	24
2.1.3 Emphatic <i>s</i> and its alternation with voiced <i>z</i> .....	29
2.2 Analysis of the control set: Phonetically conditioned doublets ...	32
2.2.1 Emphatic <i>t</i> and its alternation with non-voiced <i>t</i> .....	33
2.2.2 Uvular <i>q</i> and its alternation with non-voiced <i>k</i> .....	36
2.2.3 Emphatic <i>s</i> and its alternation with non-voiced <i>s</i> .....	39
2.3 Analysis of the control set: Phonologically and phonetically non-related doublets .....	41
2.3.1 Doublets with the alternation of <i>b/r</i> .....	42
2.3.2 Doublets with the alternation of <i>t/ḡ</i> .....	44
3 Summary and conclusions .....	46
3.1 Evaluation of the sets of alternations .....	46
3.2 Phonetic environment of the alternations .....	49
3.3 Semantic distribution of the alternations .....	50
3.4 Conclusions .....	50
3.5 Model of the development of pharyngealization in Arabic/Semitic	54
4 Supplement: Lists of doublets .....	55
References .....	81
