## INTRODUCTION

1	Supramolecular applications of cyclodextrins .....	7
1.1	Case binding studies .....	7
1.2	Advanced bioorganic systems .....	7
1.3	Supramolecular nanocarriers .....	8
1.3.1	Vesicles .....	8
1.3.2	Micelles .....	9
1.3.3	Supramolecular nanoparticles .....	9
1.3.3.1	Rotaxane and polyrotaxane based nanoparticles .....	9
1.3.3.2	Host-guest interaction induced nanoparticles .....	10
1.3.3.3	Host-guest nanohybrids .....	10
1.3.3.3.1	On-off switch on nanoparticles .....	10
1.3.3.3.2	Other nanohybrids .....	10
1.3.4	Supramolecular hydrogels .....	11
2	Supramolecular applications of cucurbiturils .....	11
2.1	Analytical applications using fluorescence spectrometry .....	12
2.2	Biomedical applications .....	12
2.2.1	Supramolecular nanocarriers .....	12
2.2.1.1	Vesicles .....	12
2.2.1.2	Micelles .....	13
2.2.1.3	Supramolecular nanoparticles .....	13
2.2.1.3.1	On-off switch on nanoparticles .....	13
2.2.1.3.2	Other nanohybrids with host-guest interactions .....	13
2.2.1.3.3	Supramolecular hydrogels .....	14
2.3	Bioimaging .....	14

## RESULTS AND DISCUSSION

3	Supramolecular studies of tripod guests <b>4</b> and <b>6</b> .....	16
3.1	Synthesis of guests .....	16
3.2	Binary systems .....	20
3.3	Ternary systems .....	22
3.4	Mass spectrometry .....	24
4	Binding studies of the guests with stilbene centerpiece .....	24
4.1	Synthesis of guests .....	25
4.2	Binding properties of ( <b>Z</b> )- <b>20</b> .....	30
4.3	( <b>E</b> )/( <b>Z</b> ) interconversion of guests <b>20</b> and <b>21</b> .....	32
5	Binding studies of the guests with diphenylacetylene centerpiece .....	32
5.1	Synthesis of guests .....	33
5.2	Binding properties of guest <b>22</b> .....	34
5.3	Binding properties of guest <b>24</b> .....	38
5.4	Binding properties of guest <b>23</b> .....	42
	CONCLUSION .....	44
	References .....	44
