

CONTENTS

1	INTRODUCTION	7
2	A MULTIMEDIA ANALYTICS MODEL	11
2.1	Introduction	12
2.2	Human perception of multimedia	13
2.2.1	Representation and learning	14
2.2.2	Multimedia visualization	15
2.3	Machine perception of multimedia	19
2.3.1	Representation and learning	19
2.3.2	Interaction	23
2.4	Multimedia analytics	25
2.4.1	Model	25
2.4.2	Pioneer systems	31
2.4.3	Research agenda	33
2.5	Conclusion	34
3	INSTANTIATING THE MODEL	35
3.1	Introduction	36
3.2	Related Work	38
3.2.1	Unimodal approaches	39
3.2.2	Multimodal approaches	40
3.3	Data Collection	41
3.4	Topical Analysis of Users and Venues	42
3.4.1	Feature Extraction	43
3.4.2	Semantic User and Venue Topics	44
3.5	Interactive Venue Recommendation	44
3.6	Experimental Setup	47
3.6.1	Data	47
3.6.2	Evaluated Algorithms	48
3.6.3	Experimental Procedure	49
3.7	Experimental Results	50
3.7.1	General Performance Evaluation	50
3.7.2	Analysis of User and Venue Topic Configurations	51
3.7.3	Modality Analysis	52
3.7.4	Nature of Generated Recommendations	53
3.8	Conclusion	54
4	EVALUATING ANALYTIC QUALITY	55
4.1	Introduction	56
4.2	Related work	58
4.3	Method	60
4.3.1	Evaluating analytic tasks	60
4.3.2	Artificial actors	62
4.3.3	Evaluation pipeline	65

	4.3.4	Evaluation measures	67
	4.3.5	Interpretation	69
	4.4	Showcase	71
	4.5	Conclusion	75
5	SCALING UP MULTIMEDIA ANALYTICS		77
	5.1	Introduction	78
	5.2	Related Work	81
	5.3	Data Representation	82
	5.3.1	Feature Selection	83
	5.3.2	Compression and Decompression	84
	5.3.3	The Ratio-64 Representation	87
	5.4	Interactive Learning	88
	5.5	Experimental Setup	90
	5.6	Results and Discussion	95
	5.7	Conclusion	99
6	CONCLUSION		101
	6.1	Summary	101
	6.2	Reflections and Future Work	103
	Bibliography		105
