Preface, Urban O., Jansen M.A.K.	3
About UV4Plants	5
Scientific programme	6
Eight years of combined UV and temperature exposure studies of dioecious <i>Salicaceae</i> species – what have we learned?, <u>Nybakken L.</u> , Nissinen K., Sivadasan U., Strømme C., Virjamo V., Lavola A., Randriamanana T., Julkunen-Tiitto R.	8
Short- and long-term interactive effects of ultraviolet radiation and elevated CO ₂ concentration on physiological traits of European beech saplings, <u>Urban O.</u> , Holub P., Rapantová B., Večeřová K., Klem K.	10
Modulation of plant UV-responses by water availability in Mediterranean plant species, <u>Llorens L.</u> , Díaz-Guerra L., Bernal M., Font J., Verdaguer D.	12
Combined effects of drought and UV in growth chamber experiments, <u>Mátai A.</u> , Nagy D., Hideg É.	14
The crucial aspect of the interactions between ecosystems environmental factors and the role of shared international infrastructures to address this interaction challenge with, in particular, the case of light quality in growth chambers, <u>Roy J.</u>	16
Does UV-B affects sensitivity to gamma radiation in plants?, Blagojevic D., Lee Y.K., Xie L., Brede D.A., Lind O.C., Salbu B., Nybakken L., Tollefsen K.E., Solhaug K.A., <u>Olsen J.E.</u>	18
UV-responses as drivers of pre-emptive cross-acclimation, <u>Aphalo P.J.</u>	20

Integrating UV-B signalling in to plant shade avoidance and thermomorphogenesis networks, <u>Sharma A.</u> , Hayes S., Fraser D.P., Cragg-Barber C.K., Sharma B., Jenkins G.I., Franklin K.A.	22
Does simulated understorey blue light and UV-A radiation provide acclimation to high-light stress in photoreceptor mutants of <i>Arabidopsis thaliana</i> ? <u>Brelsford C.C.</u> , Morales L.O., Nezval J., Kotilainen T., Hartikainen S.M., Aphalo P.J., Robson T.M.	24
Different responses to solar ultraviolet (UV) and blue radiation in two cultivars of <i>Vicia faba</i> , <u>Yan Y.</u> , Neugart S., Aphalo P.J.	26
Spectral quality and total irradiance of visible light as important environmental factors enhancing production of UV-protective phenolic compounds, <u>Nezval J.</u> , Karlický V., Materová Z., Semer J., Špunda V., Konečná T.	28
Influence of abiotic UV-B stress responses on biotic stress exerted by bacterial pathogens, <u>Schenke D.</u> , Cai D.	30
Effects of UV on secondary compounds and growth rate in lichens, <u>Solhaug K.A.</u> , Alam Md.A., Lucas P.-L., Kann I.K., Chowdhury D.P., Gauslaa Y.	32
Low temperature induced epidermal screening in <i>Arabidopsis thaliana</i> leaves protects against enhanced damage of photosystem II by UV-B radiation, Schultze M., <u>Bilger W.</u>	34
The UVB photoreceptor UVR8 mediates accumulation of UV-absorbing pigments, but not changes in plant morphology, under outdoor conditions, Coffey A.M., Ryan L.M., Prinsen E., <u>Jansen M.A.K.</u>	36
Interactive effects of ultraviolet radiation and nitrogen supply on photoprotection in plants, <u>Klem K.</u> , Novotná K., Oravec M., Urban O.	38
