Preface

Part One Speech Production and Development

Sara Howard and Anette Lohmander

1 Physical Structure and Function and Speech Production

Associated with Cleft Palate

Martin Atkinson and Sara Howard

- 1.1 Introduction
- 1.2 The Hard and Soft Palates and the Velopharynx
- 1.3 The Tonsils and Adenoids
- 1.4 The Larynx
- 1.5 The Jaws, Dentition and Occlusion
- 1.6 Symmetry: Structure and Function
- 1.7 The Tongue
- 1.8 The Lips
- 1.9 Summary: Compensations Across Systems

2. The Development of Speech in Children with Cleft Palate

The Development of Speech in Children with Cleft Palate

Kathy L. Chapman and Elisabeth Willadsen

- 2.1 Overview
- 2.2 The Impact of Clefting on Speech Production
- 2.3 Variables Impacting Speech Development for Young Children with Cleft Palate
- 2.4 Speech Development: Birth to Age Five
- 2.5 Conclusion

References

3 The Influence of Related Conditions on Speech

and Communication

Christina Persson and Lotta Siögreen

3.1 Introduction

3.2 Conditions Related to Structural Etiologies

3.3 Conditions Related to Neurological Aetiology

3.4	Conditions Related to a Combination of Structural and Neurological Aetiology	49
3.5	Clinical Implications	50
	References	50
4	Surgical Intervention and Speech Outcomes in Cleft Lip and Palate	55
	<i>Anette Lohmander</i>	
4.1	Introduction	55
4.2	Basics of Surgery on Cleft Palate	57
4.3	Basics of Outcomes	64
4.4	Speech Outcomes	65
4.5	Conclusion	69
	Appendix 4.A Review of Evidence and Methodology in Studies of Speech Outcome in Individuals Born with Cleft Lip and Palate	70
	References	82
5	Secondary Management and Speech Outcome	87
	<i>John E. Riski</i>	
5.1	Introduction	87
5.2	Secondary Surgical Management of Velopharyngeal Incompetence	88
5.3	Secondary Pharyngeal Flap	88
5.4	Posterior Pharyngeal Wall Augmentation by Muscle Transposition	91
5.5	Studies Comparing Treatments of VPI	94
5.6	Posterior Pharyngeal Wall Augmentation by Implants and Injections	95
5.7	Velarplasty	96
5.8	Other Considerations in Managing VPI	97
5.9	Complications Secondary to Pharyngoplasties	99
5.10	Conclusions	99
	References	100
6	Cleft Palate Speech in the Majority World: Models of Intervention and Speech Outcomes in Diverse Cultural and Language Contexts	105
	<i>Debbie Sell, Roopa Nagarajan and Mary Wickenden</i>	
6.1	Introduction	105
6.2	Speech Outcomes in a Majority World Context	106
6.3	Different Models of Provision	109
6.4	Attitudes/Cultural Aspects	115
6.5	Conclusion	119
	References	119
Part Two	Speech Assessment and Intervention	123
	<i>Anette Lohmander and Sara Howard</i>	
7	Phonetic Transcription for Speech Related to Cleft Palate	127
	<i>Sara Howard</i>	

7.1	Introduction	127
7.2	What is Phonetic Transcription?	128
7.3	Why Transcribe?	129
7.4	What to Transcribe and How to Transcribe It	130
7.5	Features of Cleft Speech Production	131
7.6	Pitfalls of Transcription	134
7.7	Conclusion	138
	Appendices	139
	References	142

8 Instrumentation in the Analysis of the Structure and Function of the Velopharyngeal Mechanism

<i>Debbie Sell and Valerie Pereira</i>		
8.1	Introduction	145
8.2	Visualization of the Velopharyngeal Mechanism	147
8.3	Multiview Videofluoroscopy	147
8.4	Nasendoscopy Procedure	151
8.5	Magnetic Resonance Imaging (MRI)	155
8.6	Variability in Practice	158
8.7	Future	162
	References	162

9 Cross Linguistic Perspectives on Speech Assessment in Cleft Palate

<i>Gunilla Henningsson and Elisabeth Willadsen</i>		
9.1	Introduction	167
9.2	Vulnerable Speech Sounds	168
9.3	Language Background of the Listener Assessing the Speech of Children with Cleft Palate	170
9.4	What Is Known about More Unfamiliar Languages?	173
9.5	Cross Linguistic Speech Samples	173
9.6	Influence on Assessment of Language Acquisition in the Young Child with Cleft Palate	176
9.7	Conclusion	177
	References	177

10 Voice Assessment and Intervention

<i>Lesley Cavalli</i>		
10.1	Introduction	181
10.2	Defining a Voice Disorder	181
10.3	Assessment	184
10.4	Instrumental Assessment	189
10.5	Vocal Handicap Measures	190
10.6	Treatment	191
10.7	Conclusion	195
	References	196

11 Nasality – Assessment and Intervention

<i>Triona Sweeney</i>	
-----------------------	--

11.1	Introduction	199
11.2	Perceptual Assessment of Nasality and Nasal Airflow Errors	205
11.3	Instrumental Assessment of Nasality and Nasal Airflow Errors	207
11.4	Interpreting Results	211
11.5	Intervention	214
11.6	Conclusion	216
Appendix 11.A Temple Street Scale of Nasality and Nasal Airflow Errors		217
References		217
12	Articulation – Instruments for Research and Clinical Practice	221
<i>Fiona E. Gibbon and Alice Lee</i>		
12.1	Introduction	221
12.2	Electropalatography (EPG)	222
12.3	Imaging Techniques	228
12.4	Motion Tracking	233
12.5	Conclusion	235
Acknowledgement		235
References		235
13	Psycholinguistic Assessment and Intervention	239
<i>Joy Stackhouse</i>		
13.1	Introduction	239
13.2	What is a Psycholinguistic Approach?	240
13.3	A Psycholinguistic Assessment Framework	242
13.4	Intervention from a Psycholinguistic Perspective	245
13.5	Literacy: Phonological Awareness and Spelling	250
13.6	Summary	254
References		255
14	Early Communication Assessment and Intervention	259
<i>Nancy Scherer and Brenda Louw</i>		
14.1	Introduction	259
14.2	Assessment	260
14.3	Intervention	267
References		272
15	Phonological Approaches to Speech Difficulties Associated with Cleft Palate	275
<i>Anne Harding-Bell and Sara Howard</i>		
15.1	Introduction	275
15.2	Variability, Variation and Compensation	277
15.3	Classification of Speech Difficulties Related to Cleft Palate	278
15.4	Phonological Assessment of Speech Data Related to Cleft Palate	278
15.5	Phonological Consequences of Speech Production Related to Cleft Palate	279
15.6	Intervention	283
15.7	Summary	287
References		288
16	Speech Intelligibility	293
<i>Tara L. Whitehill, Carrie L. Gotzke and Megan Hodge</i>		

16.1	Introduction	293
16.2	Definition of Intelligibility and Related Concepts	294
16.3	Measurement Issues	294
16.4	Studies of Intelligibility in Speakers with Cleft Palate	296
16.5	Current and Future Developments	298
16.6	Conclusion	300
	References	301

17 Communicative Participation 305

Christina Havstam and Anette Lohmander

17.1	Introduction	305
17.2	ICF	306
17.3	Communicative Participation	307
17.4	Conclusions and Clinical Implications	312
	References	312

18 Evaluation and Evidence-Based Practice 317

Linda D. Vallino-Napoli

18.1	Introduction	317
18.2	Intervention for Speech Disorders	318
18.3	Evidence-Based Practice	319
18.4	The Systematic Review Process	323
18.5	Evidence Findings Establishing Therapy Effectiveness	325
18.6	Instrumentation – Visual Feedback	349
18.7	Surgery	350
18.8	Comments about Intervention Effectiveness	351
18.9	Intervention and the International Classification of Function (ICF)	352
18.10	Research Designs for Intervention Studies	352
18.11	Conclusions	352
	Appendix 18.A Commonly Used Evidence Hierarchies for Intervention Studies	354
	References	354

Index 359

Christina Havstam, PhD is currently a Professor in the Department of Communication Sciences and Disorders at the University of Utah, USA. She currently teaches courses in phonological disorders in children, cleft palate, and research methods. Her research has focused on children with specific language impairment and language and phonological development of young children with cleft palate. She is especially interested in the impact of clefting on the developing speech sound system. Dr Chapman has numerous data-based articles and presentations related to these areas of study.

Silvana E. Gibbons

Silvana E. Gibbons, PhD, is a speech and language therapist and Professor and Head of Speech and Hearing Sciences at University College Cork, Ireland. Her research focuses on the use of instrumentation to diagnose and treat speech disorders, particularly those associated with cleft palate. She has published over seventy papers and book chapters, and has been awarded a number of research council and charity funded grants to investigate cleft palate speech. She is a Fellow of the Royal College of Speech and Language Therapists.
