

Table of Contents

6th Summer School on Applied Mathematics and Informatics	9
Knowledge discovery for black-box optimization <i>HOLEŇA Martin</i>	13
Statistical methods for comparison of evolutionary algorithms <i>TVRDÍK Josef</i>	15
ISCAMI Abstracts	17
The functional equation for the Riemann zeta function <i>BAČÍK M.</i>	19
Global Measures for Fuzzy Association Rules <i>BURDA M., RUSNOK P.</i>	20
Fuzzy Relation Equations with Fuzzy Quantifiers - Some Initial Observations <i>CAO N., ŠTĚPNIČKA M.</i>	21
Chosen Properties of Fuzzy Relational Compositions Based on Fuzzy Quantifiers <i>CAO N., ŠTĚPNIČKA M., HOLČAPEK M.</i>	22
Differential Evolution with Eigenvector Crossover Solving Rotated Problems <i>EINŠPIGLOVÁ D., ZÁMEČNÍKOVÁ H., STUHLÍK D.</i>	23
Numerical solution of the eigenvalue of a problem with a random variable <i>GAYNUTDINOVA L.</i>	24
A Hierarchical Graph-based Algorithm for Image Segmentation <i>GUADA C., GOMEZ D., RODRIGUEZ J. T., YANEZ J., MONTERO J.</i>	25
Towards visual training set generation framework <i>HŮLA J., PERFILIEVA I.</i>	27
Aggregation of distance, dissimilarity and divergence measures <i>KOBZA V., SIWIEC A.</i>	28
New Results In Counting Process Theory <i>KOLLERT O.</i>	30
Stability of simply supported Timoshenko beam under tensile or compressive load <i>KOREC E., JIRÁSEK M.</i>	32

Adaptive Quasicontinuum Simulation of Crack Propagation in Disordered Lattices <i>MIKEŠ K., JIRÁSEK M.</i>	33
Overview of soft computing methods to creditworthiness scoring <i>MIRSHAHI S., PERFILIEVA I.</i>	35
Special and inversely special properties for different families of fuzzy implications <i>MIS K.</i>	36
Image contours detection with deep features <i>MOLEK V.</i>	38
A New Representation of The Discrete F^m -transform <i>NGUYEN L.</i>	39
Fuzzy Logic Analysis for sound recognition <i>PARENICA J.</i>	40
Kurzweil-Henstock integral for IF-functions <i>POVAŽAN J.</i>	41
Classification of multispectral remote sensing images: some remarks on fuzzy logic based approach <i>PUKITIS M.</i>	42
Fuzzy Decision Matrices with Underlying Fuzzy Probability Measure <i>ROTTEROVÁ P., PAVLAČKA O.</i>	44
Strengthened ordered directionally monotone functions <i>SESMA-SARA M., DE MIGUEL L., LAFUENTE J., MESIAR R., KOLESÁROVÁ A., BUSTINCE H.</i>	45
Distance and dissimilarity functions for fuzzy sets <i>SIWIEC A., MONTES S., DIAZ S.</i>	47
Diversity of population in differential evolution <i>STUHLÍK D., ZÁMEČNÍKOVÁ H., EINŠPIGLOVÁ D.</i>	49
Description of Tomonoid Partition in the Language of Category Theory <i>SUCHÁNEK R.</i>	50
Equivalence of positive topological sequence entropy and Li-Yorke chaos of non-autonomous dynamical systems <i>ŠOTOLOVÁ J.</i>	52
Fuzzification of probability and mathematical structures <i>ŠTIBEROVÁ D.</i>	53
Convergence of the numerical scheme for regularised Riemannian mean curvature flow equation <i>TIBENSKÝ M., HANDLOVIČOVÁ A.</i>	54
Stabilizers and t -filters on Residuated Lattices <i>VÍTA M.</i>	56

Fuzzy Clustering of Categorical Data – Case Study of Segmentation of Classical Music Audience

VÍTOVÁ DUŠKOVÁ M., VÍTA M. 57

Is Differential Evolution Rotationally Invariant?

ZÁMEČNÍKOVÁ H., STUHLÍK D., EINŠPIGLOVÁ D. 58

Author index 61
