## **SOME COMMON MISTAKES ABOUT CONSCIENTIOUS OBJECTIONS ..... 68**

*Javier Martínez-Torrón*

1. Definitional issues .....	68
2. Two basic approaches to the legal treatment of conscientious objections .....	71
3. Some common mistakes about conscientious objections .....	73
Conscientious objectors lack solidarity and civic spirit, as demonstrated by their rejection to obey a democratically approved law .....	73
Conscientious objection should not be recognized, for the law must be equal for all, and all citizens must be obliged to comply with legal provisions. Granting the legal exemption requested by objectors would be discriminatory for those who refuse to obey the law on other grounds .....	74

Conscientious objection should not be recognized, for it is an expression of a private interest and the state must protect the public interest represented by the law .....	75
Conscientious objections should not be recognized because it would make the enforceability of the law contingent upon the voluntary acceptance of each individual, which would ultimately lead to the disintegration of legal order .....	76
Conscientious objections should not be protected, for it would grant objectors the right to impose their moral opinions on others, against the ethical neutrality of the law .....	77
In the best of cases, the recognition of legal exemptions derived from conscientious objection should depend on the “reasonableness” of the relevant moral principles at issue .....	78
Conscientious objections are legitimate only when they are explicitly recognized by the legislator. In the absence of a specific legislative provision, judges cannot grant conscientious objectors any exemption from legal obligations of general applicability .....	79
When the legislator decides to recognize a certain type of conscientious objection, it must impose at the same time some kind of substitutive service or activity on objectors .....	80

5. Freedom of conscience and state neutrality .....	82
