List of Reproducible Forms	vii
About the Author	ix
1. Developing Mathematical Promise	1
What Is Mathematical Promise?	1
Who Are Mathematically Promising?	3
What Are the Goals of Mathematics Instruction?	5
How Might We Find and/or Create Good Problems to Explore?	5
What Models Might We Use to Increase the Numbers and Levels of Mathematically Promising Students?	7
How Should We Assess Success?	10
Structure of the Activities in This Book	12
Reproducible Forms	14
2. Number and Operations	17
Investigation One: How Many Ways?	18
Investigation Two: Same Sums	22
Investigation Three: All in a Row	29
3. Algebra	43
Investigation One: Where Am I?	44
Investigation Two: Heads or Tails?	48
Investigation Three: Field of Dreams	55

4. Geometry and Measurement 75

Investigation One: Framed	76
Investigation Two: Shape Up	80
Investigation Three: Connect the Dots	89

5. Data Analysis and Probability 105

Investigation One:	
Who's Got the Button?	106
Investigation Two: On Your Mark	113
Investigation Three: Bull's-Eye	118
