

TABLE OF CONTENTS

Introduction by Edward Peters	1
Chapter 1. The Early Middle Ages	27
Chapter 2. The Twelfth Century	37
Selections from Adelard of Bath, <i>Natural Questions</i>	38
Selections from Anonymous, <i>On the Elements</i>	52
Chapter 3. Robert Grosseteste and Scientific Method	61
Selections from Robert Grosseteste, <i>The Impressions of the Elements</i>	65
Selections from Robert Grosseteste, <i>The Heat of the Sun</i>	68
Chapter 4. The Tides	73
Selections from Robert Grosseteste, <i>An Inquiry into the Causes of the Tides</i>	74
Chapter 5. Studies of the Rainbow	81
Selections from Carl B. Boyer, "The Theory of the Rainbow: Medieval Triumph and Failure," <i>Isis</i> . XLIX (1958), 378-390	94
Chapter 6. Studies of Local Motion	102
Selection from H. Lamar Crosby, Jr., ed., <i>Thomas of Bradwardine His Tractatus de Proportionibus</i>	105
Selections from John Buridan, <i>Questions on the Heavens and the World</i>	111
Selections from Marshall Clagett, <i>The Science of Mechanics in the Middle Ages</i>	121
Selections from Nicole Oresme, <i>On the Book of the Heavens and the World of Aristotle</i>	124

Chapter 7. Astronomy	125
Selections from John Buridan, <i>Questions on the Heavens and the World</i>	127
Selections from Nicole Oresme, <i>On the Book of the Heavens and the World of Aristotle</i>	131
Chapter 8. The Fringes of Science	139
Selections from Daniel of Morley, <i>On the Natures of Things Above and Below</i>	141
Selections from Marius, <i>On the Elements</i>	148
Selections from Robert Grosseteste, <i>Hexaëmeron</i>	152
Selections from Richard Fishacre, <i>Commentary on the Sentences</i>	155
Selections from Michael Scot, <i>Liber introductorius</i> and <i>Prooemium</i>	157
Selections from Roger Bacon, <i>Opus maius</i>	162
Selections from Roger Bacon, <i>Opus tertium</i>	165
Chapter 9. Conclusions	170
<i>Bibliographical Essay</i>	177

LIST OF FIGURES

Figure One	Simplified diagram of Aristotle's theory of the rainbow	82
Figure Two	One possible interpretation of Grosseteste's theory of the rainbow	85
Figure Three	The paths of rays through a "raindrop" according to Theodoric of Freiberg	90
Figure Four	How different colors appear in drops at different elevations according to Theodoric of Freiberg	91
Figures Five and Six	Theodoric's illustrations of how the secondary rainbow is produced	92, 93
Figure Seven	Geometric construction for comparing Theodoric's and Descartes' studies of the "rainbow angle"	99
Figure Eight	One of Marius' tables showing how the elements combine	147
