Preface.....	xxi
Disclaimer.....	xxv
Acknowledgments.....	xxvii
Authors.....	xxix
Abbreviations.....	xxxix
 Chapter 1	
Background.....	1
1.1 Introduction.....	1
1.2 Population and Energy Demand.....	2
1.3 Current World Energy Use Patterns.....	2
1.4 Exponential Growth.....	6
1.4.1 Introduction.....	6
1.4.2 Compound Interest.....	6
1.4.3 Doubling Time.....	7
1.4.4 Accumulation.....	8
1.4.5 Resource Lifetime in an Exponential Environment.....	9
1.5 Hubbert's Gaussian Model.....	10
1.6 Net Energy, BTU Economics, and the Test for Sustainability.....	12
1.7 Direct Conversion of Sunlight to Electricity with PV.....	13
1.8 Energy Units.....	15
References.....	19
Suggested Reading.....	20
 Chapter 2	
The Sun.....	23
2.1 Introduction.....	23
2.2 The Solar Spectrum.....	23
2.3 Effect of Atmosphere on Sunlight.....	25
2.4 Sunlight Specifics.....	27
2.4.1 Introduction.....	27
2.4.2 Definitions.....	28
2.4.3 The Orbit and Rotation of the Earth.....	29
2.4.4 Tracking the Sun.....	31
2.4.5 Measuring Sunlight.....	34
2.4.5.1 Precision Measurements.....	34
2.4.5.2 Less Precise Measurements.....	35
2.5 Capturing Sunlight.....	35
2.5.1 Maximizing Irradiation on the Collector.....	35
2.5.2 Shading.....	38
2.5.2.1 Field Measurement of Shading Objects.....	38
2.5.2.2 Computational Methods of Determining Shading.....	40

2.5.3	Special Orientation Considerations	41
2.5.3.1	Horizontal Mounting.....	41
2.5.3.2	Non-South-Facing Mounting	41
References.....		46
Suggested Reading.....		47
 Chapter 3		
Introduction to PV Systems		49
3.1	Introduction.....	49
3.2	The PV Cell.....	50
3.3	The PV Module.....	54
3.4	The PV Array	56
3.5	Energy Storage	57
3.5.1	Introduction.....	57
3.5.2	The Lead-Acid Storage Battery	58
3.5.2.1	Chemistry of the Lead-Acid Cell	58
3.5.2.2	Properties of the Lead-Acid Storage Battery	60
3.5.3	Lithium-Ion Battery Technologies.....	64
3.5.4	Nickel-Based Battery Systems.....	66
3.5.4.1	Nickel–Cadmium Batteries.....	66
3.5.4.2	Nickel–Zinc Batteries.....	67
3.5.4.3	Nickel–Metal Hydride Batteries.....	67
3.5.5	Emerging Battery Technologies.....	68
3.5.6	Hydrogen Storage.....	70
3.5.7	The Fuel Cell.....	71
3.5.8	Other Storage Options	71
3.6	PV System Loads	72
3.7	PV System Availability: Traditional Concerns and New Concerns.....	73
3.7.1	Traditional Concerns as Applied to Stand-Alone Systems.....	73
3.7.2	New Concerns about PV System Availability	77
3.8	Associated System Electronic Components.....	78
3.8.1	Introduction.....	78
3.8.2	Charge Controllers.....	78
3.8.2.1	Charging Considerations	79
3.8.2.2	Discharging Considerations	82
3.8.3	Maximum Power Point Trackers and Linear Current Boosters.....	82
3.8.4	Inverters	86
3.8.4.1	Square Wave Inverters.....	87
3.8.4.2	Modified Sine Wave Inverters	89
3.8.4.3	PWM Inverters	91
3.8.4.4	Transformerless Inverters.....	95
3.8.4.5	Other Desirable Inverter Features	95
3.9	Generators	97
3.9.1	Introduction.....	97

3.9.2	Types and Sizes of Generators.....	97
3.9.3	Generator Operating Characteristics	98
3.9.3.1	Rotation Speed	98
3.9.3.2	Efficiency versus Electrical Load.....	99
3.9.3.3	Fuel Types	100
3.9.3.4	Altitude Effects	101
3.9.3.5	Waveform Harmonic Content.....	101
3.9.3.6	Frequency Stability	101
3.9.3.7	Amplitude Stability	101
3.9.3.8	Noise Level.....	102
3.9.3.9	Type of Starting.....	102
3.9.3.10	Overload Characteristics	102
3.9.3.11	Power Factor Considerations	102
3.9.4	Generator Maintenance.....	102
3.9.5	Generator Selection.....	103
3.10	Balance of System Components.....	103
3.10.1	Introduction.....	103
3.10.2	Switches, Circuit Breakers, Fuses, and Receptacles.....	104
3.10.3	Ground Fault, Arc Fault, Surge, and Lightning Protection	105
3.10.3.1	Grounding versus Grounded and Ground Fault Protection	105
3.10.3.2	Arc Fault Protection	105
3.10.3.3	Surge Protection	106
3.10.4	Inverter Bypass Switches and Source Circuit Combiner Boxes.....	106
3.10.4.1	Inverter Bypass Switches	106
3.10.4.2	Source Circuit Combiner Boxes.....	106
3.10.5	Grounding Devices	107
3.10.6	Rapid Shutdown	107
	References.....	111
	Suggested Reading.....	112
Chapter 4		
	Grid-Connected Utility-Interactive Photovoltaic Systems	113
4.1	Introduction.....	113
4.2	Applicable Codes and Standards	114
4.2.1	The <i>National Electrical Code</i>	114
4.2.1.1	Introduction	114
4.2.1.2	Voltage Drop and Wire Sizing	116
4.2.2	IEEE Standard 1547-2003	119
4.2.2.1	Introduction	119
4.2.2.2	Specific Requirements.....	119
4.2.2.3	Comparison of PV Inverters to Mechanically Rotating Generators	123
4.2.2.4	Islanding Analysis	123

4.2.3	Other Issues.....	125
4.2.3.1	Aesthetics	125
4.2.3.2	Electromagnetic Interference	126
4.2.3.3	Surge Protection	126
4.2.3.4	Structural Considerations	127
4.3	Design Considerations for Straight Grid-Connected PV Systems.....	128
4.3.1	Determining System Energy Output	128
4.3.2	Array Installation.....	130
4.3.3	Inverter Selection and Mounting	130
4.3.4	Other Installation Considerations	132
4.4	Design of a System Based on Desired Annual System Performance	132
4.4.1	Array Sizing.....	132
4.4.2	Inverter Selection	133
4.4.3	Module Selection	134
4.4.4	Balance of System.....	136
4.4.4.1	Wiring from Array to Rooftop Junction Box	137
4.4.4.2	Wire and Conduit from Rooftop Junction Box to Inverter.....	138
4.4.4.3	Rapid Shutdown	141
4.4.4.4	Ground Fault and Arc Fault Protection	142
4.4.4.5	DC and AC Disconnects and Overcurrent Protection....	142
4.4.4.6	Point of Utility Connection	143
4.4.4.7	Final System Electrical Schematic Diagram.....	144
4.5	Design of a System Based upon Available Roof Space	145
4.5.1	Array Selection	145
4.5.2	Inverter Selection	149
4.5.3	Balance of System.....	149
4.5.3.1	Wiring from Array to Rooftop Junction Box	149
4.5.3.2	Rapid Shutdown, Ground Fault, and Arc Fault Protection	151
4.5.3.3	DC and AC Disconnects and Overcurrent Protection....	151
4.5.3.4	Point of Utility Connection	152
4.5.3.5	Estimating System Annual Performance	152
4.5.3.6	Final System Electrical Schematic Diagram.....	153
4.5.4	Extension of Design to Lower Wind Speed Region	153
4.6	Design of a Microinverter-Based System.....	154
4.6.1	Introduction.....	154
4.6.2	System Design.....	155
4.6.3	Bells and Whistles (i.e., Monitoring Possibilities).....	156
4.7	Design of a Nominal 20 kW System That Feeds a Three-Phase Distribution Panel	157
4.7.1	Introduction.....	157
4.7.2	Inverter.....	157
4.7.3	Modules.....	158
4.7.4	System DC Wiring.....	159

4.7.5 System AC Wiring 161

4.7.5.1 Wire and Overcurrent Protection Sizing 161

4.7.5.2 Voltage Drop Calculations 162

4.7.6 Annual System Performance Estimate 163

4.8 Design of a Nominal 500-kW System 163

4.8.1 Introduction..... 163

4.8.2 Inverter..... 163

4.8.3 Modules and Array 164

4.8.4 Configuring the Array..... 164

4.8.4.1 Sizing the Array 164

4.8.4.2 Combiner Boxes 165

4.8.4.3 Array Layout 166

4.8.5 Wire Sizing and Voltage Drop Calculations..... 168

4.8.5.1 Source-Circuit Calculations 168

4.8.5.2 Combiner to Recombiner Wiring
(PV Output Circuits)..... 170

4.8.5.3 Disconnects, GFDI, and Overcurrent Protection
on the DC Side of the Inverter 171

4.8.6 AC Wire Sizing, Disconnects, and Overcurrent Protection 171

4.8.7 Arc Flash Calculations..... 172

4.8.7.1 Introduction 172

4.8.7.2 AC Voltage Sources..... 173

4.8.7.3 DC Current Sources 174

4.9 System Commissioning..... 176

4.10 System Performance Monitoring 178

References..... 183

Suggested Reading..... 184

Chapter 5

Mechanical Considerations..... 185

5.1 Introduction..... 185

5.2 Important Properties of Materials..... 185

5.2.1 Introduction..... 185

5.2.2 Stress and Strain 186

5.2.3 Strength of Materials 190

5.2.4 Column Buckling 190

5.2.5 Thermal Expansion and Contraction 191

5.2.6 Chemical Corrosion and Ultraviolet Degradation 193

5.2.7 Properties of Steel..... 195

5.2.8 Properties of Aluminum 196

5.3 Establishing Mechanical System Requirements 198

5.3.1 Mechanical System Design Process 198

5.3.2 Functional Requirements 198

5.3.3 Operational Requirements 199

5.3.4	Constraints	200
5.3.5	Trade-Offs.....	200
5.4	Design and Installation Guidelines	201
5.4.1	Standards and Codes.....	201
5.4.2	Building Code Requirements.....	202
5.5	Forces Acting on PV Arrays	203
5.5.1	Structural Loading Considerations	203
5.5.2	Dead Loads	204
5.5.3	Live Loads	204
5.5.4	Wind Loads.....	204
5.5.5	Snow Loads.....	209
5.5.6	Other Loads	210
5.6	Array Mounting System Design	210
5.6.1	Introduction.....	210
5.6.2	Objectives in Designing the Array Mounting System	210
5.6.2.1	Minimizing Installation Costs	210
5.6.2.2	Building Integration Considerations	212
5.6.2.3	Costs and Durability of Array-Roof Configurations.....	213
5.6.3	Enhancing Array Performance	213
5.6.3.1	Irradiance Enhancement	213
5.6.3.2	Shading.....	214
5.6.3.3	Array Cooling	214
5.6.3.4	Protection from Vandalism	214
5.6.4	Roof-Mounted Arrays.....	215
5.6.4.1	Standoff Mounting	215
5.6.4.2	Rack Mounting.....	216
5.6.4.3	Integrated Mounting.....	217
5.6.4.4	Direct Mounting.....	218
5.6.5	Ground-Mounted Arrays	218
5.6.5.1	Rack Mounting.....	218
5.6.5.2	Pole Mounting	218
5.6.5.3	Tracking-Stand Mounting	219
5.6.6	Aesthetics	220
5.7	Computing Mechanical Loads and Stresses	221
5.7.1	Introduction.....	221
5.7.2	Withdrawal Loads.....	221
5.7.3	Tensile Stresses	222
5.7.4	Buckling.....	222
5.8	Standoff, Roof Mount Examples.....	223
5.8.1	Introduction to ASCE 7 Wind Load Analysis Tabular Method	223
5.8.2	Array Mount Design, High Wind Speed Case	227
5.8.3	Array Mount Design, Lower Wind Speed Case	229
5.8.4	Exposure C, Exposure D, and Other Correction Factors.....	231
	References.....	233
	Suggested Reading.....	234

Chapter 6

Battery-Backup Grid-Connected Photovoltaic Systems 235

6.1 Introduction 235

6.2 Battery-Backup Design Basics 237

6.2.1 Introduction 237

6.2.2 Load Determination 237

6.2.3 Inverter Sizing 238

6.2.4 Battery Sizing 238

6.2.5 Sizing the Array 239

6.3 A Single Inverter 120-V Battery-Backup System Based on Standby Loads 241

6.3.1 Determination of Standby Loads 241

6.3.2 Inverter Selection 241

6.3.3 Battery Selection 242

6.3.4 Array Sizing 244

6.3.5 Charge Controller and Module Selection 245

6.3.6 BOS Selection and Completion of the Design 246

6.3.6.1 Array Mounting Equipment 246

6.3.6.2 Rooftop Junction Box 247

6.3.6.3 Source-Circuit Combiner Box and Surge Arrestor 248

6.3.6.4 Wire and Circuit Breaker Sizing—DC Side 248

6.3.6.5 Wire and Circuit Breaker Sizing—AC Side 251

6.3.6.6 Wiring of Standby Loads 251

6.3.6.7 Equipment Grounding Conductor and Grounding Electrode Conductor Sizing 253

6.3.7 Programming the Inverter and the Charge Controller 253

6.3.8 Fossil-Fuel Generator Connection Options 256

6.4 A 120/240-V Battery-Backup System Based on Available Roof Space 257

6.4.1 Introduction 257

6.4.2 Module Selection and Source Circuit Design 257

6.4.3 Source-Circuit Combiner Box and Charge Controller Selection 258

6.4.4 Inverter Selection 260

6.4.5 Determination of Standby Loads and Battery Selection 260

6.4.6 BOS Selection and Completion of Design 262

6.4.6.1 Rooftop Junction Box 262

6.4.6.2 Source-Circuit Combiner Box and Surge Arrestors 263

6.4.6.3 Wire and Circuit Breaker Sizing—DC Side 263

6.4.6.4 Wire and Circuit Breaker Sizing—AC Side 265

6.4.6.5 Wiring of Standby Loads 265

6.4.6.6 Equipment Grounding Conductor and Grounding Electrode Conductor Sizing 266

6.4.6.7 Rapid Shutdown 266

6.5 An 18-kW Battery-Backup System Using Inverters in Parallel 267

6.5.1 Introduction 267

6.5.2	Inverter and Charge Controller Selection	268
6.5.2.1	Inverter Selection	268
6.5.2.2	Charge Controllers	270
6.5.3	Module Selection and Array Layout.....	270
6.5.3.1	Module Selection.....	271
6.5.3.2	Array Layout	272
6.5.3.3	Array Performance.....	273
6.5.4	Battery and BOS Selection	275
6.5.5	Wire Sizing	275
6.5.6	Final Design.....	277
6.6	AC-Coupled Battery-Backup Systems	280
6.6.1	Introduction.....	280
6.6.2	A 120/240-V Battery-Backup Inverter with 240-V Straight Grid-Connected Inverter.....	281
6.6.3	A 120-V Battery-Backup Inverter with a 240-V Straight Grid-Connected Inverter.....	283
6.6.4	A 120/208-V Three-Phase AC-Coupled System	285
6.7	Battery Connections.....	286
6.7.1	Lead-Acid Connections	286
6.7.2	Other Battery Systems	291
	References.....	294

Chapter 7

	Stand-Alone Photovoltaic Systems	295
7.1	Introduction.....	295
7.2	The Simplest Configuration: Module and Fan	297
7.3	A PV-Powered Water Pumping System	298
7.3.1	Introduction.....	298
7.3.2	Selection of System Components.....	299
7.3.3	Design Approach for Simple Pumping System	301
7.3.3.1	Pump Selection.....	301
7.3.3.2	Battery Selection	302
7.3.3.3	Module Selection.....	302
7.3.3.4	Charge Controller Selection	303
7.3.3.5	BOS and Completion of the System.....	303
7.4	A PV-Powered Parking Lot Lighting System	304
7.4.1	Determination of the Lighting Load.....	304
7.4.2	Parking Lot Lighting Design	306
7.4.2.1	Introduction	306
7.4.2.2	Determination of Lamp Wattage and Daily Load Presented by the Fixture.....	307
7.4.2.3	Determination of Battery Storage Requirements.....	308
7.4.2.4	Determination of Array Size.....	308

	7.4.2.5	Charge Controller and Inverter Selection.....	309
	7.4.2.6	Final System Schematic	309
	7.4.2.7	Structural Comment.....	310
7.5		A Cathodic Protection System	311
	7.5.1	Introduction.....	311
	7.5.2	System Design.....	312
7.6		A Portable Highway Advisory Sign	315
	7.6.1	Introduction.....	315
	7.6.2	Determination of Available Average Power.....	316
	7.6.3	Determination of Battery Requirements.....	317
	7.6.4	Additional Observations and Considerations.....	317
7.7		A Critical Need Refrigeration System	317
	7.7.1	Introduction.....	317
	7.7.2	Load Determination.....	318
	7.7.3	Battery Sizing	318
	7.7.4	Array Sizing.....	320
	7.7.5	Charge Controller and Inverter Selection	321
	7.7.6	BOS Component Selection	321
	7.7.7	Overall System Design	322
7.8		A PV-Powered Mountain Cabin.....	323
	7.8.1	Introduction.....	323
	7.8.2	Load Determination.....	324
	7.8.3	Battery Selection.....	327
	7.8.4	Array Sizing and Tilt	328
	7.8.5	Charge Controller Selection.....	330
	7.8.6	Inverter Selection	330
	7.8.7	Excess Electrical Production	331
	7.8.8	BOS Component Selection	332
	7.8.8.1	Wire, Circuit Breaker, and Switch Selection.....	332
	7.8.8.2	Other Items.....	333
7.9		A Hybrid-Powered, Off-Grid Residence.....	334
	7.9.1	Introduction.....	334
	7.9.2	Summary of Loads	336
	7.9.3	Battery Selection.....	337
	7.9.4	Array Design.....	339
	7.9.5	Generator Selection.....	342
	7.9.6	Generator Operating Hours and Operating Cost	342
	7.9.7	Charge Controller and Inverter Selection	344
	7.9.8	Wire, Circuit Breaker, and Disconnect Selection.....	346
	7.9.9	BOS Component Selection	348
	7.9.10	Total System Design	348
7.10		Summary of Design Procedures	349
		References.....	354
		Suggested Reading.....	354

Chapter 8

Economic Considerations	355
8.1 Introduction	355
8.2 Life-Cycle Costing	356
8.2.1 The Time Value of Money	356
8.2.2 Present Worth Factors and Present Worth	357
8.2.3 Life-Cycle Cost	360
8.2.4 Annualized LCC	364
8.2.5 Unit Electrical Cost	365
8.2.6 LCOE Analysis	365
8.3 Borrowing Money	367
8.3.1 Introduction	367
8.3.2 Determination of Annual Payments on Borrowed Money	367
8.3.3 The Effect of Borrowing on LCC	370
8.4 Payback Analysis	371
8.5 Externalities	372
8.5.1 Introduction	372
8.5.2 Subsidies	374
8.5.3 Externalities and PV	375
References	377
Suggested Reading	378

Chapter 9

Externalities and Photovoltaics	379
9.1 Introduction	379
9.2 Externalities	380
9.3 Environmental Effects of Energy Sources	381
9.3.1 Introduction	381
9.3.2 Air Pollution	382
9.3.2.1 The Clean Air Act and the U.S. Environmental Protection Agency	382
9.3.2.2 Greenhouse Gases and the Greenhouse Effect	383
9.3.3 Water and Soil Pollution	384
9.3.4 Infrastructure Degradation	385
9.3.5 Quantifying the Cost of Externalities	385
9.3.5.1 The Cost of CO ₂	385
9.3.5.2 Sequestering CO ₂ with Trees	386
9.3.5.3 Attainment Levels as Commodities	387
9.3.5.4 Subsidies	388
9.3.6 Health and Safety as Externalities	389
9.4 Externalities Associated with PV Systems	389
9.4.1 Environmental Effects of PV System Implementation	389
9.4.2 Environmental Effects of PV System Deployment and Operation	391

9.4.3 Environmental Impact of Large-Scale Solar PV Installations 392

9.4.4 Environmental Effects of PV System Decommissioning 393

References 394

Chapter 10

The Physics of Photovoltaic Cells 397

10.1 Introduction 397

10.2 Optical Absorption 397

10.2.1 Introduction 397

10.2.2 Semiconductor Materials 398

10.2.3 Generation of EHP by Photon Absorption 399

10.2.4 Photoconductors 402

10.3 Extrinsic Semiconductors and the PN Junction 404

10.3.1 Extrinsic Semiconductors 404

10.3.2 The PN Junction 406

10.3.2.1 Drift and Diffusion 406

10.3.2.2 Junction Formation and Built-In Potential 407

10.3.2.3 The Illuminated PN Junction 410

10.3.2.4 The Externally Biased PN Junction 412

10.4 Maximizing PV Cell Performance 414

10.4.1 Introduction 414

10.4.2 Minimizing the Reverse Saturation Current 415

10.4.3 Optimizing Photocurrent 416

10.4.3.1 Minimizing Reflection of Incident Photons 416

10.4.3.2 Maximizing Minority Carrier Diffusion Lengths 417

10.4.3.3 Maximizing Junction Width 419

10.4.3.4 Minimizing Surface Recombination Velocity 421

10.4.3.5 A Final Expression for the Photocurrent 422

10.4.4 Minimizing Cell Resistance Losses 424

10.5 Exotic Junctions 426

10.5.1 Introduction 426

10.5.2 Graded Junctions 427

10.5.3 Heterojunctions 428

10.5.4 Schottky Junctions 428

10.5.5 Multijunctions 431

10.5.6 Tunnel Junctions 432

References 434

Chapter 11

Evolution of Photovoltaic Cells and Systems 435

11.1 Introduction 435

11.2 Silicon PV Cells 437

11.2.1 Production of Pure Silicon 437

11.2.2 Single-Crystal Silicon Cells 438

11.2.2.1	Fabrication of the Wafer	438
11.2.2.2	Fabrication of the Junction	439
11.2.2.3	Contacts	441
11.2.2.4	Antireflective Coating (ARC)	444
11.2.2.5	Modules	445
11.2.3	A High-Efficiency Si Cell with All Contacts on the Back	445
11.2.4	Multicrystalline Silicon Cells	447
11.2.5	Other Thin Silicon Cells	447
11.2.6	Amorphous Silicon Cells	448
11.2.6.1	Introduction	448
11.2.6.2	Fabrication	449
11.2.6.3	Cell Performance	451
11.3	Gallium Arsenide Cells	451
11.3.1	Introduction	451
11.3.2	Production of Pure Cell Components	452
11.3.2.1	Gallium	452
11.3.2.2	Arsenic	452
11.3.2.3	Germanium	453
11.3.3	Fabrication of the Gallium Arsenide Cell	453
11.3.4	Cell Performance	455
11.4	CIGS Cells	456
11.4.1	Introduction	456
11.4.2	Production of Pure Cell Components	457
11.4.2.1	Copper	457
11.4.2.2	Indium	458
11.4.2.3	Selenium	458
11.4.2.4	Cadmium	458
11.4.2.5	Sulfur	459
11.4.2.6	Molybdenum	459
11.4.3	Fabrication of the CIS Cell	459
11.4.4	Cell Performance	460
11.5	CdTe Cells	462
11.5.1	Introduction	462
11.5.2	Production of Pure Tellurium	462
11.5.3	Production of the CdTe Cell	463
11.5.4	Cell Performance	464
11.6	Emerging Technologies	465
11.6.1	New Developments in Silicon Technology	465
11.6.2	CIS-Family-Based Absorbers	467
11.6.3	Other III–V and II–VI Emerging Technologies	468
11.6.4	Other Technologies	469
11.6.4.1	Thermophotovoltaic Cells	469
11.6.4.2	Intermediate Band Solar Cells	469
11.6.4.3	Supertandem Cells	470
11.6.4.4	Hot Carrier Cells	470

11.6.4.5	Optical Up- and Down-Conversion.....	470
11.6.4.6	Organic PV Cells.....	471
11.6.4.7	Concentrating PV Cells.....	472
11.6.4.8	Perovskites.....	473
11.6.4.9	Quantum Dot and Dye-Sensitive Solar Cells.....	475
11.7	New Developments in System Design	475
11.7.1	Micro Grids.....	475
11.7.2	Smart Grids.....	476
11.7.3	Inverter Performance Enhancement	478
11.7.4	Module Performance Enhancement.....	478
11.8	Summary	479
	References.....	480
	Appendix: Design Review Checklist.....	485
	Index	487
