

Content

Plenary session

<i>Roger Hurst, Karel Matocha</i> The European Code of Practice for Small Punch Testing – where do we go from here?	5
<i>Isamu Nonaka, Akihiko Kanaya, Shin-ichi Komazaki, Ken-ichi Kobayashi,</i> Standardization of Test Method for Small Punch Creep Testing in Japan	12
<i>Paul R. Roberts, Bryan J. Borradaile, Rob J. Mitchell</i> Material Sampling from Components within the Nuclear Industry and the Extraction of Useful Materials Information	19

Theme 1 Small Punch Creep Testing

<i>Thomas H. Hyde, Wei Sun</i> Interpretation of Small Punch Creep Test Data for Ductile Materials	25
<i>Tomoya Nishioka, Toshiyuki Ohsawa, Yoshiathu Sawaragi, Hiromi Uemura</i> Effects of Various Factors on Creep Behavior in Low Alloy Steel by Small Punch Testing Method	34
<i>Martin Abendroth</i> Identification of Creep Properties for P91 Steels at High Temperatures Using the Small Punch Test	39
<i>Roman Šturm, Janez Grum</i> Accelerated Test Determination of Creep Properties for Different P24 Steel Weldments	44
<i>Petr Dymáček, Karel Milička, Ferdinand Dobeš</i> Analysis of Potential Factors Influencing the Relation between Small Punch and Conventional Creep Tests	50
<i>Ken-ichi Kobayashi, Masaaki Tabuchi, Gavin C. Stratford</i> Creep Rupture Life of Welding Components in P92 Ferritic Steel using Small Punch Creep Test	54

Theme 2 Small Punch Testing for Tensile and Fracture Behaviour

<i>Roberto Lacalle, José Alberto Álvarez, Sergio Cicero, Federico Gutiérrez-Solana</i> From Archaeology to Precious Metals: Four Applications of Small Punch Test	59
<i>Guan Kai-shu, Wang Zhi-wen, Xu Tong, Shou Bi-nan</i> Development of Small Punch Test in China	69
<i>Yoshihisa Matsumoto, Hiroshi Yukawa, Tomonori Nambu</i> Quantitative Evaluation of Hydrogen Embrittlement of Metal Membrane Detected by <i>in-situ</i> Small Punch Test under Hydrogen Permeation	74
<i>Jana Petzová, Miloš Bafák, Ľudovít Kupča</i> Evaluation of the Reactor Pressure Vessel Material Properties Degradation due to the Irradiation by Small Punch Test Method	79
<i>Ferdinand Dobeš, Karel Milička</i> Application of Small Punch Test for Estimation of Fracture Properties of Fe-Al Alloys	83
<i>Miloš Bafák, Martin Březina, Zdenka Rapantová</i> Mass-production of SPT specimen	87
<i>Miroslav Greger, Ladislav Kander, Radim Kocich</i> Use of small punch tests for determination of mechanical properties of commercially pure copper after ECAP	90
<i>Yingzhi Li, Roger Hurst, Karel Matocha, Peter Čížek, Darina Blagoeva</i> New Approach to Determine Fracture Toughness from the Small Punch Test	94
<i>Karel Matocha, Zdeněk Kuboň, Jaroslav Purmanský</i> Ductile–brittle Transition Behaviour of Circumferential Weld of Reheater Header Determined by Small Punch Tests	103
<i>Radovan Štastný, Vít Pavlík</i> Application of the SPT Samples in CEZ, a. s. and Operating Practice	108
<i>Ladislav Kander, David Mikuláš</i> Evaluation of Mechanical Properties of Composite Coatings using Small Punch Test Method	110

<i>Josef Volák, Václav Mentl</i> Testing of Small Local Zones by means of Small Punch Test at Room and Creep Temperatures	115
<i>Jan Džugan, Pavel Konopík</i> Evaluation of Fracture Toughness Properties for Low Carbon Steel in the Brittle State by Small Punch Test Technique	119
<i>Pavel Konopík, Jan Džugan</i> Small Punch Test Application to Fracture Toughness Determination in the Upper Shelf Region	123
<i>Ivan Klevtsov, Andrei Dedov</i> Experience in Tensile Properties Determination by Small Punch Test	128

Theme 3 Numerical Approach

<i>Peng Du, Xiang Ling, Zhixiang Zhou, Tong Xu</i> Study on Influence Factors of Small Punch Test to Estimate the Yield Strength by Energy Method	133
<i>Thomas H. Hyde, Wei Sun, S. J. Brett</i> Application of Impression Creep Test Data for the Assessment of Service Exposed Power Plant Components	138
<i>Toshiya Nakata, Shin-ichi Komazaki, Yutaka Kohno, Hiroyasu Tanigawa</i> Tensile Property Evaluation by Stress and Strain Analyses of Small Punch Test Specimen Using Finite Element Method	146
<i>Meinhard Kuna, Martin Abendroth, Th. Linse, St. Rasche</i> Characterization of Temperature and Irradiation Dependent Material Properties by means of the Small Punch Test and Advanced Numerical Methods	151
<i>Terutaka Fujioka, Naoya Atsumi, Shin-ichi Komazaki, Toshimi Kobayashi, Isamu Nonaka</i> Finite Element Analysis of Small Punch/Small Punch Creep Test Specimens of 2.25Cr-1Mo Steel Performed in the Japanese Research Group	161
<i>Wenke Pan, Jim Boyle, Mohd. Ramlan, Craig Dun, Mohd. Ismail, Kenji Hakoda</i> Material Plastic Properties Characterization Using a Genetic Algorithm and Finite Element Method Modelling of the Plane Strain Small Punch Test	174
<i>Zhixiang Zhou, Xiang Ling, Peng Du, Tong Xu</i> Assessment of Mechanical Properties of SUS304 by Means of Small Punch Test at Elevated Temperatures	180

Theme 4 Other Miniature Test Techniques

<i>Wei Sun, Thomas H. Hyde</i> Determination of Secondary Creep Properties Using a Small Ring Creep Test Technique	185
<i>Yasuhiro Yamazaki, Shin-ichiro Kuga</i> Interfacial Fracture Toughness Evaluation of Thermal Barrier Coatings by Instrumented Indentation Method	194
<i>Ladislav Kander, Miroslav Greger</i> Determination of Brittle Fracture Properties of Structural Steels using Subsize Specimens	201
<i>Yingzhi Li, Roger Hurst</i> Miniature Specimen Tests: Problems, Comments and New Ideas	206
<i>Josef Volák, Michal Chocholoušek, Zbyněk Bunda, Václav Mentl</i> Fatigue Characteristics of Construction Steels Measured on Miniature Test Symplex	217
<i>V. Karthik, P. Visweswaran, A. Vijayaragavan, K. Laha, D. Pawaskar, K. V. Kasiviswanathan, Baldev Raj</i> Mechanical Behavior from Punch and Indentation Tests – Modeling and Experimental Studies at IGCAR, India	222
<i>Miroslav Greger, Ladislav Kander</i> Evaluation of Mechanical Properties of Aluminium Alloy after Equal Channel Angular Pressing Using Miniaturized Test Specimens and Punch Tests	231
