1.	Introduction	4
1.1.	Acknowledgements	4
1.2.	Abbreviations	5
2.	Sampling and analytical methods	7
2.1.	Sampling sites	7
2.1.1.	Balkhash	8
2.1.2.	Ekibastuz - abandoned electrical power substation	9
2.1.3.	Karaganda city	9
2.1.4.	Nura (river)	9
2.1.5.	Shabanbai Bi	10
2.1.6.	Temirtau	11
2.1.7.	Shetpe	12
2.1.8.	Aktau: Baskuduk	13
2.1.9.	Tauchik	14
2.2.	Sampling and analytical methods	14
3.	The Kazakhstani, EU, and other limits for POPs in eggs	17
4.	Results	18
4.1.	Dioxins (PCDD/Fs) and dioxin-like PCBs measured by DR CALUX	18
4.2.	Dioxins (PCDD/Fs), PCBs and other POPs measured by gas chromatography methods	20
4.2.1.	Dioxins (PCDD/Fs) and dioxin-like PCBs (DL PCBs)	20
4.2.2.	Polychlorinated biphenyls (PCBs)	20
4.2.3.	Other U-POPs: Hexachlorobenzene (HCB), pentachlorobenzene (PeCB) and hexachlorobutadiene (HCBD)	24
4.2.4.	Polycyclic aromatic hydrocarbons (PAHs)	24
4.2.5.	BFRs in eggs	26
4.2.6.	Organochlorinated pesticides (OCPs)	27
4.3.	Mercury	28
5.	Discussion	28
5.1.	Background levels of POPs in eggs	28
5.2.	Dioxin congener patterns and putative sources	28
5.2.1.	Balkhash	29
5.2.2.	Area of river Nura and Shabanbai Bi	30
5.2.3.	Ekibastuz	31
5.3.	OCPs and their putative sources	32
5.4.	BFRs and their putative sources	32
6.	Dietary intake	32
7.	Conclusions and recommendations	35
8.	Limitations of the study	35
9.	References	36
10.	Photographic supplement	41
