

Contents

1	Foreword	5
2	Model-based optimization of the production of polyvinyl acetate, <i>Fernando Aller</i>	8
3	Predictive Control for Mechatronic Laboratory Models, <i>Květoslav Belda</i>	15
4	Cascade control methods of a simple nonlinear limb model, <i>David Csercsik</i>	21
5	Bayes Estimation of a Queue Length, <i>Pavel Dohnal</i>	28
6	Design of square-root derivative-free smoothers, <i>Jindrich Dunik</i>	36
7	Fast Method of Moving Object Tracking, <i>Kamil Ekštejn</i>	45
8	Petri-net modelling of an assembly process system, <i>Dejan Gradisar</i>	50
9	Traffic Flow Control - Optimization on Horizon, <i>Jitka Homolová</i>	66
10	Development of Process Control Software Using Software Engineering Techniques, <i>Gregor Kandare</i>	72
11	Simulation and visualization of anticipatory ALife agents, <i>Karel Kohout</i>	88
12	Stochastic Semantic Analysis, <i>Miloslav Konopik</i>	94
13	Jade - extension and utilisation (Java Agent DEvelopment Framework), <i>Miroslav Licko</i>	100
14	The logic of E-Deliberation: Participation beyond civil society., <i>Evangelos Liotzis</i>	103
15	The effect of constraints on LS state estimators for a qubit, <i>László Ruppert, Attila Magyar</i>	110
16	Natural Language Semantics and Problem of Layers, <i>Roman Mouček</i>	118
17	Computational Aspects of Controller Design and Quality Evaluation, <i>Miroslav Novák</i>	124

18	LDec: One Pass Time Synchronous Decoder, <i>Tomáš Pavelka</i>	138
19	Examples of State and Parameter Estimation for Linear Model with Uniform Innovations, <i>Lenka Pavelková</i>	145
20	Setting of Covariance for Kalman Filter, <i>Pavla Pecherková</i>	153
21	High dimensional model representations, <i>Miroslav Pištěk</i>	160
22	Use of predefined knowledge in advanced adaptive control, <i>Bostjan Pregelj</i>	169
23	Overview of Distributed Decision-Making for Urban Traffic Control, <i>Jan Příkryl</i>	180
24	Some aspects of optimal active detector design, <i>Ivo Punčochář</i>	186
25	e2FocusGroup Participatory Session, <i>Paulo Alexandre Rosa</i>	193
26	Study on disturbance-rejection magnitude optimum method decay ratios, <i>Lumbar Satja</i>	198
27	Factorized Kalman Filtering, <i>Evgenia Suzdaleva</i>	229
28	Improved Estimation Method of Region of Stability for Nonlinear Autonomous Systems, <i>Rozgonyi Szabolcs</i>	237
29	Distributed Bayesian Decision Making: Early Experiments, <i>Václav Šmídl, Josef Andrášek</i>	245
30	Continuous-time modeling of urban traffic, <i>Jan Zeman</i>	256
