

CONTENTS

PREFACE	7
-------------------	---

A. GENERAL PART

Chapter One. <i>Introduction Considerations</i>	11
Chapter Two. <i>Determinant Factors in the Rise Silicosis</i>	13
2.1. Properties of Dust	13
2.1.a. Composition of Substance	13
2.1.b. Particle Size	13
2.1.c. Physical Properties of Dust	14
2.2. Dust Concentration	14
2.3. Dust Exposition	14
2.4. Time of Retained Dust Acting in the Lungs	14
2.5. Intensity and Type of Breathing	15
2.6. Individual Receptivity	15
Chapter Three. <i>Experimental Pathology</i>	16
3.1. Experiment in Animal	16
3.2. Pulmonary Clearance — Physiological Action of Vital Importance	16
3.2.a. Activity of Ciliar Epithelium of Respiratory Pathways	17
3.2.b. Intraalveolar Phagocytosis	17
3.2.c. Dust Transportation through Lymphatics	18
3.2.d. Transportation through Blood-Vessels	19
Chapter Four. <i>Silicosis — Pathogenesis and Pathology</i>	20
Chapter Five. <i>Silicotic Granuloma Growth and Possibilities of its Affection</i>	23
Chapter Six. <i>Work in manual Cleaning of Castings</i>	26

B. RESULTS OF SPECIAL STUDIES

Chapter Seven. <i>Methodology</i>	29
7.1. Clinical Observations	29
7.2. Experimental Studies	29
7.2.a. Exposure Apparatus for Inhalatory Dusting	29
7.2.b. Kinds of Dust Used in Experiments	30
7.2.c. Aerosol Inhalations	30
7.2.d. Killing of Animals and the Lung Preparation	30
7.2.e. Microscopic Appearances	30
7.2.f. Biochemical Determination	31
7.3. Statistical Evaluation of Results	31
Chapter Eight. <i>Clinical Studies</i>	32
8.1 Acute Silicosis in a Cleaner of Steel Cast-Iron	32
8.2 Lungs Damage in Cleaners of the Steel Cast-Iron Group	35
8.3. Rapid Silicosis from the Steel Cast Plant in Radiographs	39
8.4. Biopsy of Scapular Lymph Nodes	41

8.5 Risk of Silicosis Development in Cleaning Grey Cast-Iron and Steel Cast and Prevention by Means of Mass Miniature Radiography	43
Chapter Nine. <i>Experimental Work on Animals</i>	50
9.1. Elimination of Ferric Oxide (Fe_2O_3) from the Lungs of Dusted Rats I. Histological Study	50
9.2. Elimination of Ferric Oxide (Fe_2O_3) from the Lungs of Dusted Rats II. Quantitative Determination	51
9.3. Elimination of Silicia Dust of the Steel Cast Plant from the Lungs of Dusted Rats	53
9.4. Composition of Foundry Sands and Their Biological Aggressivity	55
9.5. Influence of Aerosol Inhalations on the Clearance of Dust Particles from the Lungs of Rats Dusted by Inert and Fibroplastic Dusts	60
9.6. Aggressivity of Dust from the Steel Cast Plant and Influence of Polyvinylpyridin-N-oxide in Experiment	64
9.7. Long-term Dusting of Rats by Inhalatory Method and Influence of Polyvinylpyridin-N-oxide on the Development of Silicotic Changes	70
Chapter Ten. <i>Summary of the most Important Effects of Polyvinylpyridin-N-oxide</i>	75
Chapter Eleven. <i>Elimination of Hydroxyprolin by Urine in Patients with Silicosis after Application of Polyvinylpyridin-N-oxide</i>	77
Summary	83
Souhrn	85
Резюме	87
References	89
Author Index	97
Subject Index	101
