| ABSTRACT .....   | 4  |
| SOUHRN .....   | 6  |
| LIST OF PAPERS.....  | 7  |
| 1. INTRODUCTION .....  | 8  |
| 1.1 ER phenomenon .....  | 8  |
| 1.2 Microstructure change of an ER fluid .....                                     | 10 |
| 1.3 The ER materials .....   | 12 |
| 1.3.1 <i>Inorganic materials</i> .....   | 13 |
| 1.3.2 <i>Organic and polymeric materials</i> .....                                 | 13 |
| 1.3.3 <i>Liquid materials</i> .....  | 13 |
| 1.3.4 <i>Core-shell composite materials</i> .....                                  | 14 |
| 1.4 ER behavior of an ER fluid .....   | 14 |
| 1.4.1 <i>The apparent viscosity</i> .....  | 14 |
| 1.4.2 <i>Shear stress</i> .....  | 16 |
| 1.4.3 <i>Yield stress</i> .....  | 17 |
| 1.4.4 <i>Linear viscoelastic properties</i> .....                                  | 19 |
| 1.5 Important factors influencing the ER effect .....                              | 19 |
| 1.5.1 <i>The electric field strength and frequency of the electric field</i> .. 19 |    |
| 1.5.2 <i>Particle dielectric properties and conductivity</i> .....                 | 20 |
| 1.5.3 <i>Particle volume fraction and particle size</i> .....                      | 20 |
| 1.6 The mechanism of the ER effect .....   | 21 |
| 2. Self-assembled nanocomposites with novel structure .....                        | 24 |
| 2.1 Mesoporous silica based nanocomposites .....                                   | 24 |
| 2.2 One dimensional nanostructured materials .....                                 | 26 |
| AIM OF WORK .....  | 28 |
| SUMMARIES OF PAPERS.....   | 29 |
| ACKNOWLEDGEMENTS .....   | 36 |
| LIST OF SYMBOLS .....  | 37 |
| REFERENCES .....   | 39 |
| CURRICULUM VITAE.....  | 42 |
