

Contents

Plenary Lectures

The Arthur Lefebvre Award Lecture

- Multi-Jet Spray Generation for Small Droplet Production 1
Franz Durst, M. Weber, H. Wachtel

- Spray Characterization: A Critical Review 3
William D. Bachalo

- Fragmentation under scaling symmetry and stochastic modeling of a highly turbulent flow with spray 5
Mikhael Gorokhovski

Application

- Effect of bell geometry in high-speed rotary bell atomization 7
Joachim Domnick

- Experimental study on charging behavior of bio-fuels sprays generated by an annular electrostatic atomizer 9
Radu Beleca, Wamadeva Balachandran

- Novel External Atomizing Nozzle for Domestic Household Aerosols 11
Rajab Sharief, Gary Eales

- EHD sprays as a seeding agents for PIV system measurements 13
Darina Jašíková, Michal Kotek, Radek Horálek, Jiří Horčíčka, Václav Kopecký

Automotive 1

The Effect of Swirl on Air/Fuel Mixing in a 4 Valve GDI Engine <i>Graham Pitcher, Graham Wigley, Phil Stansfield, Rishin Patel</i>	15
Influence of fuel mixture on spray formation in diesel processes <i>Thomas Vogel, Michael Lutz, Michael Wensing, Alfred Leipertz</i>	17
Mixture Formation and Combustion of Biodiesel Blended Fuels in a DI Diesel Engine <i>Christian Hüttl, Ulrich Leidenberger, Dieter Brüggemann</i>	19
Combustion of Diesel sprays under real-engine like conditions: analysis of low- and high-temperature oxidation processes <i>Miroslaw Weclas, Jochen Cypris, T.M.A. Maksoud</i>	21
Injection Spray Comparison of Diesel Fuel and Cold Pressed Rape Seed Oil Fuel <i>Johann A. Wloka, Andreas Hubert, Georg Wachtmeister</i>	23

Automotive 2

Experimental investigation on the spray behaviour for a hollow cone piezo injector with a multiple injection strategy <i>Andreas Schmid, Konstantinos Boulouchos, Bruno Schneider, Mehdi Mojtabi, Graham Wigley</i>	25
The Qualitative Spray Characteristics of High-Pressure Gasoline Injection System <i>Ireneusz Pielecha, Krzysztof Wislocki, Jakub Czajka, Dmytro Maslennikov</i>	27
Spray Characteristics in CI engines Fuelled with Vegetable Oils and Its Derivatives-A Review <i>Soo-Young No</i>	29
CFD study of needle motion influence on the spray conditions of single-hole injectors <i>Xandra Margot, Sergio Hoyas, Pablo Fajardo, Stavroula Patouna</i>	31

Automotive 3

A Comparison between One and Two Component Velocity and Size Measurements in a Dense Spray <i>Mehdi Mojtabi, Graham Wigley, Jan Jedelský, Jérôme Helie</i>	33
Investigation of Cyclic Variations Effects on Mixing and Combustion Processes in a DISI IC-Engine by Using Large Eddy Simulation <i>Dmitry Goryntsev, Amsini Sadiki, Johannes Janicka</i>	35
Bio- and Mineral-Fuel Spray Evolution in Non-Evaporating and Evaporating Conditions by Image Processing Techniques <i>Luigi Allocca, Ezio Mancaruso, Alessandro Montanaro, Luigi Sequino, Bianca Maria Vaglieco</i>	37
The Influence of Fuel Properties on Spray Propagation, Atomization and Evaporation <i>Manuel Reddemann, Florian Mathieu, D. Martin, Reinhold Kneer</i>	39

Characterisation of a Bio-Ethanol Direct Injection Spray Under Sub-Zero Conditions	41
<i>Ifan Evans, Phil J. Bowen, Peter J. Kay, J. King, G. Knight, L. Schmidt</i>	

Computational Methods in Sprays

Effect of Confinement on Heat Transfer Between Gas-Droplets Round Impinging Jet and Flat Plate	43
<i>Maxim A. Pakhomov, Viktor I. Terekhov</i>	
Prediction of Spray Penetration for DI Engines by means of a New Application Tool	45
<i>Kai-Uwe Münch</i>	
RANS and SAS analysis of GDI nozzle flow dynamics	47
<i>Junmei Shi, Klaus Wenzlawski, Jérôme Helie, Hans Nuglisch, Jean Cousin</i>	
Coupling 1D System AMESim and 3D CFD EOLES models for Diesel Injection Simulation	49
<i>Richard Marcer, Charles Audiffren, Antoine Viel, Benoit Bouvier, Alain Walbott, Bruno Argueyrolles</i>	
Surface Tension Model for High Viscosity Ratios Implemented in VOF Model	51
<i>Jan Boháček</i>	

Drop Deformation and Break-Up 1

Particle Sizing and Flow Measurements in an Atomizing Mist Jet Nozzle: A Shadowgraphy Approach	53
<i>Oisín Fergal Peter Lyons, Tim Persoons, Darina B. Murray</i>	
Experimental investigation of a Single Droplet Interaction with Shear Driven Film	57
<i>Samah Alghoul, Carol Easwick, David Hann</i>	
Spatial Droplets Size Distribution in a Diesel Spray Taken by Photography with Super High Resolution	59
<i>H. Gen Fujimoto, Hirokazu Adachi, Tetsuya Yano, Tsukasa Hori, Jiro Senda, N. Marubayashi</i>	
High-speed video observation and phase Doppler anemometry measurements of oil break-up in a model engine crankcase	61
<i>Steven Begg, Guillaume de Sercey, Morgan Heikal</i>	

Drop Deformation and Break-Up 2

Criteria for breakup of droplets	63
<i>Ilai Sher, Eran Sher</i>	
Breakup of stretched liquid threads at low gas relative velocities – Comparison of the laminar rotary atomization to the gravity condition	65
<i>Axel Mescher, Peter Walzel</i>	
Experimental study of electrical primary break-up of thin sheets of dielectric liquid controlled by ElectroHydroDynamic actuator	67
<i>Christophe Louste, Michel Daaboul, Philippe Traore, Hubert Romat</i>	

Drop Evaporation and Condensation

Experimental and numerical investigation of evaporating mono-component droplets in a turbulent channel flow	69
<i>Virginel Bodoc, Olivier Rouzaud, Florian Moreau, Rudy Bazile, Gerard Lavergne</i>	
Simple Model for Turbulence Effects on the Vaporization of Liquid Single Droplets in Forced Convective Conditions	71
<i>Maher Abou Al-Sood</i>	
Effect of Fuel-Evaporation Zone Length on Spray Combustion in a Gas Turbine Combustion Chamber	75
<i>Wahidullah Ahmadi, M. Chrigui, Amsini Sadiki, Johannes Janicka</i>	
An analytical solution to the spherically symmetric species diffusion equation: application to modelling of heating and evaporation of bi-component droplets	77
<i>Sergei Sazhin, Pavel Krutitskii, Ahmed Elwardany, Guillaume Castanet, Fabrice Lemoine, Morgan Heikal</i>	
New Correlations for Leidenfrost and Nukiyama Temperatures with Gas Pressure - Application to Liquid Film Boiling Simulation	79
<i>Chawki Habchi</i>	

Drop-Wall Interaction 1

The anti-rebound effect of flexible polymers on impacting drops	83
<i>Michael Smith, Volfango Bertola</i>	
Newtonian Airless Liquid Jet Interaction with a High Speed Moving Surface	85
<i>Bavand Keshavarz, Sheldon I. Green, Martin H. Davy, Donald T. Eadie</i>	
Statistical analysis of water drop impact on surfaces with variable wettability	87
<i>Carlo Antonini, Alidad Amirfazli, Marco Marengo</i>	
Impingement of Single Droplets on a Dry Smooth Surface at high Weber Numbers	89
<i>Benjamin Brinkmann, Thorsten Möller</i>	
Experimental Investigation of Splashing Behaviour on Dry Solid Surfaces under High Parameters	91
<i>Sebastian Frohwein, Tjark Eisfeld, Franz Joos</i>	

Drop-Wall Interaction 2

Experimental investigation of droplet collisions with higher viscosity	93
<i>Matthias Kuschel, Martin Sommerfeld</i>	
Droplet Bouncing on Cold Wall: Comparison of Experiments with Direct Numerical Simulations	95
<i>Norbert Roth, Hassan Gomaa, Nils Bordoni, Thibaut Dumont, Bernhard Weigand</i>	

Experimental study on the splash/deposition limit in drop impact onto solid surfaces	97
<i>Julián Palacios, Pablo Gómez, Claudio Zanzi, Joaquín López, Julio Hernández</i>	

Characterization of Wall Film Formation from Impinging Diesel Fuel Sprays using LIF	99
<i>Alf Magnusson, Mauro Begliatti, Francisco Borja Hervás, Mats Andersson</i>	

Drop-Wall Interaction 3

Single drop impact onto a deep pool: experimental observations and theoretical model for the crater evolution	101
---	-----

Alfio Bisighini, Gianpietro Elvio Cossali, Cameron Tropea, Ilia Roisman

Physical analysis of multimodality in atomization processes	103
---	-----

Miguel R. Oliveira Panão, António Moreira, Lucian Radu

Numerical Studies of Multiple Droplet Impacts onto a Flat Substrate	105
---	-----

Kensuke Yokoi, Peter J. Kay, Phil J. Bowen, Tim Phillips

Drop-Wall Interaction 4

The effect of co-current gas velocity on heat transfer of the pulse spray	107
---	-----

Alexandr Nazarov, Anatoly Serov, Viktor I. Terekhov, Konstantin Sharov

Dynamic behaviour of liquid droplets bouncing onto a hot slab	109
---	-----

Franck Lelong, Michel Gradeck, Nathalie Seiler, Pierre Ruyer, Guillaume Castanet, Pierre Dunand

Heat transfer mechanisms at drop/wall interactions: experiments and theory	111
--	-----

Ana Moita, Ilia Roisman, António Moreira

Assessment of heat transfer measurements at droplet/wall interactions: relation with the impact conditions	113
--	-----

Ana Moita, António Moreira

Two phase spray cooling for specific local quenching of workpieces in flexible flow fields	115
--	-----

Sven Schuettenberg, Martin Hunkel, Udo Fritsching

Drop-Wall Interaction 5

On the Splashing Threshold of a Single Droplet Impacting onto Rough and Porous Surfaces	117
---	-----

Andre Gipperich, Andreas Lembach, Ilia Roisman, Cameron Tropea

Drop impact close to a pore: experimental and numerical investigations	119
--	-----

Steffen Goertz, Christina Weickgenannt, Andreas Lembach, Ilia Roisman, Cameron Tropea

"Distribution-nozzle"" concept: a method for Diesel spray distribution in space for charge homogenization by late injection strategy	121
--	-----

Mirosław Weclas, Jochen Cypris

Flow Modelling

Wavelet analysis of an unsteady air-blasted liquid sheet <i>Esteban Calvo, Orietta Nicolis, Antonio Lozano, Marco Marengo</i>	123
Experimental and Numerical Investigation about internal Cavitating Flow and Primary Atomization of a Large-Scaled VCO Diesel Injector with Eccentric Needle <i>Tetsuya Oda, Motoki Hiratsuka, Yukihiro Goda, Satoshi Kanaike, Katsuyuki Ohsawa</i>	125
Numerical investigation of fuel property effect on cavitating flow in generic fuel injection nozzle geometries <i>Junmei Shi, Mohammad Arafin</i>	127
Multihole gasoline direct injection spray plumes <i>Rossella Rotondi, Jérôme Helie, Cedric Leger, Mehdi Mojtabi, Graham Wigley</i>	129

Fundamentals 1

Size and velocity distributions of droplets in an air-water horizontal pipe flow <i>Sylvain Boulesteix, Patricia Ern, Francois Charru, F. Luck</i>	131
Ballistic Imaging in the Near-Field of an Effervescent Spray <i>Mark Linne, David Sedarsky, Terrence Meyer, James Gord, Campbell Carter</i>	133
Several aspects of the atomization behavior of various Newtonian fluids with a like-on-like impinging jet injector <i>Giovanni Bailardi, Michele Negri, Helmut Ciezki</i>	135
Effect of fuel properties on primary breakup and spray formation studied on a gasoline 3-hole nozzle <i>Lars Zigan, Ingo Schmitz, Michael Wensing, Alfred Leipertz</i>	137
An experimental investigation of discharge coefficient and cavitation length in the elliptical nozzles <i>Sung-Ryoul Kim, Kun-Woo Ku, Jung-Goo Hong, Choong-Won Lee</i>	139

Fundamentals 2

Influence of cavitation on atomisation at low pressures using up-scaled and transparent nozzles <i>Raúl Ochoterena, Peng Li, Moises Vera-Hernández, Sven Andersson</i>	141
Mode Transitions in an Oscillating Liquid Sheet <i>Antonio Lozano, Esteban Calvo, Juan Antonio García, Felix Barreras</i>	143
Pre-filming primary atomization: Experiments and modeling <i>Sebastian Gepperth, Daniel Guildenbecher, Rainer Koch, Hans-Jörg Bauer</i>	145
An Experimental Investigation of Surfactant-Laden non-Newtonian Jet Breakup <i>Alexis Dechelette, Osvaldo Campanella, Carlos Corvalan, Paul Sojka</i>	147

Fundamentals 3

Modelling of spray injection from water mist fire suppression systems	149
<i>Simona Tonini, Andreas Theodorakakos, Manolis Gavaises, Gianpietro Elvio Cossali</i>	
The Stable distribution as a physically meaningful description of the size distribution from Rayleigh resonance jet break up type atomisers	151
<i>Phil Threlfall-Holmes</i>	
Evidences of turbulent cascading atomization in the bag-breakup regime	153
<i>Nicolas Rimbert, Guillaume Castanet</i>	

Measurement Techniques 1

Measurement of droplets temperature in a flame by using a global rainbow technique with a pulse laser	155
<i>Sawitree Saengkaew, Damien Bonin, Gerard Grehan</i>	
Numerical investigation of discriminated forward scattering: optimizing imaging optics for dense sprays	157
<i>David Sedarsky, Edouard Berrocal, Mark Linne</i>	
Experimental Investigation of Droplet-Droplet Interactions	159
<i>Róbert Bordás, Thomas Hagemeier, Dominique Thévenin</i>	

Measurement Techniques 2

Experimental characterization of isothermal and evaporative sprays	161
<i>Yannis Hardalupas, Srikrishna Sahu, Alexander M.K.P. Taylor</i>	
Concept for a versatile spray test rig for comparison of evaporation between kerosene and replacement fuels for aviation	165
<i>Johannes Fritzer, Fabrice Giuliani, Thomas Leitgeb, Andreas Lang</i>	
Velocity measurements of bubbles in liquid nitrogen	167
<i>Nicolas Fdida, Béatrice Patte, Jean-Bernard Blaisot, Eric Rouland, Valérie Bégin</i>	
Table-top flash X-ray diagnostics of dodecane sprays	169
<i>Eric Robert, Sébastien Dozias, Christophe Cachoncinlle, Jean Michel Pouvesle</i>	
Experimental Examination of the Liquid Sheet Disintegration Process Using Combined Photography and Fiber Based Measuring Techniques	171
<i>Emir Musemic, Marcel Gaspar, Frank Weichert, Heinrich Müller, Peter Walzel</i>	

Mini-Symposium on Advanced Optical Measurement Techniques 1

Analysis of the fluorescence signal from a single droplet using a model based on the Lorenz Mie Theory and on ray tracing methods	173
<i>Bruno Frackowiak, Cameron Tropea</i>	

Accounting for multiple scattering, signal attenuation and laser extinction using Structured Laser Illumination Planar Imaging	175
<i>Edouard Berrocal, Rikard Wellander, Elias Kristensson, Mattias Ritcher, Marcus Aldén, Mark Linne</i>	
Measurement of bi-component droplet vaporization using Global Rainbow Refractometry	177
<i>Virginel Bodoc, Olivier Rouzaud, Gerard Lavergne</i>	
Influence of Surface Roughness in Spray/Wall interaction Phenomena	179
<i>Davood Kalantari, Cameron Tropea</i>	
Spatio-temporal analysis of a liquid jet using a sub-picosecond optical gate	181
<i>Said Idlahcen, Claude Rozé, Jean-Bernard Blaisot, Loïc Mées, Thierry Girasole</i>	

Mini-Symposium on Advanced Optical Measurement Techniques 2

Measurement of continuous liquid jet length in atomizers with optical connectivity, electrical conductivity and high-speed photography techniques	183
<i>Georgios Charalampous, Constantinos Hadjiyiannis, Yannis Hardalupas, Alexander M.K.P. Taylor</i>	
Dynamic ILIDS measurement by means of high-speed Nd:YLF laser	185
<i>Tatsuya Kawaguchi, Isao Satoh, Takushi Saito</i>	
High Speed Shadowgraphy of a Combusting Air Blast Atomizer Spray at Elevated Pressure	187
<i>Christian Willert, Steffen Mößner, Stefan Freitag, Christoph Hassa</i>	
Optic and electric methods and test procedures for the pulse spray parameters	189
<i>Alexandr Nazarov, Anatoly Serov, Michael Bodrov, Valery Simakov</i>	

Powder Production in Spray Processes I

Process design of ultrasonic spray pyrolysis synthesis of Ru/TiO ₂ nanoparticles	191
<i>Srecko Stopic, Michael Schroeder, Andre Hellmann, Bernd Friedrich</i>	
Chaotic disintegration of suspension spray by a cross air flow	193
<i>Belal Al Zaitone, Vuong Doan, Ilia Roisman, Cameron Tropea</i>	
Heat and Mass Transfer accompanied by Crystallisation of single Particles containing Urea-water-solution	195
<i>Siniša Kontin, Andreas Höfler, Rainer Koch, Hans-Jörg Bauer</i>	
Drying Behavior of High Load Multiphase Droplets at High Temperature Conditions in an Acoustic Levitator	197
<i>Rosa Mondrágon, Leonor Hernández, Jose Enrique Juliá, Sergio Chiva, Juan Carlos Jarque, Vicent Cantavella</i>	
Tailoring particle morphology of spray-dried mannitol carrier particles by variation of drying outlet temperature	199
<i>Eva Maria Littringer, Axel Mescher, Peter Walzel, Nora Anne Urbanetz</i>	

Powder Production in Spray Processes 2

Analysis of time-dependend spray structures in spray processes in enclosures with square cross sections <i>Aljoscha Lampa, Udo Fritsching</i>	201
Prilling process: an alternative for atomization and producing solid particles of emulsions <i>Bipro Nath Dubey, M.R. Duxenneuner, Erich J. Windhab</i>	203
The trajectory and break-up of a particle laden liquid jet in the centrifugal field <i>Simon Gramlich, Manfred Piesche</i>	205
Modeling of drop sizes from effervescent atomization of gelatinized starch suspensions <i>Jewe Schröder, Marc Schlender, Paul Sojka, Volker Gaukel, Heike P. Schuchmann</i>	207

Spray Combustion

Measurement of Initial Conditions of a Kerosene Spray from a Generic Aeroengine Injector at Elevated Pressure <i>Stefan Freitag, Ulrich Meier, Johannes Heinze, Thomas Behrendt, Christoph Hassa</i>	209
Reference Data Generation of Spray Characteristics in Relation to Large 2-Stroke Marine Diesel Engines Using a Novel Spray Combustion Chamber Concept <i>Kai Herrmann, German Weisser, Reiner Schulz, Beat von Rotz, Konstantinos Boulouchos, Bruno Schneider</i>	211
Numerical and experimental study of aircraft engine ignition <i>Guillaume Linassier, Renaud Lecourt, Philippe Villedieu, Gerard Lavergne</i>	213
Fuel distribution measurements in a model low NO _x double annular combustor using Laser Induced Fluorescence <i>Russel Lockett, Douglas Greenhalgh</i>	215

Spray Characterisation 1

How biodiesel/diesel fuel blends affect spray breakup and emissions <i>Ilona Gostic, Clemens Senghaas, Michael Willmann, Michael Wensing</i>	217
High Pressure Spray Characterization of Vegetable Oils <i>Devendra Deshmukh, Avulapati Madan Mohan, T.N.C. Anand, R.V. Ravikrishna</i>	219
Improvement of Atomization Characteristics of Spray by Multi Hole Nozzle for Pressure Atomized Type Injector <i> Nobushige Tamaki, Atsushi Kato, Keita Imano, Kosuke Kato</i>	221
Measurement of the droplet size distribution of a full cone nozzle <i>Boris Terje Kohnen, Emir Musemic, Florian Straßburger, Benjamin Küpper, Peter Walzel</i>	223
Effect of the Liquid Injection Angle on the Atomization of Liquid Jets in Subsonic Crossflows <i>Hugo Almeida, João Sousa, Mário Costa</i>	225

Spray Characterisation 2

Effervescent Spray Characterization of Jatropha Pure Plant Oil	227
<i>Avulapati Madan Mohan, Devendra Deshmukh, T.N.C. Anand, R.V. Ravikrishna</i>	
Characterization of fuel oil atomizers in industrial operation	229
<i>Dorothee Chaillou, Vincent Alaterre, Xavier Paubel, Bertrand Leroux, Rémi Tsiava</i>	
Discharge characteristics of the atomization of superheated liquids	231
<i>Astrid Günther, M. Rossmeißl, Karl-Ernst Wirth</i>	
Characterization of a Horizontal Two-Phase Spray from an Effervescent Atomizer	233
<i>Johana Gomez, Brian Fleck, Jennifer McMillan, Jason Olfert</i>	

Spray Characterisation 3

Efficiency of different spray application methods in second crop maize	235
<i>Ali Bayat, Ali Bolat, Alper Soysal, Mustafa Güllü, Hikmet Sarihan</i>	
Radial Analysis of Fine Sprays Using Phase Doppler Anemometry (PDA)	237
<i>Joseph Stewart, Ghasem Nasr, Martin Burby, Amir Nourian</i>	
Experimental study on the pulsation of a liquid jet issued from a coaxial injector	239
<i>Minori Shiota, Koichi Kitami, Tetsuya Kon, Takao Inamura, Yoshio Nunome, Hiroshi Tamura</i>	

Spray Modeling 1

Primary Breakup Model Considering Spray Core Development	241
<i>Fabian Fischer, Barbara Heine, Cameron Tropea</i>	
Investigation of the Opening Angle between Two Sprays in Diverging Nozzles	243
<i>Vivak Luckhchoura, Rahul Pardeshi, Maria Cárdenas, Stefan Vogel, Abhinav Sharma, Norbert Peters, Reinhold Kneer</i>	
Study of the Influence of Initial Droplet Size Distribution on a Liquid Jet in Crossflow Model Performance	245
<i>Pasquale Di Martino, Giancarlo Sorrentino, Raffaele Ragucci</i>	
An extension of dynamic droplet deformation models to secondary atomization	247
<i>Frank-Oliver Bartz, Roland Schmehl, Rainer Koch, Hans-Jörg Bauer</i>	
Pressure-Swirl Atomization Modelling using the Eulerian Approach	249
<i>Abdelhak Belhadef, Ariane Vallet, Fabient Anselmet</i>	

Spray Modeling 2

A numerical characterization of new high-pressure multi-hole GDI injector	251
<i>Simone Malaguti, Stefano Fontanesi, Giuseppe Cantore</i>	

Large Eddy Simulation of Flow-Field and Micro-Particle Deposition in an Idealized Mouth-Throat Constricted Tube	253
<i>Xinguang Cui, Eva Gutheil</i>	
CFD analysis of non-evaporating sprays using the DQMOM method	255
<i>Allan Holm Nielsen, Bjørn Helge Hjertager, Tron Solberg</i>	
Numerical Simulations of the Interactions between a Vortex and a Liquid Gas Interface	257
<i>Jean Cousin, Thibaut Menard, Alain Berlemont, Jérôme Helie</i>	

Spray Modeling 3

Effervescent atomization of extra-light fuel-oil: Experiment and statistical evaluation of spray characteristics	259
<i>Jakub Broukal, Jiří Hájek, Jan Jedelský</i>	
Droplet Collision Modelling between Merging Immiscible Sprays in Direct Water Injection System	261
<i>Daisuke Tsuru, Hiroshi Tajima, Satoshi Kawauchi</i>	
Evaluation of active control strategies regarding airblast atomisation: assessments under non-evaporating and non-reactive conditions	263
<i>Fabrice Giuliani, Christoph Hennig, Johannes Fritzer, Thomas Leitgeb</i>	

Twin-Fluid Atomization

Spray Formation from Homogeneous Flash-Boiling Liquid Jets	265
<i>Eran Sher, Moti Levi</i>	
Effervescent Atomization of Diesel Fuel Containing Dissolved CO ₂	267
<i>Mohammad Karaen, Eran Sher</i>	
Performance of an effervescent atomizer for geo-engineering purposes	269
<i>Ranjani Padmanabhan, Daniel Guildenbecher, Daniel Hirleman, Paul Sojka</i>	
Effect of Flow Conditions on Spray Cone Angle of a Two-Fluid Atomizer	271
<i>Maziar Shafaei, Sayed Abdolhossein Banitabaei, Mehdi Ashjaee, Vahid Esfahanian</i>	
Are Sprays an Answer to Global Warming?	273
<i>Daniel Guildenbecher, Daniel Hirleman, Paul Sojka</i>	
Measured Velocities and Pressure Profile inside a Twin-Fluid Atomizer	275
<i>Britta Loskand, Peter Walzel</i>	

Poster Session

Stability and breakup of transient jets	277
<i>Ilai Sher</i>	

Correlations between the Two-Phase Gas/Liquid Spray Break-up Mechanism and the Dimensionless Numbers	279
<i>Mohammad Rahman, Ted Heidrick, Brian Fleck</i>	
Novel Modifications of Twin-fluid Atomizers: Performance, Advantages and Drawbacks	281
<i>Jan Jedelský, Miroslav Jícha</i>	
A Numerical Analysis for the Spray Characteristics of Liquefied n-butane Fuel	283
<i>Ji-Hun Kim, Doo-Sung Baik, Seang-Wock Lee, Yong-Seok Cho</i>	
High Pressure Overlapping Flat Sprays Nozzles	285
<i>Mohamed Ali El Kamkhi, Ghasem Nasr, Martin Burby, Amir Nourian</i>	
Measurements of fuel distribution and flame structure in kerosene-fuelled combustors using planar laser-induced fluorescence and OH* emissions	287
<i>Mikael Orain, Frederic Grisch, Hubert Verdier</i>	
Stability of plane Couette suspension flow with nonuniform particle concentration profile	289
<i>Sergei Boronin, Alexander Osipov</i>	
Effects of viscosity, pump mechanism and nozzle geometry on nasal spray droplet size	291
<i>Paul Kippax, Julie Suman, Anne Virden, Geralt Williams</i>	

Ongoing Research Poster Session

Modeling and Simulation of Evaporating Water/Nitrogen Spray Using Direct Quadrature Method of Moments	293
<i>Srikanth Reddy Gopireddy, Rana Muhammed Humza, Eva Gutheil</i>	
Analysis of the fuel distribution in the fuel spray axis	295
<i>Ireneusz Pielecha, Krzysztof Wislocki, Jakub Czajka, Dmytro Maslennikov</i>	
Visualization of the Flow in a New Injection Burner	297
<i>Felix Barreras, A. González-Espinosa, Antonio Lozano, Juan Antonio García, Esteban Calvo</i>	
Preliminary Study on the Granulation of the Molten Slag	299
<i>Sung Uk Ryu, Heung Soo Park</i>	
Dynamic Analysis of Two Rotating-Particles Collision Process by Molecular Dynamics Method	301
<i>Yuji Takizawa, Tsuyoshi Okamoto</i>	
Dynamic Analysis of Particle - Moving Solid Surface Interaction by Molecular Dynamics Method	303
<i>Yuki Omori, Tsuyoshi Okamoto</i>	
Application of Laser-Induced Exciplex Fluorescence with Alternative Diesel Fuels	305
<i>Ulrich Leidenberger, Christian Hüttel, S. Haugg, Dieter Brüggemann</i>	

Development of a Multi-Component Evaporation Model for Heavy Fuel Oil for Marine Engine Applications	307
<i>Nikolaos Stamoudis, Christos Chryssakis, Lambros Kaiktsis</i>	
Filament breakup of fat-based food emulsions during spraying	309
<i>Bipro Nath Dubey, M.R. Duxenneuner, Erich J. Windhab</i>	
Semi-Empirical Model to Calculate Spray Length Considering Evaporation Effect	311
<i>Alexandre Dias Flügel, Lars Zigan, Ingo Schmitz, Michael Wensing, Alfred Leipertz</i>
