

ESERA SUMMER SCHOOL 2017

CONTENT

ESERA.....	5
ESERA Summer Schools.....	6
ESERA Summer School 2017	7
The Venue – České Budějovice.....	7
University of South Bohemia in České Budějovice.....	9
Venue – Map of Campus	11
Travel Information.....	12
Organizing Committee of ESERA Summer School 2017	13
Schedule of ESERA Summer School 2017.....	15
List of Reviewers.....	16
List of Participants	17
List of Staff.....	22
Plenary Lectures Overview.....	25
Lecture 1: Supporting Changes in Teacher Practice with A Learning Progression: Results of the Elevate Study	25
Lecture 2: Researching Socio-scientific Issues – An Ontological Problem	25
Lecture 3: Nature of Science and Scientific Inquiry for Scientific Literacy.....	26
Lecture 4: Eco-schools Evaluation and Innovation Projects – Interactions between Research, Recommendations and Practices	26
Lecture 5: Learning Science outside the Classroom.....	27
Workshops Overview	28
Workshop 1: Using Video in Science Education Research: Methods for data collection and analysis.....	28
Workshop 2: Publishing and Reviewing in Science Education	28
Workshop 3: Making Tacit Knowledge Explicit: Three Methods to Assess Attitudes and Beliefs	29
Workshop 4: Studying Formative Assessment Tasks and Classroom Practices with Mixed Methods	29
Workshop 5: Ethical Questions Based on PhD Research	30
Workshop 6: Strategies for Making Sense of Data: Conventions and Ways to a Valid Interpretation of Data	30

Synopses.....	32
Session A: Assessment and Evaluation.....	33
Adoption of ICT-based Matriculation Examination Changes Science Teachers' Perspectives to Teaching and Assessing ICT Related Science Skills (<i>M. Tamm</i>).....	34
Session B: Biology Education.....	38
Why Biology Teachers Should Be Critical of Scientific Texts (<i>T. Glomm</i>).....	39
Human Intuitions and Genetic Determinism (<i>F. Stern</i>).....	43
Investigating the Effect of Formative Assessment Design Activities on Senior Biology Student Teachers' Understanding of Modern Genetics and Pedagogical Content Knowledge (<i>N. R. Taskin</i>).....	46
Session C: Chemistry Education.....	50
The Development of Critical Thinking Skills through Chemistry for Year 9 and Year 10 Students in England (<i>P. Axelithioti</i>).....	51
Development and Evaluation of Learning Progressions on chemical concepts for low-achieving students (<i>K. N. Celik</i>).....	55
Teaching and Learning about the Nature and Behaviour of Matter in Upper Primary and Lower Secondary School Classes in England. An Exploration of the Relationship between the Specified, Interpreted, Enacted and Experienced Curriculum (<i>E. Coppard</i>).....	59
Development of a Training to Promote the Academic Concept of Structure of Matter (<i>A. Jackowski</i>)..	63
Developing Pre-service Science Teachers' Ability to Design and Implement Representations of Nature of Matter (<i>E. Sahin</i>).....	67
Implementation of the Pre-learning Strategy in Chemistry Education (<i>S. Smerdel</i>).....	70
Session D: Educational Technology.....	74
Building of Interpersonal Communication Skills of New Generation Students Employing Responsible Research and Innovation (<i>A. Ivanauskas</i>).....	75
Session E: Environmental Education.....	80
The implementation and Effectiveness of Whole School ESD in Sweden (<i>D. Olsson</i>).....	81
Investigating the Gap between Teachers' Beliefs and Practices in Education for Sustainable Development Teaching (<i>E. Sinakou</i>).....	85
Session G: Cultural, Social, and Gender Issues.....	89
Analysis of Interactions in a Multilingual Science Classroom in Luxembourg (<i>A. Gorges</i>).....	90
Subject Choice in Secondary Schooling: A Comparative Study of the Factors Impacting Subject Choice in Post-compulsory Education for Physics and Modern Foreign Languages in England (<i>S. Takei</i>).....	94

Session H: History, Philosophy, and Sociology of Science.....	98
A Self-Study On Development Of Students In Stem Careers By Enriched Applications Within History Of Science (<i>I. Dönmez</i>).....	99
History and Nature of Science: Science Lessons in Multicultural Contexts in the UK (<i>H. E. Gandolfi</i>) ..	103
Session I: Science Learning in Informal Contexts	107
A Case Study Exploring High School Students' Engagement with Citizen Science Projects (<i>L. A. Bhulana</i>)	108
Session O: Other	113
Examining Elements of Physics Student Attrition in a Finnish University: The Perceived Meanings and Interaction in Teacher Tutor System (<i>L. Timonen</i>)	114
Primary Science Subject Leaders: The Stories They Live By. A Study of the Impact of The PSQM Programme on Teacher Identity and Agency (<i>C. Warren</i>)	118
Session P: Physics Education	122
What Do Students' Reports of Scientific Investigations Tell Us about Their Understanding of Scientific Inquiry? (<i>K. Gierl</i>)	123
Developing Students' Problem Solving Ability: How Do Physics Lessons Contribute? (<i>F. Gigl</i>).....	127
Increasing Motivation of Physics Education Students by Focussing on School-related Content Knowledge in University Physics Courses (<i>J. Massolt</i>)	131
Computer-supported Collaborative Learning Enhancing Physics Studying in Higher Education: The View Point of Student-Student Interaction (<i>J. Lämsä</i>)	134
Enhancing Student Data Analysis Skills in Practical Work (<i>F. Pols</i>)	138
Teaching the Concept of Field in Physics: Historical and Didactical Approaches (<i>Z. Saadi</i>)	142
Self-regulated Learning in a Physic Experimental Environment (<i>V. Schad</i>)	146
Session L: Science Learning	150
The Effects of Learning Activities Based on Argumentation on Conceptual Understanding of 7th Graders about "Force and Motion" Unit and Establishing Thinking Friendly Classroom Environment (<i>A. Buber</i>)	151
Students' Learning Processes of Scientific Inquiry Knowledge and Abilities (<i>J. J. Hägele</i>)	154
The Energy Transition as a Context for Secondary Science Education (<i>S. Hüfner</i>)	158
The Understanding of Evolution at Primary Schools in the UK: Can an Intervention Improve Conceptual Understanding? (<i>J. McGowan-Smyth</i>)	162
Enhancing Interdisciplinary Approach in Science Education Using Concept Mapping (<i>A. Möllits</i>)	166

Session T: Science Teaching	171
Problem-oriented Learning Situations in Primary Science Education (<i>T. Češková</i>)	172
Improving Pedagogical Practices of Implementing Inquiry Teaching in the Primary Science Classroom: An Action Research Study (<i>M. S. A. Mat Noor</i>).....	175
Modeling Science Teachers' Professional Knowledge in Elementary Particle Physics (<i>M. Oettle</i>).....	180
An Investigation of Teaching for Conceptual Understanding of Science Concepts in a Year 5 UK Primary Classroom (<i>S. Surendran</i>).....	183
Science Teachers' Moves Contribution To Elementary School Students' Argumentation Skills And Quality About Socio-Scientific Issues (<i>H. Yanış</i>).....	187
Session S: Science Teacher Education	191
Students' Perceptions of a New Lecture Format in Organic Chemistry (<i>R. M. Bittorf</i>).....	192
Representations as Tool in the Force Concept Construction in Pre-service Primary Teacher Training (<i>A. Garcia-Lladó</i>)	196
A Longitudinal Study of Science Teachers' Personal Epistemologies and Perceptions of Education Studies (<i>L. Guilfoyle</i>).....	200
Using Video-cases to Support Pre-service Chemistry Teachers' PCK Development and Reconstruction about Chemical Equilibrium (<i>J. Heeg</i>).....	205
Supporting Science Teachers When Teaching outside Their Subject Specialism (<i>D. Mizzi</i>).....	209
The Effect of the Open Event within Transition Processes on Students' Attitudes towards Science Lessons across the Transfer from Primary to Secondary School (<i>S. Norris</i>)	213
Analysing and Enhancing Pre-service Physics Teachers' Competence of Reflection during the Internship (<i>A. Nowak</i>)	217
Supporting the Acquisition of Structured and Connected Academic and School Related Content Knowledge of Pre-service Chemistry Teachers by the Means of an Additional Training (<i>J. Stäcker</i>)	221
Video as a Tool for Increasing Motivation and Development Student's Skills in Didactics of Biology (<i>A. Vitásková</i>)	225
How Scientific Inquiry is Actually Implemented by Italian Secondary School Science Teachers? (<i>A. Zappia</i>)	229
Acknowledgement	233
