Corvallis, Oregon, U.S.A.*

This volume presents a collection of papers by specialists contributing to the activities of the International Geographical Union Commission on 'Natural Hazard Studies'. The main topics are: morphotectonic activities, slope movements, glacial, erosion and weathering hazards and man-made rapid modelling processes. Research on basic geomorphological hazards in high mountains can be understood not only as a set of case studies, but primarily as a rare opportunity for the preparation of theoretical models and for the understanding of the general architecture of the origin of natural disasters.

Audience

This specialized book will be useful for natural scientists, graduate geographers and geologists and postgraduate students in earth sciences.

CONTENTS

Contents	v
Dedication to Professor Clifford Embleton	vii
Prologue	ix
Sedimentology and clast orientation of deposits produced by glacial-lake outbursts floods in the Mount Everest region, Nepal <i>Daniel A. Cenderelli, Ellen E. Wohl</i>	1
Catastrophic flood flushing of sediment, western Himalaya, Pakistan <i>John F. Shroder, jr., M. P. Bishop, R. Scheppy</i>	27
Landslides and deserted places in the semi-arid environment of the Inner Himalaya <i>Jussi Baade, Roland Mäusbacher, Günther A. Wagner, Erwin Heine, Robert Kostka</i>	49
Glacier-induced hazards as a consequence of glacigenic mountain landscape, in particular glacier- and moraine dammed lake outbursts and holocene debris production <i>Matthias Kuhle, Sigrid Meiners and Lasafam Iturrizaga</i>	63
Chaos theory of slides/mud flows in mountain areas. Example: Xiaojiang Basin, NE Yunnan, China <i>Adrian E. Scheidegger</i>	97
The salt weathering hazard in deserts <i>Andrew Goudie</i>	107
Impact of conversion of upland forest to tourism and agricultural land uses in the Gunung Kinabalu Highlands, Sabah, Malaysia <i>Waidi Sinun, Ian Douglas</i>	121
Landslides in the Rocky Mountains of Canada <i>D. M. Cruden, X. Q. Hu</i>	133
Late Holocene sturzstroms in Glacier National Park, Montana, U.S.A. <i>David R. Butler, George P. Malanson, Forrest D. Wilkerson and Ginger L. Schmid</i>	149

Storm induced mass-wasting in the Oregon Coast Range, U.S.A. <i>Charles L. Rosenfeld</i>	167
Natural hazards in relation to present stratovolcano deglaciation: Popocatepetl and Citlatepetl, Mexico <i>David Palacios</i>	177
Andean landslide hazards <i>T. A. Blodgett, C. Blizzard, B. L. Isacks</i>	211
Fluvial hazards in a steepland mountain environment, southern Bolivia <i>Jeff Warburton, Mark Macklin, David Preston</i>	229
Geomorphological response of neotectonic activity along the Cordillera Blanca fault zone, Peru <i>Vít Vilímek, Marco Zapata Luyo</i>	245
Geomorphological hazards and risks in the High Tatra Mountains <i>Jan Kalvoda</i>	263
Geomorphologic hazards in a glaciated granitic massif: Sierra de Gredos, Spain <i>David Palacios, Javier de Marcos</i>	285
Index	309
