

CONTENTS

1. Introduction

- 1 -

- 1.1. Production of Polymeric Foams - 6 -
 - 1.1.1. Expandable Polystyrene (EPS) Foam - 7 -
 - 1.1.2. Extruded Polystyrene (XPS) Foam - 9 -
 - 1.1.3. Polypropylene (PP) Foam - 10 -

2. Experimental Techniques

- 13 -

- 2.1. Video-microscopy Observations - 13 -
- 2.2. Atomic Force Microscopy (AFM) - 16 -
 - 2.2.1. Illustration of Various AFM Measurements - 16 -
- 2.3. Gravimetric Sorption and Diffusion Measurements - 36 -
 - 2.3.1. Processing of Gravimetric Data - 37 -

3. Sorption in Polymers

- 39 -

- 3.1. Sorption Equilibria in Polymers - 39 -
 - 3.1.1. Models of Sorption Equilibria - 40 -
 - 3.1.2. Sorption Equilibria of Pentane in Polystyrene –Results and Discussion - 53 -
- 3.2. Diffusion in Polymers - 65 -
 - 3.2.1. Diffusion Models - 65 -
 - 3.2.2. Diffusion of Pentane in Polystyrene – Results and Discussion - 82 -
- 3.3. Concluding Remarks on Sorption Equilibria and Diffusion of N-pentane in Polystyrene - 99 -

4. Theory of Polymeric Foaming

- 100 -

- 4.1. Survey of Polymeric Foaming Knowledge - 100 -
- 4.2. Growth of Gas Bubble in Polymer Fluid - 106 -
- 4.3. Bubble Initiation - 110 -
 - 4.3.1. Nucleation - 110 -
 - 4.3.2. Spinodal Decomposition - 119 -
- 4.4. Bubble Stability - 123 -

5.	Foaming of Polystyrene Particles	- 125 -
5.1.	Video-microscopic Observation	- 125 -
5.2.	Incomplete Impregnation of Polystyrene Particle	- 127 -
5.3.	Experimental Results of Foaming	- 130 -
5.3.1.	Swelling the Particle during the Impregnation	- 130 -
5.3.2.	Initial Foaming Experiments	- 135 -
5.3.3.	Effect of Impregnation Time on Particle Foaming	- 136 -
5.3.4.	Effect of N-pentane Pressure on Foaming	- 138 -
5.3.5.	Effect of Pentane Pressure on the Size of Solid Core	- 141 -
5.3.6.	Effect of Particle Size on Foaming	- 143 -
5.3.7.	Effect of Initial Particle size on the size of solid core	- 145 -
5.3.8.	Effect of Temperature on Particle Foaming	- 150 -
5.3.9.	Effect of Temperature Induced Foaming of Preimpregnated Polystyrene Particles	- 152 -
5.4.	Nucleation Density of N-pentane Bubbles	- 153 -
5.5.	Cell Growth Model of Pentane Bubble	- 154 -
5.1.	Concluding Remarks	- 156 -
6.	Semi-crystalline Polymers	- 159 -
6.1.	Survey of Semi-crystalline Morphology Investigation	- 159 -
6.1.1.	Mechanical Properties of Semi-crystalline Polymers	- 167 -
6.1.2.	Sorption in Semi-crystalline Polymers	- 169 -
6.2.	Results and Discussion	- 171 -
6.2.1.	AFM Investigation of Semi-crystalline Morphology	- 171 -
7.	Conclusions	- 191 -
8.	List of Symbols	- 194 -
9.	Bibliography	- 200 -
10.	List of Publications	- 216 -
