<b>Foreword</b>	<b>xiii</b>
<b>Acknowledgments</b>	<b>xv</b>
<b>Introduction</b>	<b>xvii</b>
 <b>CHAPTER 1</b>	
<b>Market Organization and Structure</b>	<b>1</b>
Learning Outcomes	1
1. Introduction	1
2. The Functions of the Financial System	2
2.1. Helping People Achieve Their Purposes in Using the Financial System	3
2.2. Determining Rates of Return	8
2.3. Capital Allocation Efficiency	9
3. Assets and Contracts	10
3.1. Classifications of Assets and Markets	11
3.2. Securities	13
3.3. Currencies	16
3.4. Contracts	16
3.5. Commodities	22
3.6. Real Assets	22
4. Financial Intermediaries	24
4.1. Brokers, Exchanges, and Alternative Trading Systems	25
4.2. Dealers	26
4.3. Securitizers	27
4.4. Depository Institutions and Other Financial Corporations	29
4.5. Insurance Companies	30
4.6. Arbitrageurs	31
4.7. Settlement and Custodial Services	33
4.8. Summary	35
5. Positions	35
5.1. Short Positions	36
5.2. Levered Positions	38

6. Orders	41
6.1. Execution Instructions	42
6.2. Validity Instructions	45
6.3. Clearing Instructions	47
7. Primary Security Markets	47
7.1. Public Offerings	48
7.2. Private Placements and Other Primary Market Transactions	50
7.3. Importance of Secondary Markets to Primary Markets	51
8. Secondary Security Market and Contract Market Structures	51
8.1. Trading Sessions	51
8.2. Execution Mechanisms	52
8.3. Market Information Systems	56
9. Well-Functioning Financial Systems	56
10. Market Regulation	58
11. Summary	61
Problems	63

## CHAPTER 2

<b>Security Market Indices</b>	<b>73</b>
Learning Outcomes	73
1. Introduction	73
2. Index Definition and Calculations of Value and Returns	75
2.1. Calculation of Single-Period Returns	75
2.2. Calculation of Index Values over Multiple Time Periods	77
3. Index Construction and Management	78
3.1. Target Market and Security Selection	79
3.2. Index Weighting	79
3.3. Index Management: Rebalancing and Reconstitution	88
4. Uses of Market Indices	90
4.1. Gauges of Market Sentiment	90
4.2. Proxies for Measuring and Modeling Returns, Systematic Risk, and Risk-Adjusted Performance	90
4.3. Proxies for Asset Classes in Asset Allocation Models	90
4.4. Benchmarks for Actively Managed Portfolios	91
4.5. Model Portfolios for Investment Products	91
5. Equity Indices	91
5.1. Broad Market Indices	91
5.2. Multimarket Indices	92
5.3. Sector Indices	92
5.4. Style Indices	93
6. Fixed-Income Indices	94
6.1. Construction	94
6.2. Types of Fixed-Income Indices	95
7. Indices for Alternative Investments	96
7.1. Commodity Indices	98
7.2. Real Estate Investment Trust Indices	98
7.3. Hedge Fund Indices	98

8. Summary	101
Problems	102

## CHAPTER 3

### **Market Efficiency** **109**

Learning Outcomes	109
1. Introduction	109
2. The Concept of Market Efficiency	111
2.1. The Description of Efficient Markets	111
2.2. Market Value versus Intrinsic Value	113
2.3. Factors Contributing to and Impeding a Market's Efficiency	114
2.4. Transaction Costs and Information-Acquisition Costs	117
3. Forms of Market Efficiency	118
3.1. Weak Form	119
3.2. Semistrong Form	119
3.3. Strong Form	122
3.4. Implications of the Efficient Market Hypothesis	122
4. Market Pricing Anomalies	124
4.1. Time-Series Anomalies	125
4.2. Cross-Sectional Anomalies	127
4.3. Other Anomalies	128
4.4. Implications for Investment Strategies	130
5. Behavioral Finance	131
5.1. Loss Aversion	131
5.2. Overconfidence	132
5.3. Other Behavioral Biases	132
5.4. Information Cascades	133
5.5. Behavioral Finance and Efficient Markets	133
6. Summary	134
Problems	134

## CHAPTER 4

### **Portfolio Management: An Overview** **139**

Learning Outcomes	139
1. Introduction	139
2. A Portfolio Perspective on Investing	140
2.1. Portfolio Diversification: Avoiding Disaster	140
2.2. Portfolios: Reduce Risk	142
2.3. Portfolios: Composition Matters for the Risk–Return Tradeoff	145
2.4. Portfolios: Not Necessarily Downside Protection	145
2.5. Portfolios: The Emergence of Modern Portfolio Theory	148
3. Investment Clients	149
3.1. Individual Investors	149
3.2. Institutional Investors	150

4. Steps in the Portfolio Management Process	156
4.1. Step One: The Planning Step	156
4.2. Step Two: The Execution Step	156
4.3. Step Three: The Feedback Step	159
5. Pooled Investments	160
5.1. Mutual Funds	160
5.2. Types of Mutual Funds	164
5.3. Other Investment Products	167
6. Summary	172
Problems	172

## CHAPTER 5

### Portfolio Risk and Return: Part I 175

Learning Outcomes	175
1. Introduction	175
2. Investment Characteristics of Assets	176
2.1. Return	176
2.2. Other Major Return Measures and Their Applications	185
2.3. Variance and Covariance of Returns	189
2.4. Historical Return and Risk	192
2.5. Other Investment Characteristics	197
3. Risk Aversion and Portfolio Selection	200
3.1. The Concept of Risk Aversion	201
3.2. Utility Theory and Indifference Curves	202
3.3. Application of Utility Theory to Portfolio Selection	206
4. Portfolio Risk	209
4.1. Portfolio of Two Risky Assets	210
4.2. Portfolio of Many Risky Assets	215
4.3. The Power of Diversification	216
5. Efficient Frontier and Investor's Optimal Portfolio	222
5.1. Investment Opportunity Set	222
5.2. Minimum-Variance Portfolios	223
5.3. A Risk-Free Asset and Many Risky Assets	225
5.4. Optimal Investor Portfolio	228
6. Summary	234
Problems	234

## CHAPTER 6

### Portfolio Risk and Return: Part II 243

Learning Outcomes	243
1. Introduction	243
2. Capital Market Theory	244
2.1. Portfolio of Risk-Free and Risky Assets	244
2.2. The Capital Market Line	248

3. Pricing of Risk and Computation of Expected Return	256
3.1. Systematic Risk and Nonsystematic Risk	257
3.2. Calculation and Interpretation of Beta	259
4. The Capital Asset Pricing Model	267
4.1. Assumptions of the CAPM	267
4.2. The Security Market Line	269
4.3. Applications of the CAPM	272
5. Beyond the Capital Asset Pricing Model	284
5.1. The CAPM	284
5.2. Limitations of the CAPM	284
5.3. Extensions to the CAPM	286
5.4. The CAPM and Beyond	287
6. Summary	287
Problems	288

## CHAPTER 7

### Basics of Portfolio Planning and Construction 295

Learning Outcomes	295
1. Introduction	295
2. Portfolio Planning	296
2.1. The Investment Policy Statement	296
2.2. Major Components of an IPS	297
2.3. Gathering Client Information	309
3. Portfolio Construction	312
3.1. Capital Market Expectations	312
3.2. The Strategic Asset Allocation	313
3.3. Steps toward an Actual Portfolio	321
3.4. Additional Portfolio Organizing Principles	325
4. Summary	326
Problems	327

## CHAPTER 8

### Overview of Equity Securities 331

Learning Outcomes	331
1. Introduction	331
2. Equity Securities in Global Financial Markets	332
3. Types and Characteristics of Equity Securities	338
3.1. Common Shares	339
3.2. Preference Shares	343
4. Private versus Public Equity Securities	345
5. Investing in Nondomestic Equity Securities	347
5.1. Direct Investing	348
5.2. Depository Receipts	349

6. Risk and Return Characteristics of Equity Securities	353
6.1. Return Characteristics of Equity Securities	353
6.2. Risk of Equity Securities	354
7. Equity Securities and Company Value	356
7.1. Accounting Return on Equity	356
7.2. The Cost of Equity and Investors' Required Rates of Return	361
8. Summary	362
Problems	363

## CHAPTER 9

### Introduction to Industry and Company Analysis 369

Learning Outcomes	369
1. Introduction	370
2. Uses of Industry Analysis	370
3. Approaches to Identifying Similar Companies	371
3.1. Products and/or Services Supplied	371
3.2. Business-Cycle Sensitivities	372
3.3. Statistical Similarities	374
4. Industry Classification Systems	374
4.1. Commercial Industry Classification Systems	374
4.2. Governmental Industry Classification Systems	378
4.3. Strengths and Weaknesses of Current Systems	380
4.4. Constructing a Peer Group	380
5. Describing and Analyzing an Industry	385
5.1. Principles of Strategic Analysis	386
5.2. External Influences on Industry Growth, Profitability, and Risk	405
6. Company Analysis	412
6.1. Elements That Should Be Covered in a Company Analysis	413
6.2. Spreadsheet Modeling	416
7. Summary	417
Problems	420

## CHAPTER 10

### Equity Valuation: Concepts and Basic Tools 425

Learning Outcomes	425
1. Introduction	426
2. Estimated Value and Market Price	426
3. Major Categories of Equity Valuation Models	428
4. Present Value Models: The Dividend Discount Model	430
4.1. Preferred Stock Valuation	434
4.2. The Gordon Growth Model	436
4.3. Multistage Dividend Discount Models	441
5. Multiplier Models	445
5.1. Relationships among Price Multiples, Present Value Models, and Fundamentals	445

5.2. The Method of Comparables	449
5.3. Illustration of a Valuation Based on Price Multiples	452
5.4. Enterprise Value	454
6. Asset-Based Valuation	457
7. Summary	461
Problems	462

## CHAPTER 11

### Equity Market Valuation 469

Learning Outcomes	469
1. Introduction	469
2. Estimating a Justified P/E Ratio	470
2.1. Neoclassical Approach to Growth Accounting	470
2.2. The China Economic Experience	472
2.3. Quantifying China's Future Economic Growth	474
2.4. Equity Market Valuation	476
3. Top-Down and Bottom-Up Forecasting	484
3.1. Portfolio Suitability of Each Forecasting Type	485
3.2. Using Both Forecasting Types	487
3.3. Top-Down and Bottom-Up Forecasting of Market Earnings per Share	488
4. Relative Value Models	491
4.1. Earnings-Based Models	491
4.2. Asset-Based Models	502
5. Summary	506
Problems	508

## CHAPTER 12

### Technical Analysis 515

Learning Outcomes	515
1. Introduction	515
2. Technical Analysis: Definition and Scope	516
2.1. Principles and Assumptions	516
2.2. Technical and Fundamental Analysis	518
3. Technical Analysis Tools	520
3.1. Charts	520
3.2. Trend	530
3.3. Chart Patterns	532
3.4. Technical Indicators	544
3.5. Cycles	562
4. Elliott Wave Theory	563
5. Intermarket Analysis	566
6. Summary	568
Problems	570
