Table of contents

1. Material properties 5

2. Section properties of hot rolled structural sections 7

Notations for I, IPE, HEA, HEB sections 7

I sections 8

IPE sections 10

HEA sections 12

HEB sections 14

HEM sections 16

U sections 18

UPE sections 20

Equal leg angles 22

Unequal leg angles 28

Circular hollow sections 32

Rectangular hollow sections 46

Square hollow sections 52

3. Section properties of cold-formed structural sections 55

Corrugated sheets 55

Z-sections 60

Z-sections with profiled web 61

4. Detailing dimensions 64

Bolt spacing 64

Detailing dimensions for I sections 65

Detailing dimensions for IPE sections 66

Detailing dimensions for HEA sections 67

Detailing dimensions for HEB sections 68

Detailing dimensions for HEM sections 69

Detailing dimensions for U sections 70

Detailing dimensions for UPE sections 71

Detailing dimensions for angles 72

5. Design of steel structures according to EN 1993-1-1 73
Serviceability Limit States 73
Classification of cross sections 73
Partial safety factors 77
Tension 77
Compression 79
Bending 79
Shear 80
Bending and shear 80
Bending and axial force 81
Lateral-torsional buckling of uniform members in compression 83
Buckling of uniform members in bending 89
Uniform members in bending and axial compression 93
Uniform built-up compression members 96
General rules 96
Battened compression members 97
Laced compression members 98
Closely spaced built-up members 99

6. Design of bolted connections according to EN 1993-1-8 100
Categories of bolted connections 100
Resistance of bolts in shear 102
Resistance of bolts in bearing 103
Resistance of bolts in tension 104
Punching shear resistance 105
Slip resistance of preloaded bolts 106
Combined tension and shear 108
Long joints 108

7. Design of welded connections according to EN 1993-1-8 109
Resistance of fillet welds 109
Long welds 110
Resistance of fillet weld loaded parallel and perpendicular to weld 111
