

CONTENTS

THEMES AND CAPSTONE UNITS

-  17: History, instability, and growth
-  19: Inequality
-  21: Innovation
-  18: Global economy
-  20: Environment
-  22: Politics and policy

PREFACE	xiii
---------	------

A NOTE TO INSTRUCTORS	xvii
-----------------------	------

PRODUCING <i>THE ECONOMY</i>	xxi
------------------------------	-----

1	THE CAPITALIST REVOLUTION	1
1.1	Income inequality  	3
1.2	Measuring income and living standards	6
1.3	History's hockey stick: Growth in income    	11
1.4	The permanent technological revolution  	15
1.5	The economy and the environment 	18
1.6	Capitalism defined: Private property, markets, and firms 	21
1.7	Capitalism as an economic system 	25
1.8	The gains from specialization  	27
1.9	Capitalism, causation and history's hockey stick   	31
1.10	Varieties of capitalism: Institutions, government, and the economy   	34
1.11	Economics and the economy	38
1.12	Conclusion	39
1.13	References	40
2	TECHNOLOGY, POPULATION, AND GROWTH	43
2.1	Economists, historians, and the Industrial Revolution   	46
2.2	Economic models: How to see more by looking at less	49
2.3	Basic concepts: Prices, costs, and innovation rents 	52
2.4	Modelling a dynamic economy: Technology and costs 	55
2.5	Modelling a dynamic economy: Innovation and profit 	60
2.6	The British Industrial Revolution and incentives for new technologies   	64
2.7	Malthusian economics: Diminishing average product of labour	69
2.8	Malthusian economics: Population grows when living standards rise  	73
2.9	The Malthusian trap and long-term economic stagnation  	78

2.10	Escaping from Malthusian stagnation ● ● ●	81
2.11	Conclusion	84
2.12	References	85
3	SCARCITY, WORK, AND CHOICE	87
3.1	Labour and production	90
3.2	Preferences	95
3.3	Opportunity costs	100
3.4	The feasible set	102
3.5	Decision making and scarcity	105
3.6	Hours of work and economic growth ● ●	108
3.7	Income and substitution effects on hours of work and free time	112
3.8	Is this a good model?	119
3.9	Explaining our working hours: Changes over time ● ●	121
3.10	Explaining our working hours: Differences between countries ● ●	125
3.11	Conclusion	128
3.12	References	129
4	SOCIAL INTERACTIONS	131
4.1	Social interactions: Game theory	134
4.2	Equilibrium in the invisible hand game	137
4.3	The prisoners' dilemma ●	141
4.4	Social preferences: Altruism ●	144
4.5	Altruistic preferences in the prisoners' dilemma ●	147
4.6	Public goods, free riding, and repeated interaction ●	149
4.7	Public good contributions and peer punishment	153
4.8	Behavioural experiments in the lab and in the field ●	155
4.9	Cooperation, negotiation, conflicts of interest, and social norms ● ● ●	159
4.10	Dividing a pie (or leaving it on the table) ●	161
4.11	Fair farmers, self-interested students? ●	164
4.12	Competition in the ultimatum game	169
4.13	Social interactions: Conflicts in the choice among Nash equilibria ● ● ● ● ●	170
4.14	Conclusion	178
4.15	References	178
5	PROPERTY AND POWER: MUTUAL GAINS AND CONFLICT	181
5.1	Institutions and power ● ●	183
5.2	Evaluating institutions and outcomes: The Pareto criterion ●	185
5.3	Evaluating institutions and outcomes: Fairness ● ●	188
5.4	A model of choice and conflict ● ●	191
5.5	Technically feasible allocations	194
5.6	Allocations imposed by force ●	196
5.7	Economically feasible allocations and the surplus ●	199
5.8	The Pareto efficiency curve and the distribution of the surplus ● ● ●	205
5.9	Politics: Sharing the surplus ●	207
5.10	Bargaining to a Pareto-efficient sharing of the surplus	209
5.11	Angela and Bruno: The moral of the story ● ● ● ●	211
5.12	Measuring economic inequality ● ●	212
5.13	A policy to redistribute the surplus and raise efficiency ● ●	219
5.14	Conclusion	223
5.15	References	224

2.10	Escaping from Malthusian stagnation ● ● ●	81
2.11	Conclusion	84
2.12	References	85
3	SCARCITY, WORK, AND CHOICE	87
3.1	Labour and production	90
3.2	Preferences	95
3.3	Opportunity costs	100
3.4	The feasible set	102
3.5	Decision making and scarcity	105
3.6	Hours of work and economic growth ● ●	108
3.7	Income and substitution effects on hours of work and free time	112
3.8	Is this a good model?	119
3.9	Explaining our working hours: Changes over time ● ●	121
3.10	Explaining our working hours: Differences between countries ● ●	125
3.11	Conclusion	128
3.12	References	129
4	SOCIAL INTERACTIONS	131
4.1	Social interactions: Game theory	134
4.2	Equilibrium in the invisible hand game	137
4.3	The prisoners' dilemma ●	141
4.4	Social preferences: Altruism ●	144
4.5	Altruistic preferences in the prisoners' dilemma ●	147
4.6	Public goods, free riding, and repeated interaction ●	149
4.7	Public good contributions and peer punishment	153
4.8	Behavioural experiments in the lab and in the field ●	155
4.9	Cooperation, negotiation, conflicts of interest, and social norms ● ● ●	159
4.10	Dividing a pie (or leaving it on the table) ●	161
4.11	Fair farmers, self-interested students? ●	164
4.12	Competition in the ultimatum game	169
4.13	Social interactions: Conflicts in the choice among Nash equilibria ● ● ● ●	170
4.14	Conclusion	178
4.15	References	178
5	PROPERTY AND POWER: MUTUAL GAINS AND CONFLICT	181
5.1	Institutions and power ● ●	183
5.2	Evaluating institutions and outcomes: The Pareto criterion ●	185
5.3	Evaluating institutions and outcomes: Fairness ● ●	188
5.4	A model of choice and conflict ● ●	191
5.5	Technically feasible allocations	194
5.6	Allocations imposed by force ●	196
5.7	Economically feasible allocations and the surplus ●	199
5.8	The Pareto efficiency curve and the distribution of the surplus ● ●	205
5.9	Politics: Sharing the surplus ●	207
5.10	Bargaining to a Pareto-efficient sharing of the surplus	209
5.11	Angela and Bruno: The moral of the story ● ● ●	211
5.12	Measuring economic inequality ● ●	212
5.13	A policy to redistribute the surplus and raise efficiency ● ●	219
5.14	Conclusion	223
5.15	References	224

9.10	Labour unions: Bargained wages and the union voice effect ●●●	392
9.11	Labour market policies to address unemployment and inequality ●●	397
9.12	Looking backward: Baristas and bread markets	400
9.13	Conclusion	403
9.14	References	404
10	BANKS, MONEY, AND THE CREDIT MARKET	407
10.1	Money and wealth	410
10.2	Borrowing: Bringing consumption forward in time	413
10.3	Impatience and the diminishing marginal returns to consumption	415
10.4	Borrowing allows smoothing by bringing consumption to the present	419
10.5	Lending and storing: Smoothing and moving consumption to the future	421
10.6	Investing: Another way to move consumption to the future ●	423
10.7	Assets, liabilities, and net worth	428
10.8	Banks, money, and the central bank ●●	430
10.9	The central bank, the money market, and interest rates ●●	434
10.10	The business of banking and bank balance sheets	439
10.11	The central bank's policy rate can affect spending ●	444
10.12	Credit market constraints: A principal-agent problem ●	446
10.13	Inequality: Lenders, borrowers, and those excluded from credit markets ●	449
10.14	Conclusion	452
10.15	References	453
11	RENT-SEEKING, PRICE-SETTING, AND MARKET DYNAMICS	455
11.1	How people changing prices to gain rents can lead to a market equilibrium	459
11.2	How market organization can influence prices	464
11.3	Short-run and long-run equilibria	466
11.4	Prices, rent-seeking, and market dynamics at work: Oil prices ●●●	468
11.5	The value of an asset: Basics	473
11.6	Changing supply and demand for financial assets	477
11.7	Asset market bubbles	480
11.8	Modelling bubbles and crashes ●	484
11.9	Non-clearing markets: Rationing, queuing, and secondary markets ●	491
11.10	Markets with controlled prices ●	493
11.11	The role of economic rents ●●●●	496
11.12	Conclusion	497
11.13	References	498
12	MARKETS, EFFICIENCY, AND PUBLIC POLICY	501
12.1	Market failure: External effects of pollution ●	505
12.2	External effects and bargaining ●	509
12.3	External effects: Policies and income distribution ●●●●	515
12.4	Property rights, contracts, and market failures ●●●●	520
12.5	Public goods ●●●●	523
12.6	Missing markets: Insurance and lemons ●	527
12.7	Incomplete contracts and external effects in credit markets ●●	532
12.8	The limits of markets ●●●●	534
12.9	Market failure and government policy ●	538
12.10	Conclusion	541
12.11	References	541
13	ECONOMIC FLUCTUATIONS AND UNEMPLOYMENT	543
13.1	Growth and fluctuations ●●	545
13.2	Output growth and changes in unemployment ●	551

13.3	Measuring the aggregate economy	554
13.4	Measuring the aggregate economy: The components of GDP ●	557
13.5	How households cope with fluctuations ●●	561
13.6	Why is consumption smooth?	564
13.7	Why is investment volatile? ●●●	572
13.8	Measuring the economy: Inflation ●●	579
13.9	Conclusion	583
13.10	References	584
14	UNEMPLOYMENT AND FISCAL POLICY	585
14.1	The transmission of shocks: The multiplier process	587
14.2	The multiplier model	588
14.3	Household target wealth, collateral, and consumption spending ●●	597
14.4	Investment spending ●●	602
14.5	The multiplier model: Including the government and net exports ●	608
14.6	Fiscal policy: How governments can dampen and amplify fluctuations ●●	612
14.7	The multiplier and economic policymaking ●	619
14.8	The government's finances ●●●	624
14.9	Fiscal policy and the rest of the world ●●	628
14.10	Aggregate demand and unemployment ●	630
14.11	Conclusion	636
14.12	References	636
15	INFLATION, UNEMPLOYMENT, AND MONETARY POLICY	639
15.1	What's wrong with inflation? ●	641
15.2	Inflation results from conflicting and inconsistent claims on output	644
15.3	Inflation, the business cycle, and the Phillips curve	649
15.4	Inflation and unemployment: Constraints and preferences ●	656
15.5	What happened to the Phillips curve? ●●	658
15.6	Expected inflation and the Phillips curve	660
15.7	Supply shocks and inflation ●●●	666
15.8	Monetary policy ●●	673
15.9	The exchange rate channel of monetary policy ●●	679
15.10	Demand shocks and demand-side policies ●	681
15.11	Macroeconomic policy before the global financial crisis: Inflation-targeting policy ●●●	684
15.12	Another reason for rising inflation at low unemployment	687
15.13	Conclusion	688
15.14	References	689
16	TECHNOLOGICAL PROGRESS, EMPLOYMENT, AND LIVING STANDARDS IN THE LONG RUN	691
16.1	Technological progress and living standards ●●	695
16.2	The job creation and destruction process ●●●	700
16.3	Job flows, worker flows, and the Beveridge curve ●	702
16.4	Investment, firm entry, and the price-setting curve in the long run ●	706
16.5	New technology, wages, and unemployment in the long run ●●●	712
16.6	Technological change and income inequality ●●	717
16.7	How long does it take for labour markets to adjust to shocks? ●●●	720
16.8	Institutions and policies: Why do some countries do better than others? ●●●●●	722
16.9	Technological change, labour markets, and trade unions ●●●●●	725
16.10	Changes in institutions and policies ●●	730
16.11	Slower productivity growth in services, and the changing nature of work ●●●	731
16.12	Wages and unemployment in the long run ●●	736

16.13	Conclusion	737
16.14	References	738
17	CAPSTONE: THE GREAT DEPRESSION, GOLDEN AGE, AND GLOBAL FINANCIAL CRISIS	741
17.1	Three economic epochs	746
17.2	The Great Depression, positive feedbacks, and aggregate demand	752
17.3	Policymakers in the Great Depression	754
17.4	The golden age of high growth and low unemployment	758
17.5	Workers and employers in the golden age	760
17.6	The end of the golden age	764
17.7	After stagflation: The fruits of a new policy regime	768
17.8	Before the financial crisis: Households, banks, and the credit boom	770
17.9	Modelling housing bubbles	778
17.10	The financial crisis and the great recession	781
17.11	The role of banks in the crisis	785
17.12	The economy as teacher	788
17.13	Conclusion	791
17.14	References	792
18	CAPSTONE: THE NATION AND THE WORLD ECONOMY	793
18.1	Globalization and deglobalization in the long run	796
18.2	Globalization and investment	803
18.3	Globalization and migration	809
18.4	Specialization and the gains from trade among nations	811
18.5	Specialization, factor endowments, and trade between countries	814
18.6	Winners and losers from trade and specialization	823
18.7	Winners and losers in the very long run and along the way	829
18.8	Migration: Globalization of labour	832
18.9	Globalization and anti-globalization	833
18.10	Trade and growth	836
18.11	Conclusion	840
18.12	References	841
19	CAPSTONE: ECONOMIC INEQUALITY	843
19.1	Inequality across the world and over time	846
19.2	Accidents of birth: Another lens to study inequality	856
19.3	What (if anything) is wrong with inequality?	863
19.4	How much inequality is too much (or too little)?	866
19.5	Endowments, technology, and institutions	870
19.6	Inequality, endowments, and principal-agent relationships	875
19.7	Putting the model to work: Explaining changes in inequality	877
19.8	Predistribution	884
19.9	Explaining recent trends in inequality in market income	887
19.10	Redistribution: Taxes and transfers	889
19.11	Equality and economic performance	895
19.12	Conclusion	898
19.13	References	899
20	CAPSTONE: ECONOMICS OF THE ENVIRONMENT	901
20.1	Recap: External effects, incomplete contracts, and missing markets	905
20.2	Climate change	907
20.3	The abatement of environmental damages: Cost-benefit analysis	912
20.4	Conflicts of interest: Bargaining over wages, pollution, and jobs	921

20.5	Cap and trade environmental policies	926
20.6	The measurement challenges of environmental policy	931
20.7	Dynamic environmental policies: Future technologies and lifestyles	935
20.8	Environmental dynamics	943
20.9	Why is addressing climate change so difficult?	949
20.10	Policy choices matter	953
20.11	Conclusion	959
20.12	References	960
21	CAPSTONE: INNOVATION, INFORMATION, AND THE NETWORKED ECONOMY	963
21.1	The innovation process: Invention and diffusion	966
21.2	Innovation systems	970
21.3	External effects: Complements, substitutes, and coordination	976
21.4	Economies of scale and winner-take-all competition	981
21.5	Matching (two-sided) markets	986
21.6	Intellectual property rights	993
21.7	Optimal patents: Balancing the objectives of invention and diffusion	997
21.8	Public funding of basic research, education, and information infrastructure	1003
21.9	Conclusion	1007
21.10	References	1008
22	CAPSTONE: ECONOMICS, POLITICS, AND PUBLIC POLICY	1011
22.1	The government as an economic actor	1014
22.2	Government acting as a monopolist	1021
22.3	Political competition affects how the government will act	1027
22.4	Why an erstwhile dictator might submit to political competition	1031
22.5	Democracy as a political institution	1034
22.6	Political preferences and electoral competition: The median voter model	1036
22.7	A more realistic model of electoral competition	1040
22.8	The advance of democracy	1044
22.9	Varieties of democracy	1049
22.10	Democracy makes a difference	1051
22.11	A puzzle: The persistence of unfairness and market failures in democracies	1055
22.12	Economic infeasibility	1056
22.13	Administrative infeasibility	1061
22.14	Special interests	1063
22.15	Policy matters and economics works	1068
22.16	Conclusion	1070
22.17	References	1071
	LOOKING FORWARD TO ECONOMICS AFTER CORE	1075
