

Holocene Slope Processes of Periglacial Mountain Areas in Scandinavia and Poland

1. INTRODUCTION	1
1.1. Slope processes and the periglacial environment	1
1.2. Scientific background	3
1.3. Aims of the study	6
1.4. Geographical background	7
1.5. Climatic background	9
1.5.1. Holocene climatic variations	9
1.5.2. Present day climates	17
2. METHODS	23
2.1. General	23
2.2. Cesium measurements of top-soil layer	23
2.3. Geobotanical dating methods	25
2.4. Lake sediment studies	26
2.4.1. General background	26
2.4.2. Sampling technique and equipment	31
2.4.3. Analysis of physical properties	34
2.4.4. Datings of sediment cores	35
3. RESULTS	37
3.1. Åknes, Norway	37
3.1.1. Geomorphology	37
3.1.2. Cesium investigation	39
3.1.3. Dendrochronology and air-photo interpretation	40
3.1.4. Lake sediments	44
3.1.5. Holocene rapid mass wasting variations	52
3.2. Vassivagge, Sweden	55
3.3. Kärkevagge, Sweden	56
3.3.1. Geomorphology	56
3.3.2. Cesium investigation	58
3.3.3. Lake sediments	61
3.3.4. Holocene rapid mass wasting variations	68
3.4. Latnjavagge, Sweden	70
3.4.1. Geomorphology	70
3.4.2. Lake sediments	70
3.4.3. Holocene rapid mass wasting variations	78
3.5. Tjåmuhas, Sweden	82

3.5.1. Geomorphology	82
3.5.2. Lake sediments	82
3.5.3. Holocene rapid mass wasting variations	88
3.6. Vasavagge, Sweden	91
3.6.1. Geomorphology	91
3.6.2. Lake sediments	91
3.6.3. Holocene rapid mass wasting variations	93
3.7. Nissunvagge, Sweden	96
3.7.1. Geomorphology	96
3.7.2. Cesium investigation	97
3.7.3. Lake sediments	98
3.7.4. Holocene rapid mass wasting variations	103
3.8. Nakervare, Sweden	105
3.8.1. Geomorphology	105
3.8.2. Lake sediments	105
3.8.3. Holocene rapid mass wasting variations	108
3.9. Zielony Staw, Poland	108
3.9.1. Geomorphology	108
3.9.2. Lake sediments	111
3.9.3. Holocene rapid mass wasting variations	115
3.10. Czarny Staw, Poland	118
3.10.1. Geomorphology	118
3.10.2. Lichenometry	118
3.10.3. Lake sediments	121
3.10.4. Holocene rapid mass wasting variations	128
4. DISCUSSION	131
4.1. Methods	131
4.2. Holocene slope process activity	133
4.3. Holocene climatic histories	137
5. CONCLUSIONS	141
