Preface	vii
Acknowledgments	xii
Introduction	xxvii
Part I: Inside UNIX	1
Chapter 1: Getting Started with System Administration	3
Chapter 2: UNIX System Design	19
Chapter 3: UNIX Building Blocks	51
Chapter 4: UNIX Networking	79
Chapter 5: TCP/IP Networking	95
Chapter 6: The X Window System	125
Chapter 7: Administration Roles and Strategies	141
Part II: Your UNIX System	165
Chapter 8: Setting Up Your UNIX Server	167
Chapter 9: Managing Login Servers	187
Chapter 10: Database Engines	209
Part III: Getting and Managing Information	227
Chapter 11: Collecting Information	229
Chapter 12: Digesting and Summarizing Information	269
Chapter 13: Proactive Administration	283
Part IV: Systems Administration	299
Chapter 14: Managing Standard Services	301
Chapter 15: Forestalling Catastrophes	321
Chapter 16: Systems Integration	363
Chapter 17: UNIX Security	377
Part V: UNIX and the Internet	401
Chapter 18: Administering Internet Servers	403
Chapter 19: Setting Up and Maintaining a DNS Server	429
Chapter 20: E-mail Servers	469
Chapter 21: Transferring Files	495
Chapter 22: Web Servers	507
Chapter 23: News Servers	533
Chapter 24: The Internet for System Administrators	541
Chapter 25: Advanced Tools	563
