Preface to Second Edition, xiii

Preface to First Edition, xv

## CHAPTER 1 ■ Getting Started

|     |                   |   |
|-----|-------------------|---|
| 1.1 | INTRODUCTION      | 1 |
| 1.2 | WAVELET TRANSFORM | 2 |
| 1.3 | READING THE BOOK  | 4 |

## CHAPTER 2 ■ The Continuous Wavelet Transform

|      |  |    |
|------|--|----|
| 2.1  | INTRODUCTION   | 7  |
| 2.2  | THE WAVELET  | 7  |
| 2.3  | REQUIREMENTS FOR THE WAVELET   | 10 |
| 2.4  | THE ENERGY SPECTRUM OF THE WAVELET                                   | 10 |
| 2.5  | WAVELET TRANSFORM  | 12 |
| 2.6  | IDENTIFICATION OF COHERENT STRUCTURES                                | 14 |
| 2.7  | EDGE DETECTION   | 22 |
| 2.8  | INVERSE WAVELET TRANSFORM  | 24 |
| 2.9  | SIGNAL ENERGY: WAVELET-BASED ENERGY AND POWER SPECTRA                | 28 |
| 2.10 | WAVELET TRANSFORM IN TERMS OF THE FOURIER TRANSFORM                  | 33 |
| 2.11 | COMPLEX WAVELETS: THE MORLET WAVELET                                 | 34 |
| 2.12 | WAVELET TRANSFORM, SHORT-TIME FOURIER TRANSFORM AND HEISENBERG BOXES | 44 |
| 2.13 | ADAPTIVE TRANSFORMS: MATCHING PURSUITS                               | 51 |
| 2.14 | WAVELETS IN TWO OR MORE DIMENSIONS                                   | 55 |
| 2.15 | THE CWT: COMPUTATION, BOUNDARY EFFECTS AND VIEWING                   | 56 |
| 2.16 | RIDGE FOLLOWING AND SECONDARY WAVELET FEATURE DECOUPLING             | 61 |
| 2.17 | RIDGE HEIGHTS  | 66 |
| 2.18 | RUNNING WAVELET ARCHETYPING  | 67 |

|   |  |           |
|---|--|-----------|
| 2.19  | WAVELET TRANSFORM REPHASING  | 69        |
| 2.20  | REASSIGNMENT AND SYNCHROSQUEEZING                                      | 73        |
| 2.21  | COMPARING TWO SIGNALS USING WAVELET TRANSFORMS                         | 75        |
| 2.21.1  | Transform Differences and Ratios                                       | 76        |
| 2.21.2  | Cross-Wavelet Transform  | 78        |
| 2.21.3  | Wavelet Cross-Correlation  | 81        |
| 2.21.4  | Phase Comparison Measures  | 83        |
| 2.21.5  | Wavelet Coherence  | 85        |
| 2.22  | BICOHERENCE AND CROSS-BICOHERENCE                                      | 86        |
| 2.23  | ENDNOTES   | 88        |
| 2.23.1  | Chapter Key Words and Phrases  | 88        |
| 2.23.2  | Additional Notes and Resources   | 88        |
| 2.23.3  | Things to Try  | 89        |
| 2.23.4  | Final Note: The CWT as a ‘Soft Tool’ for Algorithm Development         | 91        |
| <b>CHAPTER 3 ■ The Discrete Wavelet Transform</b> |  | <b>93</b> |
| 3.1   | INTRODUCTION   | 93        |
| 3.2   | FRAMES AND ORTHOGONAL WAVELET BASES                                    | 93        |
| 3.2.1   | Frames   | 93        |
| 3.2.2   | Dyadic Grid Scaling and Orthonormal Wavelet Transforms                 | 95        |
| 3.2.3   | Scaling Function and Multiresolution Representation                    | 98        |
| 3.2.4   | Scaling Equation, Scaling Coefficients and Associated Wavelet Equation | 101       |
| 3.2.5   | Haar Wavelet   | 102       |
| 3.2.6   | Coefficients from Coefficients: Fast Wavelet Transform                 | 105       |
| 3.3   | DISCRETE INPUT SIGNALS OF FINITE LENGTH                                | 107       |
| 3.3.1   | Approximations and Details   | 107       |
| 3.3.2   | Multiresolution Algorithm: An Example                                  | 111       |
| 3.3.3   | Wavelet Energy   | 114       |
| 3.3.4   | Alternative Indexing of Dyadic Grid Coefficients                       | 115       |
| 3.3.5   | A Simple Worked Example: The Haar Wavelet Transform                    | 117       |
| 3.4   | EVERYTHING DISCRETE  | 122       |
| 3.4.1   | Discrete Experimental Input Signals                                    | 122       |
| 3.4.2   | Smoothing, Thresholding and Denoising                                  | 127       |
| 3.5   | DAUBECHIES WAVELETS  | 135       |
| 3.5.1   | Filtering  | 143       |

|  |            |
|--|------------|
| 3.5.2 Symmlets and Coiflets  | 148        |
| 3.6 TRANSLATION INVARIANCE   | 149        |
| 3.7 BIORTHOGONAL WAVELETS  | 150        |
| 3.8 TWO-DIMENSIONAL WAVELET TRANSFORMS   | 151        |
| 3.9 ADAPTIVE TRANSFORMS: WAVELET PACKETS   | 163        |
| 3.10 'X-LETS': CONTOURLETS, RIDGELETS, CURVELETS, SHEARLETS AND SO ON  | 168        |
| 3.11 ENDNOTES  | 173        |
| 3.11.1 Chapter Key Words and Phrases   | 173        |
| 3.11.2 Further Resources   | 173        |
| <b>CHAPTER 4 ■ Fluids</b>  | <b>177</b> |
| 4.1 INTRODUCTION   | 177        |
| 4.2 STATISTICAL MEASURES FOR FLUID TURBULENCE  | 178        |
| 4.2.1 Moments, Energy and Power Spectra  | 178        |
| 4.2.2 Intermittency and Correlation  | 185        |
| 4.2.3 Wavelet Thresholding   | 186        |
| 4.2.4 Wavelet Selection Using Entropy Measures   | 191        |
| 4.3 ENGINEERING FLOWS  | 194        |
| 4.3.1 Experimental Flows: Jets, Wakes, Turbulence and Coherent Structures                                      | 194        |
| 4.3.2 Computational Fluid Dynamics: Simulation and Analysis  | 200        |
| 4.3.3 Fluid–Structure Interaction  | 206        |
| 4.4 GEOPHYSICAL FLOWS  | 210        |
| 4.4.1 Atmospheric Processes: Wind, Boundary Layers and Turbulence  | 211        |
| 4.4.2 Ocean Processes: Waves, Large-Scale Oscillations, Ocean–Atmosphere Interactions and Biological Processes | 215        |
| 4.4.3 Rainfall and River Flows   | 221        |
| 4.5 TWO-PHASE FLOWS  | 224        |
| 4.6 OTHER APPLICATIONS IN FLUIDS   | 227        |
| <b>CHAPTER 5 ■ Engineering Testing, Monitoring and Characterization</b>  | <b>231</b> |
| 5.1 INTRODUCTION   | 231        |
| 5.2 DYNAMICS   | 232        |
| 5.2.1 Fundamental Behaviour  | 232        |
| 5.2.2 Chaos  | 236        |

|                             |  |     |
|-----------------------------|--|-----|
| 5.3                         | NON-DESTRUCTIVE TESTING OF STRUCTURAL ELEMENTS                   | 238 |
| 5.4                         | CONDITION MONITORING OF ROTATING MACHINERY                       | 249 |
| 5.4.1                       | Gears  | 249 |
| 5.4.2                       | Shafts, Bearings and Blades                                      | 255 |
| 5.5                         | MACHINING PROCESSES  | 259 |
| 5.6                         | CHARACTERIZATION OF SURFACES AND FIBROUS MATERIALS               | 261 |
| 5.7                         | OTHER APPLICATIONS IN ENGINEERING                                | 263 |
| 5.7.1                       | Compression  | 263 |
| 5.7.2                       | Control  | 264 |
| 5.7.3                       | Electrical Systems and Circuits                                  | 265 |
| 5.7.4                       | Miscellaneous  | 265 |
| <b>CHAPTER 6 ■ Medicine</b> |  | 267 |
| 6.1                         | INTRODUCTION   | 267 |
| 6.2                         | ELECTROCARDIOGRAM  | 267 |
| 6.2.1                       | ECG Beat Detection and Timings                                   | 268 |
| 6.2.2                       | Detection of Abnormalities                                       | 271 |
| 6.2.3                       | Heart Rate Variability   | 275 |
| 6.2.4                       | Cardiac Arrhythmias  | 278 |
| 6.2.5                       | ECG Data Compression   | 289 |
| 6.2.6                       | Hardware Implementation  | 289 |
| 6.3                         | NEUROELECTRIC WAVEFORMS  | 290 |
| 6.3.1                       | Evoked Potentials and Event-Related Potentials                   | 291 |
| 6.3.2                       | Epileptic Seizures and Epileptogenic Foci                        | 297 |
| 6.3.3                       | Sleep Studies  | 299 |
| 6.3.4                       | Other Areas  | 302 |
| 6.4                         | PHOTOPLETHYSMOGRAM   | 302 |
| 6.4.1                       | Respiratory Modulations, Respiratory Rate and Respiratory Effort | 303 |
| 6.4.2                       | Oxygen Saturation  | 307 |
| 6.4.3                       | The Video Photoplethysmogram (Video-PPG)                         | 309 |
| 6.4.4                       | Other Areas  | 312 |
| 6.5                         | PATHOLOGICAL SOUNDS, ULTRASOUNDS AND VIBRATIONS                  | 315 |
| 6.5.1                       | Cardiovascular System  | 315 |
| 6.5.2                       | Lung Sounds, Swallowing, Snoring and Speech                      | 318 |
| 6.5.3                       | Acoustic Response  | 321 |

|   |   |     |
|---|---|-----|
| 6.6   | BLOOD FLOW AND BLOOD PRESSURE   | 323 |
| 6.7   | MEDICAL IMAGING   | 328 |
| 6.7.1   | Optical Imaging   | 328 |
| 6.7.2   | Ultrasonic Images   | 330 |
| 6.7.3   | Computed Tomography, Magnetic Resonance Imaging and Other Radiographic Images | 330 |
| 6.8   | OTHER APPLICATIONS IN MEDICINE  | 332 |
| 6.8.1   | Electromyographic Signals   | 332 |
| 6.8.2   | Posture, Gait and Activity  | 333 |
| 6.8.3   | Analysis of Multiple Biosignals   | 334 |
| 6.8.4   | Miscellaneous   | 334 |
| <b>CHAPTER 7 ■ Fractals, Finance, Geophysics, Astronomy and Other Areas</b> |   | 337 |
| 7.1   | INTRODUCTION  | 337 |
| 7.2   | FRACTALS  | 337 |
| 7.2.1   | Exactly Self-Similar Fractals   | 338 |
| 7.2.2   | Stochastic Fractals   | 341 |
| 7.2.3   | Multifractals   | 350 |
| 7.3   | FINANCE   | 355 |
| 7.4   | GEOPHYSICS  | 361 |
| 7.4.1   | Properties of Subsurface Media: Well Logging, Cores and Seismic Methods       | 361 |
| 7.4.2   | Remote Sensing  | 366 |
| 7.5   | ASTRONOMY: SIGNALS AND IMAGES   | 371 |
| 7.6   | OTHER AREAS   | 378 |
