

# CONTENTS

<b>Preface</b>	<b>xiii</b>
<b>1 Introduction</b>	<b>1</b>
A. Basic Philosophy of this Book	1
B. Planning Before Beginning Winemaking	3
C. General Sequence of Operations in Winemaking	6
D. Some Hazards Specific to Winemaking	6
E. References	12
<b>2 Viticulture for Winemakers</b>	<b>13</b>
Introduction	13
A. Species of Grapes for Wine	14
B. The Grape Variety, Clones, and Viruses	16
C. Variety Selection	17
D. Effects of Vineyard Location	24
E. Vineyard Management	32
F. Berry Composition, Ripening, and Seasonal Variation	35
G. Selection of State of Ripeness for Harvest and Harvesting	52
H. References	60
<b>3 Preparation of Musts and Juice</b>	<b>65</b>
A. Crushing and Destemming	65
B. Must Handling	68
C. Juice and Skin Separation for White Wines	73
D. Juice Clarification for White Wines	75
E. Juice and Must Treatments	79
F. Pressing	91
G. Juice Storage Alternatives	95
H. References	98
<b>4 Yeast and Biochemistry of Ethanol Fermentation</b>	<b>102</b>
A. Definition, Origins, and Identification of Wine-Related Yeasts	102
B. Natural Grape and Winery Flora	122

C. Fermentation Inoculation Practices	123
D. Yeast Morphology and Cellular Organization	126
E. Yeast Nutrition and Growth Characteristics	126
F. Fermentation Biochemistry	135
G. Fermentation Kinetics	141
H. End Products of Yeast Metabolism	146
I. Nitrogen Metabolism During Fermentation	153
J. Sulfur Metabolism During Fermentation	167
K. Problem Fermentations	168
L. Ethanol Tolerance	176
M. Fermentation Bouquet and Other Volatile Esters	178
N. References	181
<b>5 Red and White Table Wines</b>	<b>193</b>
A. Aspects of Wine Fermentations	193
B. White Table Wines	211
C. Late-Harvest Wines	217
D. Preparing Base Wines for Sparkling Wine	219
E. Preparing Wines to be Distilled	220
F. Red Table Wines	221
G. Fortified Wines	237
H. References	238
<b>6 Malolactic Fermentation</b>	<b>244</b>
Introduction	244
A. Deacidification by Malolactic Conversion	245
B. Bacteriological Stability Following Malolactic Fermentation	247
C. Flavor Changes from Malolactic Fermentation	248
D. Malolactic Fermentation and Wine Style	251
E. Controlling the Malolactic Fermentation	254
F. Detection of Malolactic Conversion	260
G. Postmalolactic Fermentation Operations	262
H. Identification and Cultivation of Malolactic Bacteria	262
I. Intermediary Metabolism of the Malolactic Conversion	269
J. References	273
<b>7 The Fining and Clarification of Wines</b>	<b>279</b>
A. Aspects of Clarification	279
B. The Fining Agents	282
C. Wine Clarification	289
D. Wine Filtration	293
E. Filtration Testing and Modeling	307
F. References	315
<b>8 The Physical and Chemical Stability of Wine</b>	<b>320</b>
A. Tartrate Stability	320
B. Protein Stability	339
C. Colloidal Stability	344
D. Immobilized Agents for Wine Treatment	346
E. References	347
<b>9 Microbiological Spoilage of Wine and Its Control</b>	<b>352</b>
A. Definitions of Microbiological Spoilage	352
B. Origins of Wine Spoilage Microorganisms	353

C. Diagnosis of Spoilage as Microbiological	354
D. Kinds of Microbiological Spoilages of Wine	356
E. Identification of Wine Spoilage Microorganisms	357
F. Spoilage by Molds and Yeasts	360
G. Spoilage by Lactic Acid Bacteria	369
H. Spoilage by Acetic Acid Bacteria	373
I. Spoilage by other Aerobic Bacteria	377
J. References	378
<b>10 The Maturation and Aging of Wines</b>	<b>382</b>
A. Background and Objectives	382
B. Time-Temperature Relationships and Traditional Regimes for Different Classes of Wines	389
C. Bulk Maturation—Variables, Chemistry, and Quality Effects	393
D. Wooden Cooperage	399
E. Oxidation and Browning	406
F. Blending	415
G. Bottle Aging and Post-Bulk-Maturation Storage	420
H. Rapid Maturation and Aging	424
I. References	424
<b>11 The Bottling and Storage of Wines</b>	<b>427</b>
A. Preparation for Bottling	427
B. Bottling Operations	435
C. Transport and Storage Considerations	442
D. References	447
<b>12 The Role of Sulfur Dioxide in Wine</b>	<b>448</b>
A. Physical Properties	448
B. Chemical Properties	454
C. References	470
<b>13 Must, Juice, and Wine Transfer Methods</b>	<b>474</b>
Introduction	474
A. Types of Pumps	474
B. Pump Characteristics	477
C. The Calculation of Frictional Losses	478
D. Alternative Transfer Methods	488
E. In-Line Additions and Treatments	489
F. References	491
<b>14 Heating and Cooling Applications</b>	<b>492</b>
A. Heating and Cooling Applications	493
B. Heating and Cooling Calculations	494
C. General Heat Exchanger Design Considerations	502
D. Types of Heat Exchangers	505
E. Cooling by Direct Heat Transfer	512
F. Refrigeration Systems	514
G. Energy Requirements and Conservation	517
H. Off-Peak Generation of Cooling Capacity	519
I. References	519
<b>15 Juice and Wine Acidity</b>	<b>521</b>
A. Acid Concentrations	521
B. Acidity Measures	523

C. Predicting pH and Titratable Acidity Values	530
D. Estimating Changes in pH and Titratable Acidity	534
E. References	537
<b>16 Preparation, Analysis, and Evaluation of Experimental Wines</b>	<b>539</b>
A. Size of Experimental Lots, Containers	540
B. Representative Samples	541
C. Controls and Replication	542
D. Chemical and Physical Analyses of Experimental Wines	543
E. Sensory Evaluation	544
F. References	547
<b>Appendices</b>	<b>548</b>
<b>Glossary</b>	<b>574</b>
<b>Index</b>	<b>585</b>
