

CONTENTS

Chapter 1:	Summary: Improvement of crop production and disease resistance through mutation induction: the IAEA mandate	1
	<i>M. Spencer and A. Lebeda</i>	
Chapter 2:	<i>In vitro</i> screening methods for assessing plant disease resistance	5
	<i>A. Lebeda and L. Švábová</i>	
Chapter 3:	Mass-screening techniques for early selection of banana and plantain crops resistant to major diseases and pests	47
	<i>B. Okole</i>	
Chapter 4:	Mutation induction by gamma-rays and carbon ion beam irradiation in banana (<i>Musa spp.</i>): a study with an emphasis on the response to Black <i>sigatoka</i> disease.....	59
	<i>W.O. Reyes-Borja, I. Sotomayor, I. Garzón, D. Vera, M. Cedeño, K. Degi, S. Nagatomi, A. Tanaka, Y. Hase, Y. Sekozawa, S. Sugaya and H. Gemma</i>	
Chapter 5:	Rapid and mass screening of banana and plantain for resistance to Black <i>sigatoka</i> disease using detached leaf and <i>in vitro</i> plantlets	91
	<i>P.S. Ojiambo, M. Twizeyimana, A. Tenkouano and R. Bandyopadhyay</i>	
Chapter 6:	<i>In vitro</i> selection for resistance to <i>Fusarium</i> wilt in Banana	101
	<i>K. Matsumoto, M.L. Barbosa, L.A.C. Souza and J.B. Teixeira</i>	
Chapter 7:	Selection parameters for resistance to <i>Fusarium oxysporum</i> f. sp. <i>cubense</i> race 1 and race 4 on diploid banana (<i>Musa acuminata</i>)	115
	<i>R. Morpurgo, S. Lopato, R. Afza and F.J. Novák</i>	
Chapter 8:	Differential <i>chitinase</i> activity in banana cultivars as a response to <i>Fusarium oxysporum</i> f. sp. <i>cubense</i> infection	129
	<i>R. Morpurgo, M. van Duren, G. Grasso and R. Afza</i>	
Chapter 9:	Mass screening of mutants resistant to <i>Alternaria</i> blotch from <i>in vitro</i> -cultured apple shoots irradiated with X-rays	135
	<i>M. Suzuki and A. Saito</i>	
Chapter 10:	The pineapple- <i>Fusarium subglutinans</i> interaction: an early selection system for disease resistance	159
	<i>O. Borrás-Hidalgo and R.S. Bermúdez</i>	
Chapter 11:	Mass-screening techniques of some tropical crops for resistance to anthracnose diseases using phytotoxic metabolites	173
	<i>N.A. Amusa</i>	
Chapter 12:	Screening of peas for resistance to <i>Fusarium</i> wilt and root rot (<i>Fusarium oxysporum</i> , <i>Fusarium solani</i>)	189
	<i>A. Lebeda, L. Švábová and R. Dostálová</i>	
Chapter 13:	Mass-screening techniques for the early selection of disease resistance in chickpea (<i>Cicer arietinum</i>)	201
	<i>S. Pande, J.N. Rao, M. Sharma, M. Pathak and P. Stevenson</i>	
Chapter 14:	Improving tolerance to <i>Fusarium oxysporum</i> f. sp. <i>melonis</i> in melon using tissue culture and mutation techniques	235
	<i>Y. Kantoglu, E. Seçer, K. Erzurum, İ. Tutluer, B. Kunter, H. Peşkirioğlu, Z. Sağel</i>	
Chapter 15:	Screening for resistance to lettuce downy mildew (<i>Bremia lactucae</i>)	245
	<i>A. Lebeda and I. Petrželová</i>	

Chapter 16: Screening for resistance to tomato powdery mildew (<i>Oidium neolycopersici</i>)	257
<i>A. Lebeda and B. Mieslerová</i>	
Chapter 17: <i>In vitro</i> and <i>in vivo</i> selection of black pepper (<i>Piper nigrum</i>) mutants tolerant to Fusariosis	267
<i>O.F. Lemos, A.Tulmann Neto, J.C. Albino, M.C. Poltronieri and A. Ando</i>	
Chapter 18: Screening for resistance to cucurbit downy mildew (<i>Pseudoperonospora cubensis</i>).....	285
<i>A. Lebeda and J. Urban</i>	
Chapter 19: Screening for resistance to cucurbit powdery mildews (<i>Golovinomyces</i> <i>cichoracearum</i> , <i>Podosphaera xanthii</i>).....	295
<i>A. Lebeda and B. Sedláková</i>	
Chapter 20: Screening onions and related species for resistance to Anthracnose (<i>Colletotrichum gloeosporioides</i>).....	309
<i>G. Galván</i>
