Preface.....	7
1 Introduction.....	9
2 Characteristic features of materials.....	16
2.1 Steels	16
2.2 Cast irons	19
2.3 Non-ferrous metals and their alloys.....	23
2.4 Ceramic materials.....	26
2.5 Glasses	27
2.6 Plastics	29
2.7 Composite materials.....	32
3 Degradation processes and limit state	36
3.1 Metallurgy, chemical and structural inhomogeneity	40
3.2 Degradation of weld joints	45
4 Elastic and plastic deformation	50
5 Wear of materials.....	64
5.1 Adhesive wear.....	65
5.2 Abrasive wear.....	66
5.3 Erosive wear	69
5.4 Cavitation wear	71
5.5 Vibration wear (fretting wear)	73
5.6 Contact fatigue.....	74
6 Fundamentals of fracture mechanics	84
6.1 Criterion of transition temperature.....	87
6.2 Criterion of crack propagation (fracture mechanics)	87
6.2.1 <i>Linear-elastic fracture mechanics</i>	87
6.2.2 <i>Elastic-plastic fracture mechanics</i>	90
7 Fractography and classification of fractures.....	95
8 Brittle fracture.....	101
9 Ductile fracture	128
10 Fatigue of materials	135
11 Creep of materials.....	168

12 Degradation of ceramic materials and glass	193
13 Degradation of plastics.....	198
14 Degradation of composite materials	208
15 Corrosion and corrosion protection of materials.....	214
15.1 Chemical corrosion.....	217
15.2 Electrochemical corrosion of metals.....	220
15.3 Types of corrosion depending on environment.....	225
15.3.1 <i>Atmospheric corrosion</i>	225
15.3.2 <i>Corrosion in liquids</i>	226
15.3.3 <i>Corrosion in soils</i>	226
15.4 Types of corrosion depending on external factors.....	226
15.4.1 <i>Pitting corrosion</i>	226
15.4.2 <i>Crevice corrosion</i>	228
15.4.3 <i>Vibration corrosion</i>	231
15.4.4 <i>Stress corrosion cracking of metals</i>	231
15.4.5 <i>Corrosion fatigue</i>	237
15.4.6 <i>Stray current corrosion</i>	238
15.4.7 <i>Intergranular corrosion</i>	238
15.4.8 <i>Biological corrosion</i>	243
15.4.9 <i>High-temperature corrosion and marine environment interaction</i>	243
15.4.10 <i>Thermogalvanic corrosion</i>	245
15.4.11 <i>Erosion corrosion</i>	245
15.5 Corrosion of selected types of non-ferrous metals and non-metallic materials.....	246
15.6 Corrosion protection of metals.....	250
15.6.1 <i>Selection of materials</i>	251
15.6.2 <i>Modification of corrosion environment</i>	251
15.6.3 <i>Construction modifications</i>	251
15.6.4 <i>Electrochemical protection of metals</i>	251
15.6.5 <i>Protection of metals by coatings</i>	253
15.6.6 <i>Classification and characteristics of stainless steels and alloys</i>	258
15.6.7 <i>Examples of components and constructions damaged by corrosion</i>	262

16 Stress relaxation.....	274
17 Damage by power beams and fields.....	277
18 Radiation damage of materials	288
19 High velocity impact damage	291
20 Fracture by impact load.....	294
21 Heat damage and scorch.....	296
Summary.....	299
List of used materials.....	301
About the Authors	304
Subject Index	306
