

# CONTENTS

<b>LIST OF ABBREVIATIONS AND SYMBOLS</b>	6
<b>INTRODUCTION</b>	8
<b>1 PHYLLOSILICATES</b>	10
1.1 Montmorillonite - typical representative of smectites	11
1.2 Characterisation of used montmorillonite	13
1.2.1 Specific surface area measurements	13
1.2.2 X-ray diffraction study	14
1.2.3 Electron and atomic force microscopy study	15
1.2.4 Thermal analysis	16
<b>2 ADSORPTION OF SELECTED CATIONIC SURFACTANTS ON MONTMORILLONITE</b>	17
2.1 Brief theory of adsorption	17
2.2 Adsorption of organic compounds on smectites	19
2.2.1 Some applications of organo-smectites	20
2.2.2 Cationic surfactants and their basic properties	21
2.3 Adsorption experiments with CTA and CP	22
2.3.1 Determination of CTA and CP	22
2.3.2 Construction of adsorption isotherms	23
2.3.3 Evaluation of adsorption isotherms	24
2.4 X-ray diffraction study	26
2.5 Infrared absorption study	28
2.6 MMT and organo-MMT surface study	30
2.6.1 Specific surface area measurements	31
2.6.2 Moisture adsorption measurements	30
2.6.3 Scanning electron microscopy study	32
2.7 Molecular modelling of surfactants adsorption	33
2.7.1 Molecular modelling conditions	33
2.7.2 Molecular modelling results	34
2.8 Conclusion	38
<b>3 ADSORPTION OF PHENOL AND ANILINE ON NATURAL AND ORGANICALLY MODIFIED MONTMORILLONITE</b>	39
3.1 Basic characterisation of phenol and aniline	39
3.2 Modification of montmorillonite with quaternary ammonium salts	39
3.3 Determination of phenol and aniline	39
3.4 Adsorption of phenol	40
3.5 Adsorption of aniline	42
3.6 Conclusion	45

<b>4</b>	<b>ADSORPTION OF SILVER IONS ON MONTMORILLONITE</b>	<b>46</b>
4.1	Basic properties of silver	46
4.2	Adsorption experiments	46
.2.1	Constructions of adsorption isotherms	47
4.3	X-ray diffraction study	49
4.4	Specific surface area and pore size distribution measurements	51
4.5	Comparison of pore size distribution and XRD results	52
4.6	Conclusion	54
<b>5</b>	<b>MONTMORILLONITE AS CARRIER OF METALLIC SILVER NANOPARTICLES</b>	<b>55</b>
5.1	Preparation of silver nanoparticles	55
5.2	Reduction of silver ions adsorbed on MMT	56
5.3	UV-VIS absorption study	57
5.4	TEM study	58
5.5	X-ray diffraction study	62
5.6	Specific surface area measurements	63
5.7	Surface enhanced Raman scattering study	64
5.8	Conclusion	65
<b>6</b>	<b>ANTIBACTERIAL ACTIVITY OF CATIONIC SURFACTANTS AND SILVER IMMOBILISED ON MONTMORILLONITE</b>	<b>66</b>
6.1	Antibacterial compounds supported on inorganic carriers	66
6.2	Antibacterial properties of MMT	66
6.3	Antibacterial properties of CTA-MMT and CP-MMT	67
6.4	Antibacterial properties of Ag-MMT	69
6.4.1	Desorption of silver ions from Ag-MMT	71
6.5	Antibacterial properties of silver nanoparticles on MMT	71
6.6	Conclusion	72
<b>7</b>	<b>ADSORPTION OF ZINC AND COPPER IONS ON NATURAL AND ETHYLENEDIAMINE MODIFIED MONTMORILLONITE</b>	<b>73</b>
7.1	Basic properties of zinc and copper	73
7.2	Adsorption of $Zn^{2+}$ and $Cu^{2+}$ on MMT	75
7.3	Adsorption of $Zn^{2+}$ and $Cu^{2+}$ on EDA-MMT	77
7.4	X-ray diffraction study	78
7.5	Infrared absorption study	79
7.5.1	Infrared absorption study by using KBr method	79
7.5.2	Infrared absorption study by using DRIFT method	82
7.6	Thermal analysis	82
7.7	Conclusion	84

<b>8</b>	<b>PREPARATION AND UTILIZATION OF ZINC SULPHIDE NANOPARTICLES DEPOSITED ON MONTMORILLONITE</b>	<b>85</b>
8.1	Basic properties of ZnS nanoparticles	85
8.2	Preparation of ZnS nanoparticles	86
8.3	UV absorption spectra of ZnS dispersions	87
8.4	Photoluminescence spectra of ZnS-MMT	89
8.5	XRD patterns of ZnS-MMT	90
8.6	TEM study of ZnS-MMT	91
8.7	Photocatalytic reduction of CO <sub>2</sub> in presence of ZnS-MMT	92
8.7.1	Proposed electrochemical reactions	94
8.7.2	Role of MMT during CO <sub>2</sub> reduction	96
8.8	Conclusion	95
	<b>CONCLUSION</b>	<b>97</b>
